Management's Responsibility

To the Shareholders of Surrey Capital Corp.:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with International Financial Reporting Standards ("**IFRS**") that have been incorporated into Canadian Generally Accepted Accounting Principles ("**CGAAP**") and ensuring that all information in the management discussion and analysis is consistent with these financial statements. This responsibility includes selecting appropriate accounting principles and methods and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors ("**Board**") is composed primarily of directors who are neither management nor employees of Surrey Capital Corp. and the Audit Committee is comprised entirely of directors that are neither management nor employees. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management, and with the external auditors. The Board is also responsible for recommending the appointment of the external auditor of Surrey Capital Corp.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

1. Nature of Organization

Description of the Business

Surrey Capital Corp. (the “**Corporation**”) was incorporated under the Business Corporations Act (*Ontario*) on September 13, 2010. The Corporation focuses on the exploration of mineral evaluation and exploration property in Canada.

The Corporation’s registered head office is 466A Ellerslie Ave, Toronto, Ontario, M2R 1C4.

Basis of Operations

These interim financial statements have been prepared in accordance with International Financial Reporting Standards (“**IFRS**”) applied on a going concern basis, which assumes that the Corporation will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The interim financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Corporation be unable to continue its operations.

As an exploration company, funding to meet its exploration budget as well as working capital is dependent on the Corporation’s ability to issue common shares or borrow funds. While the Corporation currently has sufficient funds on hand to meet its budget for the foreseeable future, there is no certainty that the Corporation will be able to raise sufficient funds beyond this period.

2. Basis of Presentation

Statement of Compliance

These unaudited condensed interim financial statements for the period from September 1, 2013 to November 30, 2013 have been prepared by management in accordance International Accounting Standards (“**IAS**”) 34 - Interim Financial Reporting under IFRS as issued by the International Accounting Standards Board (“**IASB**”). Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by the IASB and interpretations of the International Financial Reporting Interpretations Committee (“**IFRIC**”). These financial statements have not been reviewed by the Corporation’s external auditors.

These interim financial statements of the Corporation were authorized for issue in accordance with a resolution of the Board of Directors on January 24, 2014.

These financial statements have been prepared on a historical cost basis except for certain financial assets, which are recorded at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The accounting policies set out within has been applied consistently to all periods presented in these financial statements.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies

Basis of Measurement

These financial statements have been prepared on an accrual basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

Use of Estimates and Judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates. Areas where estimates are significant to the financial statements are disclosed in note 4.

Functional and presentation currency

These financial statements are presented in Canadian dollars, which is the Corporation's functional currency.

Cash and Cash Equivalents

Cash and cash equivalents include demand deposits with banks, money market accounts, and other short-term investments with original maturities of 90 days or less.

Transactional Costs

The costs incurred relating to transactional costs are expensed as incurred.

Exploration and evaluation ("E&E") assets

The Corporation capitalizes all costs related to investments in E&E assets on a property-by-property basis in accordance with IFRS 6, Exploration for and Evaluation of Mineral Resources. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries, and are monitored for indications of impairment. Where there are indications of a potential impairment, an assessment is performed for recoverability. Capitalized costs are charged to the statements of operations and comprehensive loss to the extent that they are not expected to be recovered. Exploration expenditures relate to the initial search for deposits with economic potential and to detailed assessments of deposits or other projects that have been identified as having economic potential.

Once an economically-viable reserve has been determined for an area and the decision to proceed with development has been approved, exploration and evaluation assets attributable to that area are first tested for impairment and then reclassified to construction in progress within property, plant and equipment. Subsequent recovery of the resulting carrying value depends on successful development or sale of the undeveloped project. If a project does not prove viable, all irrecoverable costs associated with the project, net of any impairment provisions, are written off.

From time to time the Corporation may acquire or dispose of an exploration property pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as exploration property costs and recoveries when the payments are made or received.

Deferred Financing Costs

Financing costs related to the Corporation's proposed financing are recorded as deferred financing costs. These costs will be deferred until the financing is completed, at which time the costs will be charged against the proceeds received. If the financing does not close, the costs will be charged to statements of operations and comprehensive loss.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Incremental costs incurred in respect of raising capital are charged against equity or debt proceeds raised. Costs associated with the issuance of common share are charged to capital stock upon the raising of equity. Costs associated with the issuance of debt are amortized using the effective interest method over the life of the debt.

