Management's Responsibility

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian Generally Accepted Accounting Principles ("CGAAP") that have been revised to incorporate International Financial Reporting Standards ("IFRS") and ensuring that all information in the management discussion and analysis is consistent with these financial statements. This responsibility includes selecting appropriate accounting principles and methods and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors is composed primarily of directors who are neither management nor employees of Surrey Capital Inc. and the Audit Committee is comprised entirely of directors that are neither management nor employees. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management, and with the external auditors. The Board is also responsible for recommending the appointment of the external auditor of Surrey Capital Corp.

MNP LLP, an independent firm of Chartered Accountants, is appointed by the shareholders to audit the financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, the Board, Audit Committee, and management to discuss their audit findings.

1. Nature of Organization

Description of the Business

Surrey Capital Corp. (the "Corporation") was incorporated under the Business Corporations Act (*Ontario*) on September 13, 2010 with the intent to being classified as a Capital Pool Company as defined in Policy 2.4 of the TSX Venture Exchange (the "Exchange") corporate finance manual. The Corporation has no assets other than cash and cash equivalent, sundry receivables and prepaid expenses and proposes to identify and evaluate potential acquisitions or businesses, and once identified and evaluated, to negotiate an acquisition or participation subject to receipt and, if required, shareholders' approval.

The Corporation's registered head office is 466A Ellerslie Ave, Toronto, Ontario, M2R 1C4.

These financial statements of the Corporation were authorized for issue in accordance with a resolution of the board of directors on January 28, 2013.

Basis of Operations

These financial statements have been prepared in accordance with International Financial Reporting Standards applied on a going concern basis, which assumes that the Corporation will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Corporation be unable to continue its operations.

As a Capital Pool Company, the proceeds raised by the Corporation from the issuance of share capital may only be used to identify and evaluate assets or businesses for future investments, with the exception that not more than the lesser of 30% of the gross proceeds from the sale of securities issued by the Corporation and \$210,000 may be used to cover prescribed costs of issuing common shares or administrative and general expenditures of the Corporation. These restrictions apply until completion of a Qualifying Transaction by the Corporation as defined under the policies of the Exchange.

The Corporation's continuing operations as intended are dependent upon its ability to identify, evaluate and negotiate an acquisition of, a participation in or an interest in properties, assets or businesses. Such an acquisition will be subject to regulatory approval and, if required, shareholder approval.

Where an acquisition or participation is warranted, additional funding may be required. The ability of the Corporation to fund its potential future operations and commitments is dependent upon the ability of the Corporation to obtain additional financing.

There is no assurance that the Corporation will identify a business or asset that warrants acquisition or participation within the time limitations permissible under the policies of the Exchange, at which time the Exchange may suspend or delist the Corporation's shares from trading.

(All Amounts are in Canadian Dollars)

2. Basis of Presentation

Statement of Compliance

These unaudited condensed interim financial statements for the period from September 1, 2012 to November 30, 2012 have been prepared by management in accordance International Accounting Standards ("IAS") 34 - Interim Financial Reporting under International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by the IASB and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). These financial statements have not been reviewed by the Corporation's external auditors.

The accounting policies set out below have been applied consistently to all periods presented in these unaudited interim financial statements.

These financial statements have been prepared on the basis of IFRS standards that are expected to be effective or available for early adoption by the Corporation on August 31, 2013. The Corporation has made certain assumptions about the accounting policies expected to be adopted when the annual financial statements are prepared for the year ended August 31, 2013.

These financial statements have been prepared on a historical cost basis except for certain financial assets which are recorded at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The financial statements should be read in conjunction with the annual financial statements for the year ended August 31, 2012.

3. Summary of Significant Accounting Policies

Basis of Measurement

These financial statements are stated in Canadian dollars and were prepared on a going concern basis, under the historical cost convention.

Use of Estimates and Judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates. Areas where estimates are significant to the financial statements are disclosed in note 4.

Functional and presentation currency

These financial statements are presented in Canadian dollars, which is the Corporation's functional currency.

