#### 1. NATURE OF OPERATIONS AND GOING CONCERN

Aion Therapeutic Inc. (formerly, Osoyoos Cannabis Inc.) ("Aion" or the "Company") was incorporated on January 13, 2011 under the *Business Corporations Act* (British Columbia). The head office of the Company is located at 45 Sheppard Avenue East, Suite 703, Toronto, Ontario, Canada, M2N 5W9. The Company is publicly traded on the Canadian Securities Exchange under the symbol "AION".

Effective October 31, 2018, the Company was part of a three-cornered amalgamation among LKP Solutions Inc. ("LKP"), 1160516 B.C. Ltd. (a wholly owned subsidiary of LKP) and former Osoyoos Cannabis Inc. ("OSO"). The result of the transactions was that LKP acquired all of the issued and outstanding securities of former OSO on the basis of one share of LKP for each share of former OSO. At completion of the transactions, LKP changed its name to Osoyoos Cannabis Inc. and the former OSO was amalgamated into 1160516 B.C. Ltd. Effective August 26, 2020, the Company changed its name to Aion Therapeutic Inc. and began trading under its new name and symbol on August 28, 2020.

On June 30, 2020, the Company completed the acquisition of 1196691 B.C. Ltd. d/b/a "PCAI Pharma" and its wholly-owned subsidiary AI Pharmaceuticals Jamaica Limited ("AI Pharma"). The business of AI Pharma involves research and development, treatment, data mining and state-of-the-art artificial intelligence (machine learning) techniques, focused on the development of combinatorial pharmaceuticals, nutraceuticals and cosmeceuticals utilizing compounds from cannabis (cannabinoids), psychedelic mushrooms (psilocybin), fungi (edible mushroom), natural psychedelic formulations (ayahuasca), and other medicinal plants in a legal environment for this type of discovery.

The backbone of the Company's combinatorial treatment formulation discovery platform is artificial intelligence techniques. Using artificial intelligence, the Company intends to create a full line of therapeutic products that includes combinatorial pharmaceuticals, nutraceuticals, and cosmeceuticals, as well as, individualized treatments for personalized medicine using human genome and other data unique to an individual. In addition, the Company is creating a strong international intellectual property portfolio related to its discoveries.

These condensed interim consolidated financial statements have been prepared using International Financial Reporting Standards ("IFRS") on a going concern basis, which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. As at January 31, 2021, the Company had cash of \$262,025 (April 30, 2020 – \$612,788), a working capital of \$24,406 (April 30, 2020 – working capital of \$267,335), and an accumulated deficit of \$10,738,550 (April 30, 2020 – \$7,737,005). The continuing operations of the Company are dependent on funding. The Company intends to finance its future requirements through a combination of debt and/or equity issuances. There is no assurance that the Company will be able to obtain such financings or obtain them on favorable terms. This uncertainty may cast significant doubt about the ability of the Company to continue as a going concern. These condensed interim consolidated financial statements do not include any adjustments to the carrying value or presentation of assets or liabilities that might be necessary should the Company be unable to continue as a going concern. These adjustments could be material.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

#### 2. BASIS OF PRESENTATION

# **Basis of preparation**

These condensed interim consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for certain cash flow information.

#### Statement of compliance

These condensed interim consolidated financial statements have been prepared in conformity with International Accounting Standards ("IAS") 34 – Interim Financial Reporting and do not include all information required for full annual consolidated financial statements in accordance with IFRS and should be read in conjunction with the audited consolidated financial statements for the year ended April 30, 2020. These condensed interim consolidated financial statements of the Company and its subsidiaries were prepared using accounting policies consistent with IFRS as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC").

These condensed interim consolidated financial statements have been reviewed and approved by the Company's Audit Committee and its Board of Directors on April 1, 2021.

