

KARIANA RESOURCES INC.

(An Exploration Stage Enterprise)

FINANCIAL STATEMENTS

Year Ended December 31, 2013

(Expressed in Canadian Dollars)

INDEPENDENT AUDITORS' REPORT

To the Shareholders of
Kariana Resources Inc.

We have audited the accompanying financial statements of Kariana Resources Inc., which comprise the statements of financial position as at December 31, 2013 and 2012, and the statements of comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these financial statements present fairly, in all material respects, the financial position of Kariana Resources Inc. as at December 31, 2013 and 2012, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which describes conditions and matters that indicate the existence of a material uncertainty that may cast significant doubt about Kariana Resources Inc.'s ability to continue as a going concern.

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

1. NATURE AND CONTINUANCE OF OPERATIONS

The Company was incorporated on September 14, 2010 pursuant to the provision of the *Business Corporations Act* (British Columbia). The Company is engaged primarily in the business of evaluating, acquiring and exploring natural resource properties. The Company's head office is located at 1980 – 1075 West Georgia Street, Vancouver, British Columbia, V6E 3C9, Canada. The Company's shares commenced trading on the Canadian Securities Exchange (formerly Canadian National Stock Exchange) under the trading symbol "KAA" on August 17, 2011.

The financial information is presented in Canadian Dollars, which is the functional currency of the Company.

The amounts shown as exploration and evaluation assets represent net costs to date, less any amounts amortized and/or written off, and do not necessarily represent present or future values. The recoverability of these amounts and any additional amounts required to place these assets into commercial production are dependent upon certain factors. These factors include the existence of ore deposits sufficient for commercial production and the Company's ability to obtain the required additional financing necessary to develop these assets. These uncertainties may cast significant doubt as to the company's ability to continue as a going concern.

The Company has working capital as at December 31, 2013 of \$68,316 and an accumulated deficit of \$1,056,789. These financial statements have been prepared under the assumptions of a going-concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business.

Failure to arrange adequate financing on acceptable terms and/or achieve profitability may have an adverse effect on the financial position, results of operations, cash flows and prospects of the Company. These financial statements do not give effect to adjustments to assets or liabilities that would be necessary should the Company be unable to continue as a going-concern.

2. SIGNIFICANT ACCOUNTING POLICIES**Statement of compliance**

The Company's annual financial statements for the year ending December 31, 2013, including comparatives are presented in accordance with IFRS.

Basis of presentation

These financial statements have been prepared on a historical cost basis except for financial instruments classified as financial instruments at fair value through profit or loss that have been measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting.

Transactions in foreign currencies are initially recorded at the functional currency rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate of exchange in effect at the end of each reporting period.

These financial statements, including comparatives, have been prepared on the basis of IFRS standards that are published at the time of preparation and that are effective or available on December 31, 2013.

Foreign currencies

The Company's reporting and functional currency is the Canadian dollar as this is the principal currency of the economic environment in which the Company operates.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D...)**Financing costs**

The costs related to equity transactions are deferred until the closing of the equity transactions. These costs are accounted for as a deduction from equity. Transaction costs of abandoned equity transactions are expensed in the statement of comprehensive loss.

Short-term investment

Short-term investment, which is fixed term deposit held at the bank with a maturity of more than three months and less than twelve months at the time of issuance, is recorded at fair value. As at December 31, 2013, the Company has two short-term investments totalling to \$54,500 of principal and \$60 of interest due on July 11, 2014 with an annual yield of prime minus 1.9%, and \$481 of interest due on January 31, 2014 with an annual yield of prime minus 1.8%.

Exploration and evaluation assets

The Company's exploration and evaluation assets are intangible assets relating to mineral rights acquired and exploration and evaluation expenditures capitalized in respect of projects that are at the exploration/pre-development stage.

No amortization charge is recognized in respect of exploration and evaluation assets. These assets are transferred to mine development assets, after testing for impairment, upon the commencement of mine development.

Exploration and evaluation expenditure in the relevant area of interest comprises costs which are directly attributable to:

- Acquisition;
- Surveying, geological, geochemical and geophysical;
- Exploratory drilling;
- Land maintenance;
- Sampling; and
- Assessing technical feasibility and commercial viability.

Exploration and evaluation expenditure related to an area of interest where the Company has tenure are capitalized as intangible assets and are recorded at cost less impairment.