Cash and Cash Equivalents

Cash and cash equivalents include demand deposits with banks, money market accounts, and other short-term investments with original maturities of 90 days or less. Balances of cash and cash equivalents in financial institutions may at times exceed the government-insured limits.

(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Proposed Qualifying Transaction

These costs are expensed as incurred.

Deferred Financing Costs

Financing costs related to the Corporation's proposed financing are recorded as deferred financing costs. These costs will be deferred until the financing is completed, at which time the costs will be charged against the proceeds received. If the financing does not close, the costs will be charged to operations.

Income Taxes

Tax expense comprises current and deferred tax. Tax is recognized in the statement of comprehensive income except to the extent it relates to items recognized in other comprehensive income or directly in equity.

Current Income Tax

Current tax expense is based on the results for the period as adjusted for items that are not taxable or not deductible. Current tax is calculated using tax rates and laws that were enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. Provisions are established where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred Tax

Deferred taxes are the taxes expected to be payable or recoverable on differences between the carrying amounts of assets in the statement of financial position and their corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences between the carrying amounts of assets and their corresponding tax bases. Deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets in a transaction that affects neither the taxable profit nor the accounting profit.

Earnings (Loss) Per Share

Earnings (loss) per share is calculated by dividing the net loss applicable to common shares by the weighted average number of shares outstanding during the period. Diluted earnings (loss) per share is computed by dividing the net loss applicable to common shares by the diluted weighted average number of shares which assumes that all outstanding stock options granted with an exercise price below the average market value are exercised during the period. The difference between the number of shares assumed and the number of shares assumed purchased is then included in the denominator of the diluted earnings per share computation.

Non-derivative Financial Instruments

Non-derivative financial instruments are recognized when the Corporation becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Corporation has substantially transferred all risks and rewards of ownership. Non-derivative financial instruments are recognized initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs.

(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Financial assets are classified into the following categories: financial assets 'at fair value through profit or loss' ("FVTPL"), 'held-to-maturity investments', 'available-for-sale' financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

Fair Value Through Profit or Loss

A financial asset or liability is classified in this category if acquired principally for the purpose of selling or repurchasing in the short-term. Derivatives are also included in this category unless they are designated as hedges.

Financial instruments in this category are recognized initially and subsequently at fair value. Transaction costs are expensed in the statement of operations. Gains and losses arising from changes in fair value are presented in the statement of operations within other gains and losses in the period in which they arise.

Financial assets and liabilities at fair value through profit or loss are classified as current except for the portion expected to be realized or paid beyond twelve months of the balance sheet date, which is classified as non-current.

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. Loans and receivables are initially recognized at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method.

Other Financial Liabilities

Other financial liabilities are initially measured at fair value, net of transaction costs, and are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Impairment of financial assets

Financial assets are assessed at each reporting date in order to determine whether objective evidence exists that the assets are impaired as a result of one or more events which have had a negative effect on the estimated future cash flows of the asset.

If there is objective evidence that a financial asset has become impaired, the amount of the impairment loss is calculated as the difference between its carrying amount and the present value of the estimated future cash flows from the asset discounted at its original effective interest rate. Impairment losses are recorded in earnings. If the amount of the impairment loss decreases in a subsequent period and the decrease can be objectively related to an event occurring after the impairment was recognized, the impairment loss is reversed up to the original carrying value of the asset. Any reversal is recognized in earnings.

The following is a summary of significant categories of financial instruments outstanding at November 30, 2012:

Cash Fair value through profit and loss

Sundry receivables

Accounts payable and accrued liabilities

Loans and receivables

Other financial liabilities

Carrying value and fair value of financial assets and liabilities are summarized as follows:

Classification	Carrying value	Fair value
Fair value through profit and loss	\$ 417,501	\$ 417,501
Loans and receivables	3,469	3,469
Other financial liabilities	9,069	9,069

Fair Value Hierarchy

The Corporation classifies financial instruments recognized at fair value in accordance with a fair value hierarchy that prioritizes the inputs to valuation technique used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and
- Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

As of November 30, 2012 cash and cash equivalents are measured at fair value and are classified within Level 1 of the fair value hierarchy.