Income Taxes

Income tax expense comprises current and deferred tax. Income tax is recognized in the statements of operations and comprehensive loss except to the extent it relates to items recognized in other comprehensive income or directly in equity.

Current Income Tax

Current tax is based on the results for the period as adjusted for items that are not taxable or not deductible. Current tax is calculated using tax rates and tax laws that were enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. Provisions are established where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred Tax

Deferred tax is recognized on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the statement of financial position. Deferred tax is calculated using tax rates and laws that have been enacted or substantively enacted at the end of the reporting period, and which are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax liabilities:

- are generally recognized for all taxable temporary differences; and
- are recognized for taxable temporary differences arising on investments in subsidiaries except where the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future.

Deferred tax assets:

- are recognized to the extent it is probable that taxable profits will be available against which the deductible temporary differences can be utilized; and
- are reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are not recognized in respect of temporary differences that arise upon initial recognition of goodwill or arise on initial recognition of assets and liabilities acquired other than in a business combination where at the time of transaction effects neither accounting profit or taxable income (tax loss).

Earnings (Loss) Per Share

Earnings (loss) per share is calculated by dividing the net loss applicable to common shares by the weighted average number of shares outstanding during the period. Diluted earnings (loss) per share is computed by dividing the net loss applicable to common shares by the diluted weighted average number of shares which assumes that all outstanding stock options granted with an exercise price below the average market value are exercised during the period. The difference between the number of shares assumed and the number of shares assumed purchased is then included in the denominator of the diluted earnings per share computation.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Non-derivative Financial Instruments

Non-derivative financial instruments are recognized when the Corporation becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Corporation has substantially transferred all risks and rewards of ownership. Non-derivative financial instruments are recognized initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs.

Financial assets are classified into the following categories: financial assets 'at fair value through profit or loss' ("FVTPL"), 'held-to-maturity investments', 'available-for-sale' financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

Fair Value Through Profit or Loss

A financial asset or liability is classified in this category if acquired principally for the purpose of selling or repurchasing in the short-term. Derivatives are also included in this category unless they are designated as hedges.

Financial instruments in this category are recognized initially and subsequently at fair value. Transaction costs are expensed in the statement of operations. Gains and losses arising from changes in fair value are presented in the statement of operations within other gains and losses in the period in which they arise.

Financial assets and liabilities at fair value through profit or loss are classified as current except for the portion expected to be realized or paid beyond twelve months of the balance sheet date, which is classified as non-current.

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. Loans and receivables are initially recognized at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method.

Other Financial Liabilities

Other financial liabilities are initially measured at fair value, net of transaction costs, and are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

Impairment of financial assets

Financial assets are assessed at each reporting date in order to determine whether objective evidence exists that the assets are impaired as a result of one or more events which have had a negative effect on the estimated future cash flows of the asset.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

If there is objective evidence that a financial asset has become impaired, the amount of the impairment loss is calculated as the difference between its carrying amount and the present value of the estimated future cash flows from the asset discounted at its original effective interest rate. Impairment losses are recorded in earnings. If the amount of the impairment loss decreases in a subsequent period and the decrease can be objectively related to an event occurring after the impairment was recognized, the impairment loss is reversed up to the original carrying value of the asset. Any reversal is recognized in earnings.

The following is a summary of significant categories of financial instruments outstanding at November 30, 2013:

Cash and cash equivalents	Fair value through profit and loss
Interest receivable	Loans and receivables
Accounts payable and accrued liabilities	Other financial liabilities
Convertible debentures	Other financial liabilities

Carrying value and fair value of financial assets and liabilities are summarized as follows:

Classification	Carrying Value	Fair value
Fair value through profit and loss	\$ 403,007	\$ 403,007
Loans and receivables	385	385
Other financial liabilities	82,821	82,821

Fair Value Hierarchy

The Corporation classifies financial instruments recognized at fair value in accordance with a fair value hierarchy that prioritizes the inputs to valuation technique used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

As of November 30, 2013 and August 31, 2013 cash and cash equivalents are measured at fair value and are classified within Level 1 of the fair value hierarchy.

