VPN Technologies Introduces VPN Logix Android App and LOGIX Token

Vancouver, British Columbia, Canada – September 23, 2020 – VPN Technologies Inc. (CSE: VPN, OTCQB: SRBBF, Frankfurt: 6GQ1) (“**VPN Tech**” or the “**Company**”) is pleased to introduce a new Virtual-Private-Network (VPN) mobile App; VPN Logix.

VPN Logix is an Android application enabling instant VPN protection with no technical knowledge or configuration required.

A VPN gives you online privacy and anonymity by creating a private network from a public internet connection. VPNs mask your IP address, so your online activities are virtually untraceable. Most importantly, VPN services secure and encrypt your Internet connection to provide even greater privacy than a secured WiFi hotspot. Using a VPN adds a layer of protection when using public WiFi hot spots like Cafes, Airports and in public spaces.

VPN Logix is available as a free download in the Google Play Store and has in-app purchases for upgrading to Premium with prices starting at \$1.49 USD per month, which unlocks global high-speed servers and disables advertising.

In addition to VPN protection, VPN Logix has an integrated Web Browser enabling users to search privately as well as an integrated bandwidth testing feature to ensure a user is connected to the fastest server in the region.

To compliment the marketing initiatives planned for VPN Logix, the Company has created and launched a token on the TRON network with the symbol LOGIX.

Tron is a blockchain-based decentralized operating system much like Ethereum that aims to advance the decentralization of the Internet and its infrastructure. At its core, Tron is a smart contract platform that offers high throughput, high scalability, and high availability for all Decentralized Applications (DApps) in the TRON ecosystem. The Tron blockchain is built around the usability of its native token, Tron (TRX).

VPN Technologies Inc. did not conduct any variance of an Initial-Coin-Offering (ICO) or raise any capital while creating the LOGIX token and strictly intends to utilize the generated tokens for marketing purposes.

LOGIX tokens may be issued to incentivize new and existing users and may be redeemable for products, services, and upgrades.

VPN Technologies President and CEO Paul Dickson states “It was our goal to make a product that required little to no technical knowledge to setup and deploy, we certainly achieved that here. Moreover, VPN Logix and its accompanying token will be leveraged to build awareness around our other assets BladeVPN and GamerVPN.”.