Exploration and evaluation expenditure also includes the costs incurred in acquiring mineral rights, the entry premiums paid to gain access to areas of interest and amounts payable to third parties to acquire interests in existing projects. Capitalized costs, including general and administrative costs, are only allocated to the extent that those costs can be related directly to operational activities in the relevant area of interest.

All capitalized exploration and evaluation expenditure is assessed for impairment for each reporting period and is impaired if facts and circumstances indicate that impairment may exist. In circumstances where a property is abandoned, the cumulative capitalized costs relating to the property are written off in the period.

Decommissioning and rehabilitation liabilities

The Company recognizes the fair value of a decommissioning and restoration liability the year in which it is incurred when a reasonable estimate of fair value can be made. The carrying amount of the related long-lived asset is increased by the same amount as the liability.

Changes in the decommissioning and restoration liability due to the passage of time will be measured by applying an interest method of allocation. The amount will be recognized as an increase in the liability and an accretion expense in the statement of operations. Changes resulting from revisions to the timing or the amount of the original estimate of

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D...)

Decommissioning and rehabilitation liabilities (Cont'd...)

undiscounted cash flows are recognized as an increase or a decrease to the carrying amount of the liability and the related long-lived asset.

The Company did not have any significant decommissioning and restoration obligations.

Share-based payments

The share option plan allows Company employees (including directors and senior executives) and consultants to acquire shares of the Company. The fair value of options granted is recognized as an employee or consultant expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee. Share-based payments also include the issuance of common shares.

The costs of equity-settled transactions are recognized, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ("the vesting date"). The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the Company's best estimate of the number of equity instruments that will ultimately vest. The profit or loss charge or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period and the corresponding amount is represented in share option reserve or share capital. No expense is recognized for awards that do not ultimately vest.

At the time when the share options are exercised, the amount previously recognized in reserves is transferred to share capital. When vested options are forfeited or are not exercised at the expiry date the amount previously recognized in reserves is transferred to accumulated losses.

Where the terms of an equity-settled award are modified, the minimum expense recognized is the expense as if the terms had not been modified. An additional expense is recognized for any modification which increases the total fair value of the share-based payments arrangement, or is otherwise beneficial to the employee as measured at the date of modification.

In situations where equity instruments are issued and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payments. Otherwise, share-based payments are measured at the fair value of goods or services received.

Comprehensive loss

Comprehensive loss is defined as the change in equity (net assets) from transactions and other events from non-owner sources. Other comprehensive income is defined as revenues, expenses, gains and losses are recognized in comprehensive income, but excluded from net income. This would include holding gains and losses from financial instruments classified as available-for-sale. The Company does not have any items representing comprehensive income or loss.

Earnings (loss) per share

Basic earnings (loss) per share is computed by dividing net earnings (loss) available to common shareholders by the weighted average number of outstanding common shares for the period. In computing diluted earnings per share, an adjustment is made for the dilutive effect of the exercise of stock options and warrants. The number of additional shares is calculated by assuming that outstanding stock options and warrants are exercised and that the proceeds from such exercises were used to acquire common shares at the average market price during the reporting periods. In periods where a net loss is reported outstanding options and warrants are excluded from the calculation of diluted loss per share, as

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D...)

Earnings (loss) per share (Cont'd...)

they are anti-dilutive. Diluted loss per share is equal to the basic loss per share as net losses were reported during the periods presented.

Taxation

(a) Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the end of each reporting period.

(b) Deferred income tax

Deferred income tax is provided for based on temporary differences, at the end of each reporting period, between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carry forward or unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at the end of each reporting period and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of each reporting period.

Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of comprehensive income.

Deferred income tax assets and deferred income tax liabilities are offset if, and only if, a legally enforceable right exists to set off current tax assets against current tax liabilities and deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend to either settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax assets or liabilities are expected to be settled or recovered.

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D...)

Financial instruments – recognition and measurement

All financial assets and financial liabilities are initially recorded at fair value and designated upon inception into one of the following categories: held-to-maturity, available-for-sale, loans and receivables or at fair value through profit or loss (“FVTPL”).

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through profit and loss. Available-for-sale instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income. Held-to-maturity instruments, loans and receivables and financial liabilities not at fair value through profit and loss are measured at amortized cost using the effective interest rate method.