Impairment of non-financial assets

The Corporation's assets are reviewed for indications of impairment at each statement of financial position's date. If indication of impairment exists, the asset's recoverable amount is estimated.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

An impairment loss is recognized when the carrying amount of an asset, or cash-generating unit, exceeds its recoverable amount. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that largely independent of the cash inflows from other assets or groups of assets. Impairment losses are recognized in profit and loss for the period. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to cash generating units and then to reduce the carrying amount of the other assets the unit on a pro-rata basis.

Share-based Payments

Stock options issued by the Corporation are accounted for in accordance with the fair value based method. The fair value of options issued to directors, officers, employees of and consultants to the Corporation is charged to earnings over the vesting period of each tranche (graded vesting) with the offsetting amount recorded to contributed surplus. The historical forfeiture rate is also factored in to the calculations. When options are exercised, the amount received together with the amount previously recorded in contributed surplus, are added to capital stock. The fair value of warrants issued to agents in conjunction with a public offering is charged to share issue costs with an offsetting amount recorded to contributed surplus. Fair value is measured using the Black-Scholes option pricing model.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Corporation are recorded at the proceeds received, net of direct issue costs.

Warrants

The Corporation measures the fair value of warrants issued using the Black-Scholes option pricing model. The fair value of each warrant is estimated based on their respective issuance dates taking into account volatility, expected life, the dividend rate, and the risk free interest rate. The fair value of warrants issued in conjunction with an offering is charged to share issue costs with an offsetting amount recorded to contributed surplus. The fair value of warrants exercised is recorded as share capital, and the fair value of any expired warrants is recorded as contributed surplus general account.

Recent Accounting Pronouncements

Unless otherwise noted, the following new and revised standards and amendments are effective for the annual periods beginning on or after September 1, 2013. Management is evaluating the impact the adoption of these standards and amendments will have on the financial position of the Corporation.

IFRS 7 - Financial Instruments: Disclosures

IFRS 7, "Financial instruments: Disclosures" was amended to provide guideline on the eligibility criteria for offsetting assets and liabilities as a single net amount in the consolidated statement of financial position.

IFRS 9 - Financial Instruments

IFRS 9, "Financial Instruments" ("**IFRS 9**") was issued by the IASB in November 2009 and will replace IAS 39, "Financial Instruments: recognition and Measurement" ("**IAS 39**"). IFRS 9 replaces the multiple rules in IAS 39 with a single approach to determine whether a financial assets is measured at amortized cost or fair value and a new mixed measurement model for debt instruments having two categories: amortized cost or fair value. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and contractual cash flow characteristics of the financial assets.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

Requirements for financial liabilities were added to IFRS 9 in October 2010 and they largely carried forward existing requirements in IAS 39, except that fair value change due to credit risk for liabilities designated at fair value through profit and loss are generally recorded in other comprehensive income. This standard is effective for annual periods beginning on or after January 1, 2015.

IFRS 10 - Consolidated Financial Statements

IFRS 10, "Consolidated Financial Statements" ("**IFRS10**") was issued by the IASB in May 2011 and will replace SIC 12, "Consolidation – Special Purpose Entities" and parts of IAS 27, "Consolidated and Separate Financial Statements". Under the existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 established principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. This standard (i) requires an entity that controls one or more other entities to present consolidated financial statements; (ii) defines the principle of control and establishes control as the basis for consolidation; (iii) sets out how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee; and (iv) sets out the accounting requirements for the preparation of the consolidated financial statements.

IFRS 11 - Joint Arrangements

IFRS 11, "Joint Arrangements" ("**IFRS11**") was issued by the IASB in May 2011 and supersede IAS 31, "Interests in Joint Ventures" and SIC 13 "Joint Controlled Entities - Non-Monetary Contributions by Ventures" by removing the option to account for joint ventures using the proportionate consolidation and requiring equity accounting. Venturers will transition the accounting for joint ventures from proportionate consolidated assets and liabilities in to a single line item on their financial statements. In addition, IFRS 11 will require joint arrangements to be classified as either joint operations or joint ventures. The structure of the joint arrangement will no longer be the most significant factor when classifying joint arrangement as either a joint operation or a joint venture.

