

Global Uranium Announces the Initiation of Historical Data Review for Wyoming Projects

Comprehensive Historical Data Review to Refine Exploration Strategy for Wyoming Uranium Projects

December 10th, 2024

Calgary, Alberta — Global Uranium Corp. (CSE: **GURN** | OTC: **GURFF** | FRA: **Q3J**) (the “**Company**”) is pleased to announce that it has commenced a comprehensive review of historical data for its Wyoming uranium projects, located in the Gas Hills, Copper Mountain, and Great Divide Basin districts. The work will be performed by Big Rock Exploration, a trusted exploration services provider with extensive experience in data compilation and geological modeling.

The historical data review aims to compile and analyze any available geological, geophysical, and geochemical datasets collected from previous exploration and production activities in the region. This analysis will focus on identifying potential uranium targets and refining the Company’s exploration models.

The Wyoming projects (including Airline #2, Jeep South, Big Bend, WAC, and Jabs) collectively cover over 2,000 hectares and are strategically positioned near past-producing uranium mines and deposits. The historical data review, conducted in collaboration with Big Rock Exploration, will be used to assist in the design of future exploration programs, including geophysical surveys and drilling planned for 2025.

"Our partnership with Big Rock Exploration will ensure that the historical data review is conducted with a high level of expertise," said Ungad Chadda, CEO, Global Uranium. "This is a fundamental step in improving our exploration strategy and will allow us to target high-priority areas efficiently as we advance our Wyoming projects."

About Global Uranium Corp.

Global Uranium Corp. focuses on exploring and developing uranium assets primarily in North America. The Company currently holds key uranium projects: the Wing Lake Property in the Mudjatik Domain of Northern Saskatchewan, Canada; the Northwest Athabasca Joint Venture with Forum Energy Metals Corp. and NexGen Energy Ltd. in the Northwest Athabasca region of Saskatchewan, Canada; and the Great Divide Basin District Projects, the Gas Hills District Projects, and the Copper Mountain District Projects in Wyoming, USA.

Forward-Looking Statements

Certain statements contained in this press release constitute forward-looking information. These statements relate to future events or future performance. The use of any of the words “could”, “intend”, “expect”, “believe”, “will”, “projected”, “estimated” and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on the Company’s current belief or assumptions as to the outcome and timing of such future events. In particular, this press release contains forward-looking information relating to, among other things, the intention to continue exploration efforts on the Project with the aim of further unlocking the Project’s potential; and the expectation that natural attenuation will allow the site to recover without further action.

Although forward-looking information is based on the reasonable assumptions of the Company’s management, there can be no assurance that any forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include the risk that exploration of the Project may not continue, whether as a result of a lack of financial resources, a failure to receive the requisite permits or approvals, the discretion of management of the joint venture or otherwise; the risk that exploration of the Project will not progress as currently contemplated and, that, even if exploration does proceed as anticipated, such exploration activities may not achieve their anticipated outcomes; risks inherent in the exploration and development of mineral projects, including risks relating to receiving requisite permits and approvals, changes in project parameters or delays as plans continue to be redefined, that mineral exploration is inherently uncertain and that the results of mineral exploration may not be indicative of the actual geology or mineralization of a project; the risk that mineral exploration may be unsuccessful or fail to achieve the results anticipated by the Company; risks related to joint ventures and the other risks and factors identified by the Company in its continuous disclosure filings, filed on the Company’s SEDAR+ profile at www.sedarplus.ca.

The forward-looking information contained in this release is made as of the date hereof, and the Company is not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws. Because of the risks, uncertainties and assumptions contained herein, investors should not place undue reliance on forward-looking information. The foregoing statements expressly qualify any forward-looking information contained herein.