(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Impairment of non-financial assets

The Corporation's assets are reviewed for indications of impairment at each statement of financial position's date. If indication of impairment exists, the asset's recoverable amount is estimated.

An impairment loss is recognized when the carrying amount of an asset, or cash-generating unit, exceeds its recoverable amount. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that largely independent of the cash inflows from other assets or groups of assets. Impairment losses are recognized in profit and loss for the period. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to cash generating units and then to reduce the carrying amount of the other assets the unit on a pro-rata basis.

Share-based Payments

Stock options issued by the Corporation are accounted for in accordance with the fair value based method. The fair value of options issued to directors, officers, employees of and consultants to the Corporation is charged to earnings on a straight line basis over the vesting period of each tranche (graded vesting) with the offsetting amount recorded to contributed surplus. The historical forfeiture rate is also factored in to the calculations. When options are exercised, the amount received together with the amount previously recorded in contributed surplus, are added to capital stock. The fair value of warrants issued to agents in conjunction with a public offering is charged to share issue costs with an offsetting amount recorded to contributed surplus. Fair value is measured using the Black-Scholes option pricing model.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Corporation are recorded at the proceeds received, net of direct issue costs.

Warrants

The Corporation measures the fair value of warrants issued using the Black-Scholes option pricing model. The fair value of each warrant is estimated based on their respective issuance dates taking into account volatility, expected life, the dividend rate, and the risk free interest rate. The fair value of warrants issued in conjunction with an offering is charged to share issue costs with an offsetting amount recorded to contributed surplus. The fair value of warrants exercised is recorded as share capital, and the fair value of any expired warrants is recorded as contributed surplus general account.

Recent Accounting Pronouncements

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the International Accounting Standard Board ("IASB") or International Financial Reporting Interpretations Committee ("IFRIC") that are mandatory for accounting periods beginning on or after January 1, 2013. The standards are as follows:

Financial Instruments — Recognition and Measurement

In October 2010, the IASB published amendments to IFRS 9 Financial Instruments (IFRS 9 (2010) which provides added guidance on the classification and measurement of financial liabilities. FRS 9 (2010) supersedes IFRS 9 (2009) and is effective for annual periods beginning on or after January 1, 2015, with early adoption permitted. For annual periods beginning before January 1, 2015, either IFRS 9 (2009) or IFRS 9 (2010) may be applied. The Corporation intends to adopt IFRS 9 (2010) in its financial statements for the annual period beginning on January 1, 2015. The extent of the impact of adoption of IFRS 9 (2010) has not yet been determined.

(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Financial Assets and Liabilities

In December 2011, the IASB published amendments to IAS 32 Financial Instruments: Presentation and issued new disclosure requirements in IFRS 7 Financial Instruments: Disclosures. The effective date for the amendments to IAS 32 is annual periods beginning on or after January 1, 2014. Certain of the amendments to IFRS 7 were adopted by the Corporation during the first six months of 2012, as described in Note 3 section (a) above, the remainder of the amendments are to be adopted for annual periods beginning on or after January 1, 2013. These amendments are to be applied retrospectively.

The amendments to IAS 32 clarify when an entity has a legally enforceable right to offset as well as clarify, when a settlement mechanism provides for net settlement or gross settlement that is equivalent to net settlement. The amendments to IFRS 7 contain new disclosure requirements for financial assets and liabilities that are offset in the statement of financial position or subject to master netting arrangements or similar arrangements. The Corporation intends to adopt the amendments to IFRS 7 in its financial statements for the annual period beginning on January 1, 2013, and the amendments to IAS 32 in its financial statements for the annual period beginning January 1, 2014. The extent of the impact of adoption of the amendments has not yet been determined. Consolidated Financial Statements

In May 2011, the IASB issued IFRS 10 Consolidated Financial Statements. IFRS 10 replaces portions of IAS 27 Consolidated and Separate Financial Statements that addresses consolidation, and supersedes SIC 12 Consolidation – Special Purpose Entities ("SPEs"), in its entirety. IFRS 10 provides a single model to be applied in the analysis of control of all investees, including entities that currently are SPEs in the scope of SIC 12. In addition, the consolidation procedures specified in IFRS 10 are carried forward substantially unmodified from IAS 27.