IFRS 12 – Disclosure of Interest in Other Entities

IFRS 12 "Disclosure of Interest in Other Entities" ("**IFRS 12**") was issued by the IASB in May 2011. IFRS 12 requires enhanced disclosure of information about involvement with consolidated and unconsolidated entities, including structured entities commonly referred to as special purpose vehicles or variable interest entities. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of and risks associated with an entity's interest in other entities.

IFRS 13 - Fair Value Measurement

IFRS 13 "Fair Value Measurement" ("**IFRS 13**") was issued in May 2011. This standard clarifies the definition of fair value, required disclosures for fair value measurement and sets out single framework for measuring fair value. IFRS 13 Provides guidance on fair value in a single standard, replacing the existing guidance on measuring and disclosing fair value which is dispersed among several standards.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

3. Summary of Significant Accounting Policies - continued

IAS 19 - Employee Benefits

IAS 19 "Employee Benefits" has been amended to make significant changes to the recognition and measurement of defined benefits and termination benefits and to enhance the disclosure of all employee benefits. The amended standard requires immediate recognition of actuarial gains and losses in other comprehensive income as they arise, without subsequent recycling to net income. Past service cost (which includes curtailment gains and losses) will no longer be recognized over a service period but instead will be recognized immediately in the period of a plan amendment. Pension benefits cost will be split between (i) the cost benefits accrued in the current period (service cost) and benefit changes (past-service cost settlements and curtailments); and (ii) finance expense or income. The finance expense or income component will be calculated based on the net defined benefit asset or liability. A number of other amendments have been made to recognition, measurement and classification including redefining short-term and other long-term benefits, guidance on the treatment of taxes related to benefit plans, guidance on risk/cost sharing features and expanded disclosures. The amendments are effective for financial years beginning January 1, 2013.

IAS 28 - Investments in Associates and Joint Ventures

IAS 28 "Investments in Associates and Joint Ventures" ("**IAS 28**") was re-issued by the IASB in May 2011. IAS 28 continues to prescribe the accounting for investments in associates but is now the only source of guidance describing the application of the equity method. The amended IAS 28 will be applied by all entities that have an ownership interest with joint control of, or significant influence over, an investee.

IAS 32 - Financial Instruments: Presentation

IAS 32 "Financial Instruments: Presentation" ("**IAS 32**") was amended by the IASB in December 2011. The amendment clarifies that an entity has legally enforceable rights to offset financial assets and financial liabilities if that right is not contingent on a future event and it is enforceable both in the normal course of business and in the event of default, insolvency, or bankruptcy of the entity and all counterparties. The amendments to IAS 32 are effective for annual periods beginning on or after January 1, 2014.

4. Summary of Accounting Estimates and Assumptions

The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the amounts recognized in the financial statements are:

Fair Value of Financial Instruments

The estimated fair value of financial assets and liabilities, by their very nature, are subject to measurement uncertainty.

Share-Based Payment Transactions

The Corporation measures the cost of share-based payment transactions with employees by reference to the fair value of the equity instruments. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant.

This estimate also requires determining and making assumptions about the most appropriate inputs to the valuation model including the expected life, volatility, dividend yield and forfeiture rate of the share option. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 8.

SURREY CAPITAL CORP.
NOTES TO THE FINANCIAL STATEMENTS
NOVEMBER 30, 2013
(All Amounts are in Canadian Dollars)

4. Summary of Accounting Estimates and Assumptions - continued

Income Taxes

Provisions for income taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Corporation reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determinations are made.