#### Basis of consolidation

Subsidiaries are entities controlled by the Company. Control exists when the Company has the power, directly and indirectly, to govern the financial and operating polices of an entity and be exposed to the variable returns from its activities. The financial statements of the Company's subsidiaries are included in the condensed interim consolidated financial statements from the date that control commences until the date that control ceases. These condensed interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries: Oservco Management Corp., 1160516 B.C. Ltd. and its wholly-owned subsidiary Bare Root Production Osoyoos Inc., and PCAI Pharma and its wholly-owned subsidiary AI Pharma. All intercompany transactions and balances have been eliminated on consolidation.

### Significant accounting judgments and estimates

The preparation of these condensed interim consolidated financial statements in compliance with IFRS requires management to make certain critical accounting estimates and assumptions. These estimates and assumptions affect the reported amounts of assets, liabilities, shareholders' equity, and the disclosure of contingent assets and liabilities, as at the date of the financial statements, and expenses for the periods reported.

# **Critical Judgements**

The preparation of these condensed interim consolidated financial statements requires management to make judgements regarding the going concern of the Company, as previously discussed in Note 1, as well as the determination of functional currency. The functional currency is the currency of the primary economic environment in which an entity operates and has been determined for each entity within the Company. The functional currency for the Company, Oservco Management Corp., 1160516 B.C. Ltd., Bare Root Production Osoyoos Inc., and PCAI Pharma have been determined to be the Canadian dollar. The functional currency of AI Pharma has been determined to be the Jamaican dollar.

# Significant accounting judgments and estimates (continued)

# **Key Sources of Estimation Uncertainty**

Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of assets and liabilities at the date of the consolidated financial statements and the reported amounts of expenses during the reporting periods. Actual results could differ from those estimates and such differences could be significant.

Significant estimates made by management affecting these consolidated financial statements include:

#### Share-based compensation

Estimating fair value for granted stock options and warrants requires determining the most appropriate valuation model which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the option or warrant, volatility, dividend yield, and rate of forfeitures and making assumptions about them.

#### Deferred tax assets and liabilities

The estimation of income taxes includes evaluating the recoverability of deferred tax assets and liabilities based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets and liabilities will not be realized. The ultimate realization of deferred tax assets and liabilities is dependent upon the generation of future taxable income, which in turn is dependent upon the successful execution of the Company's business plan. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets or liabilities, and deferred income tax provisions or recoveries could be affected.

# Carrying values of tangible assets

The Company assesses the carrying value of its tangible assets annually or more frequently if warranted by a change in circumstances. If it is determined that carrying values of assets cannot be recovered, the unrecoverable amounts are charged against current net income (loss). Recoverability is dependent upon assumptions and judgements regarding market conditions, costs of operations and sustaining capital requirements. Other assumptions used in the calculation of recoverable amounts are discount rates, and future cash flows. A material change in the assumptions may significantly impact the potential impairment of these assets.

# Discount rates used in convertible debentures

The Company calculates the liability portion of convertible debentures by calculating the present value of the debenture and related interest, using a discount rate equal to the market rate that would be given for similar debt, without a conversion feature. Management determines this rate by assessing what rate the Company could borrow funds at from an unrelated party.

# 2. BASIS OF PRESENTATION (continued)

# Significant accounting judgments and estimates (continued)

Key Sources of Estimation Uncertainty (continued)

#### Leases

The Company estimates a lease term by considering the facts and circumstances that can create an economic incentive to exercise an extension option, or not exercise a termination option by assessing relevant factors such as profitability. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The assessment of a lease term is reviewed if a significant event or a significant change in circumstance occurs, which affects this assessment and that is within the control of the lessee. The Company estimates the incremental borrowing rate used to measure our lease liability for each lease contract. This includes estimation in determining the asset-specific security impact.

#### Contingencies

By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. The assessment of contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events.