The Company has implemented the following classifications for its financial instruments:

- a) Cash has been classified as FVTPL;
- b) Short-term investments have been classified as FVTPL;
- c) Receivables have been classified as loans and receivables; and
- d) Accounts payable and accrued liabilities have been classified as financial liabilities not at fair value through profit and loss.

Impairment of financial assets

The Company assesses at the end of each reporting period whether a financial asset is impaired.

If there is objective evidence that an impairment loss on assets carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows discounted at the financial asset’s original effective interest rate. The carrying amount of the asset is then reduced by the amount of the impairment. The amount of the loss is recognized in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed to the extent that the carrying value of the asset does not exceed what the amortized cost would have been had the impairment not been recognized. Any subsequent reversal of an impairment loss is recognized in profit or loss.

In relation to trade and other receivables, a provision for impairment is made and an impairment loss is recognized in profit and loss when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Company will not be able to collect all of the amounts due under the original terms of the invoice. The carrying amount of the receivable is reduced through use of an allowance account. Impaired debts are written off against the allowance account when they are assessed as uncollectible.

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is an indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the assets belong.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of operations.

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D...)**Impairment of financial assets (Cont'd...)**

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, however the increased carrying amount cannot exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years.

Related party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control, related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Significant accounting judgements and estimates

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. Financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both the current and future periods.

New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the December 31, 2013 reporting period:

(a) Amendment to IAS 1, Presentation of Financial Statements

The amendments to IAS 1 revised the presentation of other comprehensive income (OCI). Separate subtotals are required for items which may subsequently be recycled through profit or loss and items that will not be recycled through profit or loss. The Company has updated the presentation of OCI on the face of the Statement of Comprehensive Income.

(b) IFRS 13, Fair Value Measurements

IFRS 13 aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements, which are largely aligned between IFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRSs.

The adoption of IFRS 13 by the Company has had no material impact. The fair value of the available-for-sale investment has been determined directly by reference to published price quotations in an active market. Prior to adoption of IFRS 13 the Company measured the available for sale investment on the same basis.

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial StatementsFor the Year Ended December 31, 2013

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D...)**New accounting judgements and estimates (Cont'd...)**

In addition, the following new or amended standards and interpretations that are mandatory for 2013 annual periods have not had a material impact on the Company:

- IFRS 7 Financial Instruments: Disclosures: Amendments – Offsetting Financial Assets and Financial Liabilities
- IFRS 10 Consolidated Financial Statements
- IFRS 11 Joint Arrangements
- IFRS 12 Disclosures of Interests in Other Entities
- IAS 19 Employee Benefits (Amendments)
- IFRIC 20 Stripping Costs in the Production Phases of a Surface Mine

3. EXPLORATION AND EVALUATION ASSETS**South Baird Property, Ontario, Canada**

	\$
Balance December 31, 2011	103,145
Acquisition Costs	20,000
Field expenses and others	2,304
Geological consulting	12,736
Report and assays	208
Balance December 31, 2012	138,393
Alteration study	9,600
Property write-off during the period	(147,993)
Balance December 31, 2013	-

On September 21, 2010, the Company signed an option agreement (the “Option Agreement”) with Perry Vern English, for and on behalf of Rubicon Minerals Corporation (the “Optionor”) to acquire an undivided 100% interest in the South Baird Property (the “South Baird Property”), subject to a 2% net smelter return (“NSR”) to the Optionor, with an option buyout of 50% of the NSR for \$1,000,000 upon or prior to the commencement of commercial production. The South Baird Property is located in the District of Red Lake Mining in the province of Ontario.

The Company entered into a finder’s fee agreement dated November 25, 2010 in connection with the acquisition of the South Baird Property. The Company paid finder’s fee in cash of \$25,000 and issued 18,750 common shares on December 23, 2010.

Pursuant to the Option Agreement, the Company issued 25,000 common shares at \$0.80 per share to the Optionor on August 17, 2011.

On July 8, 2013, the Company terminated the Option Agreement. The Company wrote off all the related exploration and evaluation assets expenses of the South Baird Property.

4. CAPITAL AND RESERVES**A. Common Shares**

Authorized: Unlimited number of common voting shares without nominal or par value

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

4. CAPITAL AND RESERVES (CONT'D...)**B. Issued share capital**

As at December 31, 2013, there were 3,006,250 common shares issued and outstanding (December 31, 2012 – 3,006,250).