5. Sundry Receivables

	November 2013	August 2013
HST receivable	\$ 1,361	\$ 5,306
Interest receivable	385	412
	\$ 1,746	\$ 5,718

6. Evaluation and Exploration Assets

On March 13, 2013, the Corporation entered into an Earn-in Option Agreement with Richmond Minerals Inc. (“**Richmond**”) and Mag Copper Inc. (“**Mag**” and, together with Richmond, the “**Vendors**”) for the Halle Property (the “**Property**”). The Agreement will permit the Corporation to earn a 50% interest in the Property as described, upon the payment of \$20,000 and the issuance of 200,000 common shares of the Corporation to the Vendors upon release of the Exchange’s Final Exchange Bulletin (“**FEB**”) which occurred in March 2013 in addition to 400,000 common shares of the Corporation prior to the first anniversary of the release of the FEB, as well as the expenditure of a minimum of \$200,000 in exploration costs within the first year following the release of the FEB.

	Halle Property
Earn-In Option: Cash payment	\$ 20,000
Earn-In Option: Common Shares issued	10,000
Expenditures incurred	7,567
	\$ 37,567

7. Accounts payable and accrued liabilities

	November 2013	August 2013
Trade payables	\$ 2,634	\$ 103
Accrued expenses	7,653	6,653
	\$ 10,287	\$ 6,756

8. Convertible Debentures

In March 2013, the Corporation issued \$74,800 in convertible debentures. The convertible debentures have a coupon rate of 12% and mature on August 31, 2014. The conversion ratio is 10,000 common shares of the Corporation per \$1,000 of convertible debentures. In addition, the Corporation issued 748,000 warrants to the convertible debenture holders, where each warrant provides the holder the right to purchase one additional common share at a price of \$0.10 which expires on August 31, 2014.

The convertible debentures were originally recorded as a liability less an equity portion, calculated using a discount rate of 18%, credited to contributed surplus (Note 10) of \$2,266 for a net value of \$72,534.

8. Convertible Debentures - continued

	November 2013	August 2013
Convertible debentures face value	\$ 74,800	\$ 74,800
Less: Equity portion credited to contributed surplus	4,748	4,748
Convertible debentures, net value	70,052	70,052
Accretion since issuance	2,482	1,551
	<u>\$ 72,534</u>	<u>\$ 71,603</u>

Included in the expense charges for the period ended November 30, 2013 was non-cash accreted notional financing charges of \$931 (November 30, 2012 - \$Nil) which relates to the charge to operations of the fair value of the conversion feature associated with the debentures and the warrants relating directly to the convertible debentures.

9. Share Capital

a) Authorized and issued

The Corporation is authorized to issue an unlimited number of common shares and unlimited preferred shares.

b) Escrow Shares

All of the 2,500,000 common shares issued prior to the Initial Public Offering (“IPO”) and all common shares that may be acquired from treasury of the Corporation by Non Arm’s Length Parties, as defined in the policies of the Exchange, of the Corporation prior to completion of the Qualifying Transaction are deposited with the escrow agent under the escrow agreement.

All common shares acquired on exercise of stock options prior to the completion of the Qualifying Transaction, must also be deposited in escrow until the final exchange bulletin is issued by the Exchange. In addition, all common shares of the Corporation acquired in the secondary market prior to the completion of a Qualifying Transaction by a Control Person, as defined in the policies of the Exchange, are required to be deposited in escrow. Subject to certain permitted exemptions, all securities of the Corporation held by principals of the resulting issuer will also be escrowed.

On March 13, 2013, the Corporation completed its Qualifying Transaction authorizing beginning of the release of common shares held in escrow in accordance with Policy 2.4 of the Exchange. As of November 30, 2013, 1,875,000 common shares remained in escrow and will be released as follows:

Date	Quantity
March 13, 2014	375,000
September 13, 2014	375,000
March 13, 2015	375,000
September 13, 2015	375,000
March 13, 2016	375,000

10. Contributed Surplus

The Corporation's contributed surplus consists of the following:

	General	Incentive Stock Option	Warrants	Total
Balance, September 1, 2012	\$ 1,878	\$ 18,777	\$ 7,618	\$ 28,273
Expiry of warrants	7,618	---	(7,618)	---
Conversion feature of convertible debentures	4,748	---	---	4,748
Cancellation of incentive stock option	3,287	(3,287)	---	---
Vesting of incentive stock options	---	235	---	235
Balance, August 31, 2013 and November 30, 2013	<u>\$ 17,531</u>	<u>\$ 15,725</u>	<u>\$ ---</u>	<u>\$ 33,256</u>

11. Stock Options and Warrants

The Corporation's Incentive Stock Option Plan (the "Plan") provides for the issuance of a maximum of 10% of the issued and outstanding common shares at an exercise price equal or greater than the market price of the Corporation's common shares on the date of the grant to directors, officers, employees and consultants to the Corporation. The option period for options granted under the Plan is for a maximum period of 10 years. Options granted may vest over certain time periods within the option period, which will limit the number of options that may be exercised. Each stock option is exercisable into one common share of the Corporation at the price specified in the terms of the option.