#### Capitalization of development costs

Initial capitalization of development costs is based on management's judgment that technical and economic feasibility is confirmed. Subsequent development costs are capitalized if the Company can demonstrate an economic benefit to the underlying intangible asset. An intangible asset arising from development is recognized if the Company can demonstrate all of the following:

- a) the technical feasibility of completing the intangible asset so that it will be available for use or sale:
- b) its intention to complete the intangible asset and use or sell it;
- c) its ability to use or sell the intangible asset;
- d) how the intangible asset will generate probable, future economic benefits;
- e) the availability of adequate technical, financial and other resources; and
- f) its ability to measure reliably the expenditure attributable to the intangible asset during its development phase.

### Carrying values of goodwill and other intangible assets

The values associated with goodwill and other intangible assets involve significant estimates and assumptions, including those with respect to the determination of cash generating units ("CGUs"), future cash inflows and outflows, discount rates and useful asset lives. At least annually, the carrying amount of goodwill and other intangible assets are reviewed for potential impairment. Among other things, this review considers the recoverable amounts of the CGUs based on the higher of value in use or fair value less costs of disposal using discounted estimated future cash flows. These significant estimates require considerable judgment which could affect the Company's future results if the current estimates of future performance and fair value change.

#### 3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out in the audited consolidated financial statements for the year ended April 30, 2020 have been applied consistently to all periods presented in these condensed interim consolidated financial statements except for the following new standards adopted in these condensed interim consolidated financial statements:

#### **Business combinations**

Acquisitions have been accounted for using the acquisition method as per IFRS 3, Business Combinations. Goodwill arising from acquisitions are measured as the fair value of the consideration transferred less the net recognized amount of the estimated fair value of identifiable assets acquired and liabilities assumed (subject to certain exemptions to fair value measurement principles such as deferred tax assets or liabilities), all measured as of the acquisition date. Transaction costs that are incurred by the Company in connection with a business combination are expensed as incurred (except for costs directly related to the issuance of shares which are recognized in equity).

The Company uses its best estimates and assumptions to accurately value assets and liabilities assumed at an acquisition date as well as contingent consideration, where applicable, and these estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from an acquisition date, the Company records adjustments to the assets acquired and liabilities assumed with a corresponding offset to goodwill. On conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded in profit and loss.

#### Assets held for sale

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for sets such as deferred tax assets, assets arising from employee benefits, financial assets and investment property that are carried at fair value and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognized for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. A gain is recognized for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognized. A gain or loss not previously recognized by the date of the sale of the noncurrent asset (or disposal group) is recognized at the date of derecognition.

Non-current assets (including those that are part of a disposal group) are not depreciated or amortized while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognized.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single coordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit or loss.

# 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### Intangible assets

Intangible assets are measured at cost less accumulated amortization and accumulated impairment losses. Amortization is recorded on a straight-line basis over the estimated useful life of the asset acquired, which varies depending on the nature of the intangible asset. Intangible assets are amortized from the date when they are available for use.

The estimated useful life is reviewed at the end of each reporting period with the effect of any changes in estimate being accounted for on a prospective basis. Internally incurred development costs are recognized as intangible assets when the following criteria are met:

- a) it is technically feasible to complete the intangible asset so that it will be available for use;
- b) management intends to complete the intangible asset and use or sell it;
- c) there is an ability to use or sell the intangible asset;
- d) it can be demonstrated how the intangible asset will generate probable future economic benefits;
- e) adequate technical, financial and other resources to complete the development and to use or sell the intangible asset are available; and
- f) the expenditure attributable to the intangible asset during its development can be reliably measured.

Intangible assets relate to the Company's internal development expenditures in relation to patent and intellectual property development as described in Note 1. Other internal development expenditures that do not meet these criteria are recognized as an expense as incurred. Intangible assets with definite lives are assessed for impairment whenever there is an indication that the intangible asset may be impaired. These intangible assets will be amortized when they are ready for use. The amortization period and the amortization method are reviewed at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates on a prospective basis.