Joint Arrangements

In May 2011, the IASB issued IFRS 11 Joint Arrangements. IFRS 11 supersedes IAS 31 Interest in Joint Ventures and SIC 13 Jointly Controlled Entities – Non-Monetary Contributions by Venturers. Through an assessment of the rights and obligations in an arrangement, IFRS 11 establishes principles to determine the type of joint arrangement, which are classified as either joint operations or joint ventures, and provides guidance for financial reporting activities required by the entities that have an interest in arrangements that are controlled jointly. Investments in joint ventures are required to be accounted for using the equity method.

As a result of the issuance of IFRS 10 and IFRS 11, IAS 28 Investments in Associates and Joint Ventures has been amended to correspond to the guidance provided in IFRS 10 and IFRS 11.

Disclosure of Interests in Other Entities

In May 2011, the IASB issued IFRS 12 Disclosure of Interests in Other Entities, which contains disclosure requirements for companies that have interests in subsidiaries, joint arrangements, associates and unconsolidated structured entities.

IFRS 10, IFRS 11 and IFRS 12, and the amendments to IAS 27 and IAS 28 are all effective for annual periods beginning on or after January 1, 2013. Early adoption is permitted, so long as IFRS 10, IFRS 11 and IFRS 12, and the amendments to IAS 27 and IAS 28 are adopted at the same time. However, entities are permitted to incorporate any of the disclosure requirements in IFRS 12 into their financial statements without early adopting IFRS 10, IFRS 11 and the amendments to IAS 27 and IAS 28. The Corporation intends to adopt IFRS 10, IFRS 11 and IFRS 12, and the amendments to IAS 27 and IAS 28 in its consolidated financial statements for the annual period beginning on January 1, 2013.

(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Fair Value Measurement

In May 2011, the IASB published IFRS 13 Fair Value Measurement, which is effective prospectively for annual periods beginning on or after January 1, 2013. IFRS 13 replaces the fair value measurement guidance contained in individual IFRSs with a single source of fair value measurement guidance. The standard also establishes a framework for measuring fair value and sets out disclosure requirements for fair value measurements.

Presentation of Financial Statements

In June 2011, the IASB published amendments to IAS 1 Presentation of Financial Statements, which are effective for annual periods beginning on or after July 1, 2012 and are to be applied retrospectively. Early adoption is permitted. The amendments require that a Corporation present separately the items of other comprehensive income that may be reclassified to profit or loss in the future from those that would never be reclassified to profit or loss.

Employee Benefits

In June 2011, the IASB published an amended version of IAS 19 Employee Benefits. Adoption of the amendment is required for annual periods beginning on or after January 1, 2013, with early adoption permitted. The amendment is generally applied retrospectively with certain exceptions. The amendment requires the calculation of expected return on plan assets to be based on the rate used to discount the defined benefit obligation. The amendment also requires other additional disclosures.

The Corporation is currently assessing the impact of adopting these new pronouncements.

4. Summary of Accounting Estimates and Assumptions

The preparation of the financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual outcomes can differ from these estimates.

The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the amounts recognized in the financial statements are:

Fair Value of Financial Instruments

The estimated fair value of financial assets and liabilities, by their very nature, are subject to measurement uncertainty.

Share-Based Payment Transactions

The Corporation measures the cost of share-based payment transactions with employees by reference to the fair value of the equity instruments. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant.

This estimate also requires determining and making assumptions about the most appropriate inputs to the valuation model including the expected life, volatility and dividend yield of the share option. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 7.

(All Amounts are in Canadian Dollars)

4. Summary of Accounting Estimates and Assumptions - continued

Taxes

Provisions for taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Corporation reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determinations are made.