The fair value of the options was based on the Black Scholes option-pricing model. The following assumptions were used to value them:

	Fiscal 2013
Number of incentive stock options	150,000
Exercise price	\$ 0.10
Expected life	10 years
Weighted average risk-free interest rate	2.08%
Weighted average expected volatility	25.0%
Dividend yield	0.0%
Forfeiture rate	0.0%
Fair value	\$0.002

The stock options activity is summarized below:

	Number	Weighted Average Exercise Price
Balance, September 1, 2012	817,080	\$ 0.10
Granted	150,000	0.10
Exercised	---	N/A
Cancelled	(130,000)	N/A
Forfeited	---	0.10
Balance, August 31, 2013 and November 30, 2013	<u>837,080</u>	<u>\$ 0.10</u>

SURREY CAPITAL CORP.

11. Stock Options and Warrants - continued

The following table summarizes the weighted average exercise price and the weighted average remaining contractual life of the options outstanding and exercisable as at November 30, 2013.

Exercise Price	Options Outstanding	Expiry Date	Outstanding		Exercisable	
			Weighted Average Remaining Life	Weighted Average Price	Quantity	Weighted Average Price
\$ 0.10	74,280	January 27, 2016	2.2 years	\$ 0.10	74,280	\$ 0.10
0.10	612,800	January 27, 2021	7.2 Years	0.10	612,800	0.10
0.10	150,000	June 3, 2023	9.5 Years	0.10	150,000	0.10

The fair value of the warrants was based on the Black Scholes option-pricing model. The following assumptions were used to value them:

	Fiscal 2013
Number of agent warrants	748,000
Exercise price	\$ 0.10
Expected life	1.5 years
Weighted average risk-free interest rate	1.8%
Weighted average expected volatility	12.5%
Dividend yield	0.0%
Forfeiture rate	0.0%
Fair value	\$0.000

The warrants activity is summarized below:

	Number	Weighted Average Exercise Price
Balance, September 1, 2012	492,800	\$ 0.10
Issued	748,000	0.10
Exercised	---	N/A
Expired	(492,800)	0.10
Forfeited	---	N/A
Balance, August 31, 2013 and November 30, 2013	748,000	\$ 0.10

The warrants that are issued and outstanding as at November 30, 2012 are as follows:

<u>Number of Warrants</u>	<u>Type</u>	<u>Issuance Date</u>	<u>Expiry Date</u>
748,000	Warrant	March 13, 2013	August 31, 2014

12. Related Party Transactions

Amounts due from and to the related parties, are a result of transactions with entities controlled by shareholders, officers or directors of the Corporation. These amounts are non-interest bearing, unsecured and not subject to specific terms of repayment unless stated.

During the period ended November 30, 2013, the Corporation recorded \$8,250 (2012 - \$5,250) in respect of the reimbursement of expenditures incurred on behalf of the Corporation by the directors of the Corporation or a company controlled by an officer of the Corporation with regards to office expenses, premises, consulting services, regulatory fees, and project analysis costs.

During the year ended August 31, 2013, the Corporation closed concurrently with its Qualifying Transaction a Convertible Debenture (Note 8) for \$74,800, of which \$57,800 was subscribed by related parties.

During the period ended November 30, 2013, the Corporation paid \$1,729 (2012 - \$Nil) in interest to related parties.

As of November 30, 2013, \$Nil (2012 - \$Nil) was due to a related party is included in accounts payables and accrued liabilities.

These transactions are in the normal course of operations and have been measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

13. Contingency

From time to time, the Corporation may be exposed to claims and legal actions in the normal course of business, some of which may be initiated by the Corporation. As at November 30, 2013, no issues were outstanding.