- i. On February 28, 2012, the Company issued 125,000 common shares of the Company at a value of \$0.78 per share, for a total value of \$97,500, to a former officer of the Company as a share-based payment towards a signing bonus.
- ii. On January 27, 2014, the Company effected a consolidation of its capital on the basis of four (4) existing common share for one (1) new common share. All shares and per share amounts for the fiscal year and earlier have been re- stated on post-consolidation basis.

C. Share purchase option compensation plan

The Company has adopted a Stock Option Plan (the “Plan”) pursuant to which options may be granted to directors, officers, employees and consultants of the Company. Under the terms of the Plan, the Company can issue a maximum of 10% of the issued and outstanding common shares at the time of the grant, and the exercise price of each option is equal to or above the market price of the common shares on the grant date. Options granted under the Plan including vesting and the term, are determined by, and at the discretion of, the Board of Directors.

The continuity of stock options for the year ended December 31, 2013 is as follows:

	December 31, 2013		December 31, 2012	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Options outstanding, beginning of the year	295,000	\$0.83	207,500	\$0.86
Granted	-	-	87,500	\$0.78
Cancelled	(137,500)	\$0.79	-	-
Options outstanding and exercisable, end of the year	157,500	\$0.87	295,000	\$0.83

The options outstanding and exercisable at December 31, 2013 are as follows:

Number Outstanding and Exercisable	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)
100,000	0.80	7.63
57,500	1.00	2.67
157,500	0.87	5.82

The weighted average fair value of the share options estimated using the Black-Scholes option pricing model, was \$Nil (2012 - \$0.58) per option, with a total fair value of \$Nil (2012 - \$50,889). The Company used the Black-Scholes option pricing model to estimate the fair value of the options at the grant date using the following weighted average assumptions:

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

4. CAPITAL AND RESERVES (CONT'D...)**C. Share purchase option compensation plan (Cont'd...)**

	2013	2012
Risk-free interest rate	-	1.41%
Dividend yield	-	-
Expected volatility	-	100.00%
Expected option life	-	5 years

The Black-Scholes option pricing model was developed for use in estimating the fair value of share options that have no vesting provisions and are fully transferable. Also, option-pricing models require the use of estimates and assumptions including the expected volatility. The Company uses expected volatility rates which are based upon the average volatility rates of other companies in the same industry, due to the Company's limited history. Changes in the underlying assumptions can materially affect the fair value estimates.

D. Share Purchase Warrants

The following table summarizes the continuity of share purchase warrants:

	December 31, 2013		December 31, 2012	
	Number of Warrants	Weighted Average Exercise Price	Number of Warrants	Weighted Average Exercise Price
Warrants outstanding, beginning of the year	75,000	\$0.80	75,000	\$0.80
Warrants expired during the year	(75,000)	\$0.80	-	-
Warrants outstanding, end of the year	-	-	75,000	\$0.80

E. Escrow shares

As at December 31, 2013, the Company had 218,738 common shares held in escrow (December 31, 2012 – 437,475).

5. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support its operations and business development. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company has not generated any revenues and cash flows since its inception; therefore, the Company is dependent on external financing to fund its future intended business plan. The capital structure of the Company currently consists of common shares. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements. Management reviews its capital management approach on a regular basis. The Company is not subject to externally imposed capital requirements.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

Notes to Financial Statements

For the Year Ended December 31, 2013

6. RELATED PARTY TRANSACTIONS

The aggregate value of transactions and outstanding balances relating to key management personnel and entities over which they have control or significant influence were as follows:

Services provided by:	Year Ended December 31,		
	2013	2012	
Baron Global Financial Canada Ltd.	a	\$120,270	\$180,855
Compensation to key management	b	\$35,000	-
Littlehampton Capital Corp.	c	\$35,000	-
Pashleth Investment Ltd.	d	\$22,500	\$75,000
Share-based payments		-	\$148,389

a) Baron Global Financial Canada Ltd. (“Baron”) is related by way of a director, who is also the managing director of Baron.

b) On July 1, 2013, the Company entered into a consulting agreement with a former director of the Company for strategic planning services. The agreement began on July 1, 2013 and was terminated on December 9, 2013 when the director resigned as a director of the Company. The fee was \$5,000 per month for 6 months. The Company also paid \$5,000 to the former director as a signing bonus.

c) On July 1, 2013, the Company entered into a consulting agreement with Littlehampton Capital Corp. (“Littlehampton”), a company owned by the former CEO and director of the Company for strategic planning services. The agreement began on July 1, 2013 and was terminated on December 3, 2013 when the CEO and director resigned as the CEO and director of the Company. The fee was \$5,000 per month for 6 months. The Company also paid \$5,000 to Littlehampton as a signing bonus.

d) Pashleth Investment Ltd. (“Pashleth”) is owned by the former CEO and director of the Company. As of December 31, 2013, the former CEO and director forgave amounts owing of \$45,000 which has been recorded as a cost recovery.

