First Phase of 2015 Exploration Program to Commence on the Arlington Property

Explorex Resources Inc (“**Explorex**” or the “**Company**”) is pleased to announce plans for a first phase exploration program on the company’s 100% owned Arlington Property (the “**Property**”). The Property is located 17 kilometers north of the community of Beaverdell and 67 kilometers south of the City of Kelowna, B.C. along British Columbia Provincial Highway 33 within the Greenwood Mining Division.

The 2015 exploration program is designed to evaluate ten known structurally controlled Polymetallic Ag-Cu-Pb-Zn +/- Au Minfile Occurrences located on the property. The field program will consist of a geological mapping and sampling program of the mineralized occurrences followed by magnetic and VLF geophysical surveys and a reconnaissance soil sampling program along the projected strike of the mineralized structures.

The Arlington Property covers 586.46ha of land, is road accessible and is centered on Hall Creek at the south end of Arlington Lakes and covers ten (10) mineral showings listed in the BCMEM Minfile. The bulk of the historical work on the claims date back to the early part of the century while the Beaverdell – Mt Wallace mining camp was developing and during the construction of the Kettle Valley Railroad. Evidence of this early exploration activity is noted by the presence of numerous overgrown adits, shafts, trenches and pits scattered throughout the property. A 1973 channel sample of strongly silicified and epidotized chlorite hornblende schist returned 63.0gm/t Ag and 0.92% Cu over 0.6m while a grab sample from the showing in 1987 returned up to 1.61% Cu, 0.08%Pb, 0.02%Zn and 85.3g/t Ag.

The Arlington property is located 14km north of the historic Beaverdell Silver Mine which is one of the oldest operating mines in Canada with near continuous production between 1913 and 1991. Over this period 1.3 million tons of ore were mined producing nearly 34.6 million ounces of silver along with lead, zinc, cadmium, copper and gold.

The Arlington property exploration program is being conducted under the supervision of Qualified Person Rick Kemp, P.Geo.
