About Core One Labs Inc.

Core One Labs Inc. is a research and technology company focused in life sciences and on bringing psychedelic medicines to market through novel delivery systems and

psychedelic assisted psychotherapy. The Company has developed a patent pending thin film oral strip (the “technology”) which dissolves instantly when placed in the mouth and delivers organic molecules in precise quantities to the bloodstream, maintaining excellent bioavailability. With this technology, the Company intends to further develop its IP technology to focus on delivering psychedelic molecules with an initial focus on psilocybin. Core One also holds an interest in walk-in medical clinics which maintain a database of over 200,000 patients combined. Through research and development in these clinics, including the integration of its intellectual property related to psychedelic treatments and novel drug therapies, the Company intends to work towards regulatory approval for research that advances psychedelic-derived treatments for mental health disorders.
