

NORTHERN IRON CORP. APPOINTS CORPORATE SECRETARY

VANCOUVER, BRITISH COLUMBIA, CANADA – October 01, 2015.

Northern Iron Corp. ("Northern Iron" or the "Company") (TSX-V: NFE) (FRANKFURT: N8I) is pleased to announce that it has appointed Tom Klaimanee as Corporate Secretary.

Mr. Klaimanee has been working with the Company since 2010 and has a wealth of international and management experience. He provides administrative services to private and publically listed companies.

Mr. Klaimanee holds a Master of Business Administration from the University of Southern Mississippi, U.S.A.

About Northern Iron Corp.

Northern Iron is the owner of five iron (magnetite) properties in the Red Lake District in the Province of Ontario. The Red Lake District is an established mining area in Ontario where Northern Iron has two near term development projects, the past producing [Griffith](#) mine and the [Karas](#) property.

Northern Iron is currently working towards the production of Hot Briquetted Iron ([HBI](#)), a transportable form of direct reduced iron. HBI is complementary and a viable metallic supplement to scrap steel. Quality scrap is a critical raw material in the steel making process. With the diminishing supply of quality scrap steel and ever increasing market demand, steel producers around the world will be looking to secure alternative supplies of metallic products.

As part of the business plan, Northern Iron has acquired the past producing Griffith mine, which produced pellets and sponge iron (Direct Reduced Iron/DRI) from 1968 to 1986. The mine was owned and operated by STELCO and supplied pellets and sponge iron to the Hamilton and Nanticoke steel mills in Ontario.

Transportation infrastructure is currently in place to ship produced HBI into the North American market via rail and lake barges and into Asian markets via rail through the port of Prince Rupert. Existing infrastructure includes all weather roads, 115kV power line, natural gas line, rail bed and port facilities.

To date, Northern Iron has focused on de-risking the project by seeking out potential joint venture partners, off-take agreements or a combination thereof.
