

Cybeats Highlights Impactful Presence at RSA: The World's Premier Cybersecurity Conference

TORONTO, May 16, 2023 /CNW/ - **Cybeats Technologies Corp. ("Cybeats" or the "Company")** (CSE: CYBT) (OTCQB: CYBCF) is pleased to share highlights from its successful participation at the recent RSA Conference, the leading global event in cybersecurity.

The Company successfully hosted its 2nd annual 'SBOM Meetup,' which garnered a sold-out crowd and a notable increase of approximately 40% in attendance compared to the previous year's event. In addition, Cybeats' CTO, Dmitry Raidman, and Johnson & Johnson's cybersecurity expert, Bob Haack, collaborated to deliver a compelling fireside chat during the conference. The discussion centered around the urgent need to fortify software supply chain security, and the critical role of Software Bill of Materials (SBOM). This insightful fireside chat took place at Veracode's Booth on the exhibition floor.¹

"At our annual SBOM Meetup, we emphasized SBOM solutions' relevance across multiple industries and engaged with established and potential clients from the government, healthcare, industrial, transportation, and software sectors. Following the previous RSA engagement's success, where we secured significant product leads and sales, we expect increased demand after this year's conference as well. In response to escalating market needs driven by regulatory entities like CISA, NIST, FDA, and the EU, Cybeats is strategically positioned to deliver innovative solutions to meet these evolving challenges," said **Bob Lyle, CRO, Cybeats**.

2nd Annual 'SBOM Meetup' Hosted by Cybeats

Cybeats' second annual 'SBOM Meetup' in San Francisco alongside the RSA Conference invited cyber security professionals and any interested industry parties. The event included an engaging panel discussion on SBOM regulations led by Allan Friedman of CISA, and including esteemed panelists from Microsoft, Intel, Claroty, and Veracode. The event was co-sponsored by Cybeats' partner, Veracode.²

'It Takes a Village to Reduce Software Risk' - Roundtable by Veracode³

During the RSA, Veracode hosted an interactive panel discussion on managing cybersecurity compliance mandates and enabling teams to collaborate on implementing solutions. This event featured Allan Friedman, who leads SBOM initiatives for CISA.

'The World on SBOMs' - Linux Foundation⁴

Kate Stewart, Linux Foundation's VP of Dependable Embedded Systems, and Chris Blask⁵, cybersecurity expert and Chief Evangelist for Cybeats, explored the significance of software supply chain transparency through SBOMs. They addressed the critical need for system-level transparency in risk management and the benefits of effective SBOM implementation, such as improved IP control, reduced operational costs, and stronger business relationships.
