Greg Burns CEO, commented “The company is very excited in its latest option & welcomes the opportunity to align itself with a progressive company such as Golden Predator. We look forward to defining the next steps on this exceptional project”

The Company is excited to option & advance exploration of the Grew Creek Project in close association with Yukon focused Golden Predator who have a significant database on the project and well developed relationships with many Yukon First Nation groups. Golden Predator is well funded and focused on developing its high grade 3 Aces project.

About the Grew Creek Property:

The near surface Carlos zone is the largest known area of gold mineralization on the property measuring 300 m along strike, 100 m wide and open at depth below 400 m and is defined by core and RC drilling. The Grew Creek Property is located adjacent to the Robert Campbell highway between Faro and Ross River and consists of 670 contiguous quartz claims totaling approximately 110 km² which are owned 100% by Golden Predator (subject to a 4% NSR). The property lies within the Tintina Gold Belt, an extensive regional system of dextral strike-slip faults which host multiple gold prospects and mines.

The Tertiary stockwork epithermal gold mineralization at Grew Creek is hosted in Eocene felsic volcanics within a 4 km wide grabben. Stratigraphy consists of silicic-pyroclastics and epiclastic sediments bound by mafic lavas and overlain by Pleistocene gravels. Mineralization at the Carlos zone occurs within silicic/phyllic altered volcanoclastics along a steeply dipping structural zone as electrum with lesser eugenite in banded epithermal quartz-carbonate-Kspar veins.

2.5 km southeast of the Carlos Zone, chalcedonic coliform quartz, geochemical path finders and trace gold mineralization have been found within epiclastic rocks at the underexplored Knoll Zone.

The property was staked in 1983 by Al Carlos and has seen geological mapping, geophysics, geochemical sampling, trench and over 290 drill holes with a composite length of more than 57,000m.

Agreement Terms

Disclaimer for Forward-Looking Information

Historical data for the prospects were performed under supervision of a Professional Engineer or a geologist, and believed to be of good quality, with drill core and underground sampling results from fire assay analyses by B.C. Certified Assayers. However, under NI43-101 policy historical information included in this release has not been verified by a QP, and as such cannot be relied upon and must be treated as historical in nature.

This press release contains "forward-looking information" within the meaning of applicable securities laws, including statements that address capital costs, recovery, grade, and timing of work or plans at the Company's mineral projects. Forward-looking information may be, but not always, identified by the use of words such as "seek", "anticipate", "plan", "planned", "continue", "expect", "thought to", "project", "predict", "potential", "targeting", "intends", "believe", "opportunity", "further" and others, or which describes a goal or action, event or result such as "may", "should", "could", "would", "might" or "will" be undertaken, occur or achieved. Forward-looking information in this press release includes, but is not limited to, statements regarding expectations of management regarding the acquisition of the Property and includes that address future mineral production, reserve potential, potential size or scale of a mineralized zone, potential expansion of mineralization, potential type(s) of mining, potential grades as well as to the Company's ability to fund ongoing expenditure, or assumptions about future metal or mineral prices, currency exchange rates, metallurgical recoveries and grades, favourable operating conditions, access, political stability, obtaining or renewal of existing or required mineral titles, licenses and permits, labour stability, market conditions, availability of equipment, accuracy of any mineral resources, anticipated costs and expenditures. Assumptions may be based on factors and events that are not within the control of the Company and there is no assurance they will prove to be correct. Such forward-looking information involves known and unknown risks, which may cause the actual results to materially differ, and/or any future results expressed or implied by such forward-looking information. Although the Company believes that the expectations reflected in the forward-looking information are reasonable, there can be no assurance that such expectations will prove to be correct. Such forward-looking information is subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements including, without limitation, the risks that the Company may not have the funds necessary to make its payments pursuant to the Agreement, that the CSE may not approve the transaction, and other factors beyond the control of the Company.