#### 4. ACQUISITIONS

# Acquisition of PCAI Pharma and AI Pharma

On June 30, 2020, the Company completed the acquisition of 1196691 B.C. Ltd. d/b/a "PCAI Pharma" and its wholly-owned subsidiary AI Pharma (the "Acquisition"), as described in Note 1. As consideration for the Acquisition, the Company issued 36,000,000 Common Shares of the Company at a price of \$0.07 per share for a total consideration of \$2,520,000 the (the "Purchase Price").

In accordance with the Company's accounting policies and IFRS, the measurement period for the Acquisition shall not exceed one year from acquisition date. Accordingly, the accounting for the Acquisition has only been provisionally determined as at January 31, 2021. The following table summarizes the fair value of consideration paid on the acquisition date and the allocation of the Purchase Price to the assets and liabilities acquired. The Company has yet to determine and value any intangible assets that may have been acquired as part of the Acquisition. Once this has been determined, the value of the provisional goodwill may change. These changes may be material.

- b) During the nine months ended January 31, 2021, the Company assigned its sub-leased premises to a third party. As a result, an impairment expense in the amount of \$143,711 was recorded related to these leasehold improvements. During the nine months ended January 31, 2021, the Company capitalized \$nil (January 31, 2020 \$104,069) as leasehold improvements;
- c) Subsequent to January 31, 2021, on February 22, 2021, the Company terminated an equipment lease (the "Equipment Lease") and a profit-sharing agreement (the "Profit Sharing Agreement") with 2623942 Ontario Limited, which were to commence on November 1, 2020 and entered into an agreement to sell one of its Extraction Systems. As a result, equipment in the amount of \$1,005,600 was reclassified to assets held for sale (*Note 7*); and
- d) As at January 31, 2021, the remaining equipment was deemed impaired an impairment charge was recorded in the amount of \$505,600. #### 8. LOAN PAYABLE

The loan payable to the former CEO (the "Creditor") arises from the surrender of shares and was unsecured and non-interest bearing with an initial due date of March 15, 2020 in a principal amount of \$1,000,000 (the "Loan"). Effective May 1, 2018, the Loan was discounted to fair value of \$718,184 using a market rate. The Loan was to be accreted to fair value over the term. On May 23, 2019, the

Company securitized, extended and revised the terms of the Loan. The principal amount of \$1,000,000 was renegotiated to bear simple interest at a rate of 5% per annum, payable in five equal annual installments of \$200,000. Additionally, subject to terms and conditions of an escrow agreement, the Company issued 125,000 Common Shares to the Creditor valued at \$25,000, with 25,000 Common Shares vesting immediately and 20,000 Common Shares vesting on each of the five anniversary dates beginning on March 15, 2020. As a result, financing costs in the amount of \$25,000 was deferred and amortized over the term of the amended Loan. As at January 31, 2021, the financing costs amounted to \$20,000 (April 30, 2020 – \$20,000) which has been reflected as deferred costs on the consolidated statements of financial position.

As at April 30, 2019, the carrying value of the Loan amounted to \$870,830, comprised of a principal amount of \$1,000,000 and \$129,170 of an unamortized discount. During the prior comparative period ended January 31, 2020, the Company fully-accreted the Loan and recorded an accretion expense of \$129,170 (January 31, 2021 – \$nil).

On September 23, 2019, the Company and the Creditor entered into a settlement, whereby, the Company issued 1,500,000 Common Shares to the Creditor fair valued at \$105,000, paid cash of \$125,000 and executed a promissory note in the principal amount of \$125,000, bearing interest at 5% per annum and matured on May 31, 2020 (the "Settlement Note"). The settlement resulted in a gain on restructuring of debt in the amount of \$645,000 during the three and nine months ended January 31, 2020.

