QUANTUM BATTERY METALS BEGINS COMPREHENSIVE WORK PROGRAM FOR KELSO AND ALBANEL PROPERTY

Vancouver, British Columbia – Quantum Battery Metals Corp. (CSE: QBAT; OTC: BRVVF; FRA: 23B) (“Quantum” or the “Company”) is pleased to announce a summer work program targeting the Kelso and Albanel Lithium properties (collectively the “Properties”), located in James Bay, Quebec, Canada known for its high-quality low impurity spodumene.

The Company has organized and undergone a preliminary satellite survey and is currently awaiting final results of the survey. Following the results of the survey the company will begin budgeting its summer work program.

The proposed summer program will be conducted in three stages. Phase 1 will consist of helicopter supported prospecting further identifying key areas that are shown on the satellite survey.

Phase 2 will build on satellite survey results and Phase 1 results in which areas show potential. The Phase 2 program will aim to identify soil geochemical anomalies with trenching, infill geochemical sampling and ground geophysics. Additionally, a more extensive geologic mapping program will be implemented throughout the project areas.

A Phase 3 budget and program will be confirmed based on, and subject to, results from the Phase 1 exploration which may include additional ground-based exploration and/or drilling.

The Phase 1 program is planned to commence in early summer upon permit approval. Field crew are scheduled to start early June but may initiate work programs earlier pending snow melt.

Forward-Looking Information This news release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address events or developments that Quantum Battery Metals Corp. (the "Company") expects to occur, are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by applicable securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.