5. Cash and Cash Equivalents

As at November 30, 2012, cash and cash equivalents of \$417,501 included \$326,923, which, under the rules of the Exchange, may only be used to identify and evaluate assets or businesses for, and obtain shareholder approval for, a proposed Qualifying Transaction and \$90,578 which may be used for administrative and general expenses.

6. Capital Stock

a) Authorized and issued

The Corporation is authorized to issue an unlimited number of common shares and unlimited preferred shares.

b) Escrow Shares

All of the 2,500,000 common shares issued prior to the IPO and all common shares that may be acquired from treasury of the Corporation by Non Arm's Length Parties, as defined in the policies of the Exchange, of the Corporation prior to completion of the Qualifying Transaction are deposited with the escrow agent under the escrow agreement.

All common shares acquired on exercise of stock options prior to the completion of the Qualifying Transaction, must also be deposited in escrow until the final exchange bulletin is issued by the Exchange. In addition, all common shares of the Corporation acquired in the secondary market prior to the completion of a Qualifying Transaction by a Control Person, as defined in the policies of the Exchange, are required to be deposited in escrow. Subject to certain permitted exemptions, all securities of the Corporation held by principals of the resulting issuer will also be escrowed.

(All Amounts are in Canadian Dollars)

7. Contributed Surplus

The Corporation's contributed surplus consists of the following:

	General	-	ncentive ock Option	١	Varrants	Total
Balance, September 13, 2010 Issuance of agent's warrants Issuance of charitable stock	\$ 	\$		\$	 7,618	\$ 7,618
options Vesting of incentive stock options	 1,878 		 18,777			1,878 18,777
Balance, August 31, 2011, 2012 and November 30, 2012	\$ 1,878	\$	18,777	\$	7,618	\$ 28,273

8. Stock Options and Warrants

The Corporation's Incentive Stock Option Plan (the "**Plan**") provides for the issuance of a maximum of 10% of the issued and outstanding common shares at an exercise price equal or greater than the market price of the Corporation's common shares on the date of the grant to directors, officers, employees and consultants to the Corporation. The option period for options granted under the Plan is for a maximum period of 10 years. Options granted may vest over certain time periods within the option period, which will limit the number of options that may be exercised. Each stock option is exercisable into one common share of the Corporation at the price specified in the terms of the option.

The fair value of the options was based on the Black Scholes option-pricing model. The following assumptions were used to value them:

	Fiscal 2011
Number of incentive stock options	742,800
Number of charitable stock options	74,280
Exercise price	\$ 0.10
Expected life	5 years
Weighted average risk-free interest rate	1.62%
Weighted average expected volatility	25.0%
Dividend yield	0.0%
Fair value	\$0.025

The stock options activity is summarized below:

	Number	Weighted Average Exercise Price
Balance, September 13, 2010		N/A
Granted	817,080	0.10
Exercised		N/A
Cancelled		N/A
Forfeited		N/A
Balance, August 31, 2011, 2012 and November 30, 2012	817,080	\$ 0.10

(All Amounts are in Canadian Dollars)

8. Stock Options and Warrants - continued

The following table summarizes the weighted average exercise price and the weighted average remaining contractual life of the options outstanding and exercisable as at November 30, 2012.

		0	Exercis	able		
			Weighted	Weighted		Weighted
Exercise	Options	Expiry	Average	Average		Average
Price	Outstanding	Date	Remaining Life	Price	Quantity	Price
\$ 0.10	74,280	January 27, 2016	3.2 years	\$ 0.10	74,280	\$ 0.10
0.10	742,800	January 27, 2021	8.2 Years	0.10	742,800	0.10

The fair value of the warrants was based on the Black Scholes option-pricing model. The following assumptions were used to value them:

	Fiscal 2011
Number of agent warrants	492,800
Exercise price	\$ 0.10
Expected life	2 years
Weighted average risk-free interest rate	1.62%
Weighted average expected volatility	25.0%
Dividend yield	0.0%
Fair value	\$0.015

The warrants activity is summarized below:

	Number	Weighted Average Exercise Price
Balance, September 13, 2010		N/A
Granted	492,800	0.10
Exercised		N/A
Cancelled		N/A
Forfeited		N/A
Balance, August 31, 2011, 2012 and November 30, 2011	492,800	\$ 0.10