Related Party Payable:

	Year Ended December 31,	
	2013	2012
Pashleth Investment Ltd.	-	\$ 22,500

7. DEFERRED INCOME TAX

The recovery of income taxes differs from the amounts obtained by applying statutory rates to the loss before provision for income taxes due to the following:

	Year Ended December 31, 2013	Year Ended December 31, 2012
	\$	\$
Combined federal and provincial statutory tax rate	25%	25%
Loss for the year before income taxes	(486,800)	(459,229)
Expected income tax recovery	125,000	115,000
Permanent differences	-	(13,000)
Change in statutory rates and other	5,000	-
Change in unrecognized deductible temporary differences	(130,000)	(102,000)
Tax expense	-	-

KARIANA RESOURCES INC.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

7. DEFERRED INCOME TAX (CONT'D...)

The significant components of deductible temporary differences and unused tax losses that have not been included on the statements of financial position are as follows:

	Year Ended December 31, 2013	Expiring through:	Year Ended December 31, 2012
	\$		\$
Share issuance costs	63,000	2037	94,000
Non-capital loss carry-forwards	972,000	2033	601,000
Exploration and evaluation asset	148,000	-	-
Investment tax credit	4,000	2033	-

The potential tax benefits related to the loss carry forwards and other temporary differences, the application of which may be restricted, have not been recognized in these financial statements as management does not consider it likely that such assets will be realized in the carry forward period.

8. FINANCIAL INSTRUMENTS

Classification of Financial Instruments:

(a) Fair Values

Assets measured at fair value on a recurring basis were presented on the Company's balance sheet as at December 31, 2013 as follows:

	Fair Value Measurements Using			Balance, December 31, 2013 \$	Balance, December 31, 2012 \$
	Quoted prices in active markets for identical instruments (Level 1) \$	Significant other observable inputs (Level 2) \$	Significant unobservable inputs (Level 3) \$		
Cash	1,140	-	-	1,140	347,959
Short-term investment	54,500			54,500	11,500

The fair values of other financial instruments, which include receivables, and accounts payable and accrued liabilities, approximate their carrying values due to the relatively short-term maturity of these instruments and loan payable.

(b) Credit risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash and short-term investment with high credit quality financial institutions. The carrying amount of financial assets represents the maximum credit exposure.

(Expressed in Canadian Dollars, unless stated otherwise)

(An Exploration Stage Enterprise)

Notes to Financial Statements

For the Year Ended December 31, 2013

8. FINANCIAL INSTRUMENTS (CONT'D...)

(c) Liquidity risk

Liquidity risk is managed by ensuring sufficient financial resources are available to meet obligations associated with financial liabilities. The Company manages liquidity risk through the management of its capital structure (Note 5).

(d) Interest rate risk

Interest rate risk is the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has interest-bearing assets in relation to cash at banks and GIC carried at floating interest rates with reference to the market. The Company's operating cash flows are substantially independent of changes in market interest rates. The Company has not used any financial instrument to hedge potential fluctuations in interest rates. The exposure to interest rates for the Company is considered minimal. The Company has no interest bearing borrowings.

The policies to manage interest rate risk have been followed by the Company during the prior year and are considered to be effective.

(e) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

9. SUBSEQUENT EVENTS

On January 13, 2014, the Board of Directors of the Company approved a consolidation of the Company's issued and outstanding common shares on the bases of four (4) pre-consolidation common shares for one (1) post-consolidated common share (the "Consolidation"). The Company had 12,025,000 issued and outstanding common shares before the Consolidation, and the Company now has 3,006,250 common shares issued and outstanding following the Consolidation. Outstanding stock options and warrants were similarly adjusted by the consolidation ratio.

The consolidated common shares commenced trading on the Canadian Securities Exchange on Monday, January 27, 2014 under current name "Kariana Resources Inc.", and under current stock symbol "KAA".
