FOR IMMEDIATE RELEASE

SUBSCRIBE TECHNOLOGIES INTEGRATING 100% OWNED CLOUD STORAGE SERVICE "FILEQ" INTO GINGERLY BUSINESS MANAGEMENT **PLATFORM**

Vancouver, British Columbia, Canada – November 29, 2018 – Subscribe Technologies Inc. (CSE: SAAS, OTCQB: SRBBF, Frankfurt: 6GQ) ("Subscribe" or "the Company") is pleased to announce it has begun the initial phase of integrating FileQ.com, a 100% owned and operated electronic file sharing and file storage service with the Company's flagship Gingerly App Marketplace and business management dashboard, set to launch imminently.

Gingerly is a cloud-based business management suite and dashboard offering a growing portfolio of a-la-carte business management applications for freelancers, solopreneurs, and small, and medium sized enterprises (SMEs).

FileQ.com enables users to access content securely in real time using nearly any mobile device and operating system, including iOS, Android and Windows while offering an elegant, intuitive, and simple interface. Once integrated with Gingerly, our users will have team based and collaborative access to all of their project documents and multimedia files.

According to American market research firm International Data Corporation (IDC), from 2005 to 2020, the volume of digital information will grow by a factor of 300, increasing demand for cost-efficient and scalable storage and content management solutions. This explosion of content and data continues to grow significantly as users and organizations increase their usage of data-rich applications and access content from multiple devices with Internet connectivity. As a result, technology research and advisory firm Gartner, Inc. expects total cloud spending to increase from \$132 billion worldwide in 2013 to \$244 billion in 2017.

President and CEO Mr. Paul Dickson states, "Gingerly is now growing into a one-stop-shop for running your small or medium sized business online and we are pleased to be moving swiftly through many product and development milestones, as we begin to bring this competitive new platform to life."

About Software as a Service (SaaS)

Software as a Service is a fast emerging, cloud based business model allowing companies to offer services worldwide, and grow their user base exponentially, with scale, and modest relative additional operating costs to do same.

About Gingerly