The warrants that are issued and outstanding as at November 30, 2012 are as follows:

Number of Warrants	<u>l ype</u>	<u>Issuance Date</u>	Expiry Date
492,800	Broker Warrant	January 2011	January 27, 2013

(All Amounts are in Canadian Dollars)

9. General and Administrative Expenditures

Period ending November 30,	2012		2011
Bank charges	\$	25	\$ 25
Office expense		2,670	3,000
Professional fees		2,600	1,000
Regulator fees		2,215	2,464
Premises		2,250	2,550
Telecommunication		330	
	\$	10,090	\$ 8,739

10. Related Party Transactions

Amounts due from and to the related parties, are a result of transactions with entities controlled by shareholders, officers or directors of the Corporation. These amounts are non-interest bearing, unsecured and not subject to specific terms of repayment unless stated.

During the period ended November 30, 2012, the Corporation recorded \$5,250 (2010 - \$5,250) in respect of the reimbursing of expenditures incurred on behalf of the Corporation by the directors of the Corporation or a company controlled by an officer of the Corporation with regards to office expenses, premises, regulatory fees, and project analysis costs.

These transactions are in the normal course of operations and have been measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

11. Contingency

While the Corporation has 24 months from the date of listing being February 8, 2011 to complete its Qualifying Transaction, there is no assurance that the Corporation will identify a business or asset that warrants acquisition or participation within the time limitations permissible under the policies of the Exchange, at which time the Exchange may suspend or de-list the Corporation's shares from trading. (Note 15)

From time to time, the Corporation may be exposed to claims and legal actions in the normal course of business, some of which may be initiated by the Corporation. As at November 30, 2012, no material issues were outstanding.

(All Amounts are in Canadian Dollars)

12. Fair Value of Financial Instruments

(a) Fair Value of Non-Derivative Financial Instruments

Fair value is the amount that willing parties would accept to exchange a financial instrument based on the current market for instruments with the same risk, principal and remaining maturity. The fair value of interest bearing financial assets and liabilities is determined using effective interest method by discounting the contractual principal and interest payments at estimated current market interest rates for the instrument. Current market rates are determined by reference to current benchmark rates for a similar term and current credit spreads for debt with similar terms and risk. The carrying value and fair value of financial instruments as follows are similar to their short-term nature:

		November 30, 2011				August 31, 2012			
	Car	Carrying Value		Fair Value		Carrying Value		Fair Value	
Financial assets									
Cash and cash equivalents	\$	417,501	\$	417,501	\$	445,252	\$	445,252	
Sundry receivables		3,469		3,469		1,783		1,783	
Financial liabilities									
Accounts payable and accrued liabilities		9,069		9,069		1,733		1,733	

(b) Fair Value Hierarchy

The Corporation values instruments carried at fair value using quoted market prices, where available. Quoted market prices represent a Level 1 valuation. When quoted market prices are not available, the Corporation maximizes the use of observable inputs within valuation models. When all significant inputs are observable, the valuation is classified as Level 2. Valuations that require the significant use of unobservable inputs are considered Level 3.

The following table outlines financial assets and liabilities measured at fair value in the financial statements and the level of the inputs used to determine those fair values in the context of the hierarchy as defined above:

	Level 1	L	evel 2	Le	evel 3	Total
Assets						
Cash and cash equivalent	\$ 417,501	\$		\$		\$ 417,501
Sundry receivables			3,469			3,469
Total Assets	\$ 417,501	\$	3,469	\$		\$ 420,970
Liabilities						
Accounts payable and accrued liabilities	\$ 	\$	9,069	\$		\$ 9,069
Total liabilities	\$ 	\$	9,069	\$		\$ 9,069

(All Amounts are in Canadian Dollars)

13. Risk Management

In addition to the restrictions placed on the use of cash discussed in note 5, the Corporation manages its common shares, stock options and warrants as capital. The Corporation's objectives when managing capital are to safeguard the Corporation's ability to continue and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk, as there are no external restrictions on it.

