Trends

Due to the worldwide COVID-19 outbreak, material uncertainties may come into existence that could influence management's going concern assumption. Management cannot accurately predict the future impact COVID-19 may have on:

- The severity and the length of potential measures taken by governments to manage the
- spread of the virus, and their effect on labour availability and supply lines;
- Availability of essential supplies, such as water and electricity;
- Purchasing power of the Canadian dollar; or
- Ability to obtain funding

The Canadian government has not introduced measures which impede the activities of the Company. Management believes the business will continue and accordingly, the current situation bears no impact on management's going concern assumption. However, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods.

Apart from these and the risk factors noted under the heading "Risks and Uncertainties", the Company is not aware of any other trends, commitments, events or uncertainties that would have a material effect on the Company's business, financial condition or results of operations.

Liquidity and Financial Position

The activities of the Company have been financed through the completion of equity transactions such as equity offerings and the exercise of stock options and warrants. There is no assurance that equity capital will be available to the Company in the amounts or at the times desired or on terms that are acceptable to the Company, if at all.

Cash Flows

At June 30, 2021, the Company had cash and cash equivalents of \$1,355. The decrease in cash and cash equivalents of \$151,222 from the December 31, 2020 cash and cash equivalents balance of \$152,577 was as a result of cash outflow in operating activities of \$63,829 and cash outflow in investing activities of \$1,113,793 partially offset by cash inflow from financing activities of \$1,026,400.

Operating activities were affected by adjustments of depreciation of \$350,756, share-based compensation of \$66,000, accrued interest of \$4,509, interest expense on lease liabilities of \$199,423, loss on debt settlement of \$95,952, share of loss in associate of \$16,396 and net change in non-cash working capital balances of \$398,870 due to changes in amounts receivable and prepaid rent and deposit, and accounts payable and accrued liabilities.

The Company also incurred a net loss of \$1,195,735 during the six months ended June 30, 2021 and has yet to achieve profitable operations thereby accumulating a deficit of \$35,811,204 (December 31, 2020 - \$34,615,469). These continuing losses cast significant doubt about the Company's ability to continue as a going concern. Accordingly, the Company will need to raise additional capital through equity issuance and other available means in order to continue funding its operations. The outcome of these matters cannot be predicted at this time.

Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Capital Risk Management

The Company manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return through enhancing the share value.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and financial markets in general. The Company may manage its capital structure by issuing new shares, repurchasing outstanding shares, or adjusting spending. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

The Company considers its capital structure to consist of share capital, shares to be issued, contributed surplus, and deficit, which at June 30, 2021 totaled \$3,123,040 (December 31, 2020 - \$3,062,963). The Company reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. Selected information is provided to the Board of Directors of the Company. The Company is not subject to any capital requirements imposed by a lending institution.

Financial Risk Management

The Company's financial risk exposures and the impact on the Company's financial instruments are as follows:

Credit risk

The Company's credit risk is primarily attributable to cash and accounts receivable. The Company has no significant concentration of credit risk arising from financial instruments.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at June 30, 2021, the Company has a working capital deficiency of \$1,009,850 (December 31, 2020 - working capital deficiency of \$513,533). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms, except short term loans.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and equity prices.

Interest rate risk

The Company's primary interest rate risk consists of interest rate fluctuations, which may affect the Company's interest-bearing debts and lease obligations. The Company does not currently use derivative instruments to limit interest rate risks. There has been no change to the Company's exposure to market risks or the manner in which these risks are managed and measured from the prior year.

Foreign currency risk

The Company's functional and reporting currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company is exposed to foreign currency risk with respect to the expenditures incurred by its US subsidiaries.

Fair Value

The carrying amount of each accounts payable and accrued liabilities and short-term loans approximates their fair value because of the short-term maturities of these items.

Risks and Uncertainties

The Company faces a material risk that the Company's ability to produce, grow, store and sell medical cannabis in Canada is dependent on obtaining the ACMPR license, and any failure to obtain the license would have a material adverse impact on the business, financial condition and operating results of the Company. In addition, there are a number of economic and environmental factors that must be considered by the Company.

Please refer to the section entitled "Risks and Uncertainties" in the Company's MD&A for the year ended December 31, 2020.
