

LITELINK ANNOUNCES INLINE NURSERIES AS THE FIRST CUSTOMER FOR 1SHIFT LOGISTICS PLATFORM TRIALS

VANCOUVER, BC - December 11, 2018 - [LiteLink Technologies Inc.](#) ("LiteLink"), a key player in Artificial Intelligence and next-generation technology within the Enterprise Applications sector, is pleased to announce the onboarding of Inline Nurseries (2010) Inc. ("Inline") as the first pilot program trial customer for the [1SHIFT Logistics Platform](#).

The pilot program is invaluable as it will give LiteLink the opportunity to validate the end-to-end 1SHIFT platform with real customer data while providing an insight into how well the platform will operate in a live environment. LiteLink will be able to collect feedback, resolve software bugs, and include any high-value additional features before its commercial launch scheduled for March 2019.

LiteLink plans to conduct 1SHIFT Platform trials with up to ten customers, with Inline being the first trial customer from December 2018 through to the end of the first quarter of 2019.

"Inline is honoured to be a part of the 1SHIFT Logistics pilot program", said Co-Owner & Logistics Executive Mr. Ron Maljaars. "We see major benefits for small to medium-sized shippers like Inline Nurseries using this technology. The ability to manage urgent loads, get the best price on the market with the 1SHIFT marketplace, and track both self-owned and third-party trucks for timely delivery is revolutionary. When dealing with live plants; visibility and proactive coordination is key to success, and we see that the 1SHIFT Platform can achieve this for us."

Over the last 30 years, Inline has focused on providing a diverse assortment of plant material to national retailers and garden centres across North America. The Inline company policy is closely aligned to that of 1SHIFT's, as they focus on providing fast, dependable and hassle-free shipping to anywhere in North America. The 1SHIFT platform has been designed to provide these features and more, as users of the 1SHIFT platform will be able to make tactical and strategic decisions based on accurate, real-time data to stay ahead of any competition.

"Trials of the 1SHIFT platform are an exceptionally important step for our business in attracting large-scale clients and we are thrilled to have Inline Nurseries onboard as our first official pilot tester for the 1SHIFT platform," commented LiteLink CEO Ashik Karim.

About LiteLink Technologies Inc.

LiteLink Technologies provides enterprise level solutions utilizing artificial intelligence and predictive analytics to solve the logistics industry's fragmented and outdated technology problem. LiteLink is creating a unified communications platform for tracking shipments, disputes, and errors to increase efficiency and reducing costs for 3PLs, carriers and shippers.