The Corporation manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Corporation may attempt to issue new shares, issue new debt, acquire or dispose of assets in order at adjust the amount of cash on its balance sheet.

The Corporation's capital structure is as follows:

	Noven	nber 30,2012	Augu	st 31, 2012
Share capital	\$	496,386	\$	496,386
Contributed surplus – general		1,878		1,878
Contributed surplus – incentive stock options		18,777		18,777
Contributed surplus – warrants		7,618		7,618
Accumulated deficit		(106, 125)		(86,120)
	\$	418,534	\$	438,539

In order to facilitate the management of its capital requirements, the Corporation may prepare expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

In order to maximize ongoing efforts, the Corporation does not pay out dividends. The Corporation's investment policy is to invest its short-term excess cash in highly liquid short-term interest-bearing investments with maturities of 365 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

Management reviews its approach on an ongoing basis and believes that this approach, given the relative size of the Corporation, is reasonable.

14. Financial Instruments

Liquidity Risk

Liquidity risk is the risk that the Corporation cannot meet its financial obligations associated with financial liabilities in full. The primary source of liquidity is net operating income, which is used to finance working capital and capital expenditure requirements, and to meet the Corporation's financial obligations associated with financial liabilities.

(All Amounts are in Canadian Dollars)

14. Financial Instruments - continued

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates may have an effect on the cash flows associated with some financial instruments, known as interest rate cash flow risk, or on the fair value of other financial instruments, known as interest rate price risk. Obtaining long-term debt with fixed interest rates minimizes interest rate cash flow risk.

The Corporation does not trade in financial instruments and is not exposed to any significant interest rate price risk.

Market Risk

Market risk is the risk that changes in market prices will have an effect on future cash flows associated with financial instruments. Market risk comprises three types of risk: credit risk, currency risk and other price risk.

Credit Risk

Credit risk arises from the possibility that debtors may be unable to fulfill their commitments. For a financial asset, this is typically the gross carrying amount, net of any amounts offset and any impairment losses.

As of the date of these financial statements the Corporation's only debtor is the government of Canada for Harmonized sales tax ("HST") receivable and therefore the Corporation does not believe it is currently exposed to any significant credit risk.

Currency Risk

Currency risk is the risk that changes in foreign exchange rates may have an effect on future cash flows associated with financial instruments. The Corporation does not have any material transactions denominated in foreign currency and is not exposed to foreign currency risk.

Other Price Risk

Other price risk is the risk that changes in market prices, including commodity or equity prices, will have an effect on future cash flows associated with financial instruments. The cash flows associated with financial instruments of the Corporation are not exposed to other price risk.

Fair Values

Financial instruments include cash and cash equivalents, sundry receivable, and accounts payable and accrued liabilities. The carrying values of these financial instruments approximate their fair value due to the short term nature of financial instruments.

15. Proposed Qualifying Transaction

On October 18, 2012, the Corporation signed a Letter of Understanding ("LoU") with Richmond Minerals Inc. ("Richmond") and Mag Copper Ltd. ("Mag") (jointly the "Optionors") whereby the Optionee and the Optionors would enter into a definitive option agreement (the "Option Agreement") allowing the Optionee to acquire up to a 50% interest in a 34 unpatetented mining claims in (the "Property") located in the Halle Township of the Province of Quebec (NTS Map Sheet Numbers 31M08). The LoU was superseded by the Option Agreement that was signed on December 31, 2012.

The Option Agreement provides the Corporation the option to acquire 50% of the Property upon incurring an aggregate of \$200,000 in exploration and development expenditures on the Property, in addition to paying the Optionors \$20,000 and the issuance of 200,000 common shares of the Corporation upon the release of the Final Exchange Bulleting ("FEB") and 400,000 common shares of the Corporation on the anniversary of the FEB.

(All Amounts are in Canadian Dollars)

15. Proposed Qualifying Transaction - continued

The proposed transaction is subject to a number of conditions precedents including the approval of the TSX Venture Exchange.