14. General and Administrative Expenses

For the period from September 1 To November 30,	2013	2012
Bank charges	\$ 25	\$ 25
Office expenses (Note 12)	2,670	2,670
Professional fees (Note 12)	4,000	2,60
Regulatory and filing fees	5,531	2,215
Premises (Note 12)	2,250	2,250
Telecommunication (Note 12)	165	330
	\$ 14,641	\$ 10,090

15. Business Development Expenses

For the period from September 1 To November 30,	2013	2012
Meals & entertainment	\$ ---	\$ ---

(All Amounts are in Canadian Dollars)

16. Risk Management

The Corporation manages its common shares, stock options, warrants and accumulated deficit as capital. The Corporation's objectives when managing capital are to safeguard the Corporation's ability to continue and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk, as there are no external restrictions on it.

The Corporation manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Corporation may attempt to issue new shares, issue new debt, acquire or dispose of assets in order to adjust the amount of cash on its balance sheet.

The Corporation's capital structure is as follows:

	November 30, 2013	August 31, 2013
Share capital	\$ 506,386	\$ 506,386
Contributed surplus – general	6,626	6,626
Contributed surplus – incentive stock options	19,012	19,012
Contributed surplus – warrants	7,618	7,618
Accumulated deficit	(179,710)	(162,916)
	<u>\$ 359,932</u>	<u>\$ 376,726</u>

In order to facilitate the management of its capital requirements, the Corporation may prepare expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

In order to maximize ongoing efforts, the Corporation does not pay out dividends. The Corporation's investment policy is to invest its short-term excess cash in highly liquid short-term interest-bearing investments with maturities of 365 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

Management reviews its approach on an ongoing basis and believes that this approach, given the relative size of the Corporation, is reasonable.

17. Financial Instruments

Risk Management

The Corporation does not use hedging transactions to manage risk. As a part of the overall operation of the Corporation, management takes steps to avoid undue concentrations of risk. The Corporation manages risk as follows:

Liquidity Risk

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due. The ability to do this relies on the Corporation raising capital through equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs. As at November 30, 2013, the Corporation had \$403,007 in cash and cash equivalents to settle \$82,821 of current liabilities (August 31, 2013 - \$410,067 cash and cash equivalent to settle \$78,359 of current liabilities).

18. Financial Instruments - continued

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates may have an effect on the cash flows associated with some financial instruments, known as interest rate cash flow risk, or on the fair value of other financial instruments, known as interest rate price risk.

The Corporation does not trade in financial instruments and is not exposed to significant interest rate price risk as at November 30, 2013 and 2012.

Market Risk

Market risk is the risk that changes in market prices will have an effect on future cash flows associated with financial instruments. Market risk comprises three types of risk: credit risk, currency risk and other price risk.

Credit Risk

Credit risk arises from the possibility that debtors may be unable to fulfill their commitments. For a financial asset, this is typically the gross carrying amount, net of any amounts offset and any impairment losses. Balances of cash and cash equivalents in financial institutions may at times exceed the government-insured limits.

As of the date of these financial statements the Corporation's only debtor is the government of Canada for Harmonized sales tax ("HST") receivable and therefore the Corporation does not believe it is currently exposed to any significant credit risk as at November 30, 2013 and 2012.

Currency Risk

Currency risk is the risk that changes in foreign exchange rates may have an effect on future cash flows associated with financial instruments. The Corporation does not have any material transactions denominated in foreign currency and is not exposed to foreign currency risk as at November 30, 2013 and 2012.

Other Price Risk

Other price risk is the risk that changes in market prices, including commodity or equity prices, will have an effect on future cash flows associated with financial instruments. The cash flows associated with financial instruments of the Corporation are not exposed to other price risk as at November 30, 2013 and 2012.

Fair Values

Financial instruments include cash and cash equivalents, interest receivables, and accounts payable and accrued liabilities. The fair values of these financial instruments approximate their carrying value due to the relatively short-term maturity of these instruments. The Corporation classifies its cash and cash equivalents as financial assets at fair value through profit and loss, interest receivables as loans and receivables and its accounts payable and accrued liabilities as other financial liabilities.