On September 3, 2020, the Company received a notice of civil claim from the Creditor demanding repayment of the Settlement Note in the amount of \$125,000 plus accrued interest at 5% per annum and collection costs of \$10,000. On October 2, 2020, the Company settled the claim with the Creditor and agreed to repay the principal amount of \$125,000 plus \$16,421 of interest and collection costs over a period of 45 days (the "Settlement") in two installments. On December 18, 2020, the Company fully repaid the remaining principal of the Settlement Note plus additional interest and collection costs to fully settle the notice of civil claim with the Creditor. The Company recorded an interest expense of \$417 and \$2,895 during the three and nine months ended January 31, 2021 respectively.

# 9. CONVERTIBLE DEBENTURES

During the year ended April 30, 2018, the Company issued convertible debentures in the aggregate principal amount of \$1,130,000 (the "Debentures"). The Debentures had a maturity of 3 years, bearing interest at 10% per annum, payable in cash or convertible into Common Shares at the option of the holder at a conversion price of \$0.15 per share. In connection with the Debentures, the Company issued 7,533,530 Common Share purchase warrants, each warrant exercisable at \$0.20 per share for a period of 2 years from the date of issuance.

The warrants were considered to be transaction costs related to the Debentures and had a fair value of \$623,521, calculated using the Black-Scholes pricing model. Of this amount, \$144,116 was allocated to the equity component of the Debentures and the remaining amount allocated to the liability component, to be accreted over the term of the Debentures.

# 9. **CONVERTIBLE DEBENTURES** (continued)

Furthermore, 342,500 Common Shares valued at \$51,375 were issued to the Debenture holders and were recorded as transaction costs. Of the \$51,375 in transaction costs, \$11,875 was recorded as share issuance costs and the remaining amount was recorded against the liability portion of the Debentures, accreted over the term of the Debentures.

On May 10, 2018, the Company repaid certain Debentures with a face value of \$105,000 and a carrying value of \$46,438, resulting in a loss on repayment of \$47,676 and a reduction to the equity component of the Debentures of \$10,886.

On April 25, 2019, certain holders of the Company's Debentures elected to convert a face value of \$525,000 of the Debentures at the conversion price of \$0.15 per Common Share resulting in the Company issuing 3,500,000 Common Shares. During the year ended April 30, 2020, the Company issued an aggregate of 166,667 Common Shares to settle \$25,000 of accrued interest on the Debentures.

On October 29, 2020, the Company entered into an extension and amendment agreement (the "Amendment") with a Debenture holder who held a 10% Debenture maturing on November 1, 2020 in the principal amount of \$262,500 and a 10% Debenture maturing on December 10, 2020 in the principal amount of \$237,500. Pursuant to the Amendment, the maturity dates of these Debentures were both extended until April 30, 2021 (the "Amended Maturity Date") and the Company agreed to pay interest at a rate of 12% per annum on the Debentures from their respective maturity dates until the Amended Maturity Date. The Company also agreed to amend the conversion price of the Debentures from \$0.15 per Common Share to \$0.125 per Common Share and agreed to pay to the Debenture holder an extension fee of \$20,000. Furthermore, the Company settled \$61,822 representing (i) all interest payable on the Debentures up until the Amended Maturity Date in the aggregate amount of \$41,822, and (ii) the extension fee of \$20,000 through the issuance of 772,775 Common Shares at a price of \$0.08 per share (see Note 10(c)).

As a result of the Amendment, the Company allocated \$483,993 of the outstanding principal amount of \$500,000 of the Debentures to the liability component of the Debentures and the remaining amount of \$16,007 to the equity component of the Debentures. Furthermore, the extension fee of \$20,000 was recorded as a transaction cost, of which \$641 was recorded as issuance cost related to the equity component of the Debentures and the remaining amount of \$19,359 was allocated to the liability portion of the Debentures, to be accreted until the Amended Maturity Date.

As at January 31, 2021, the Company's Debentures were comprised of the following:

- Included in accounts payable and accrued liabilities is \$13,400 (April 30, 2020 \$28,881) due to related parties.

During the nine months ended January 31, 2021, the Company recorded bad debt expense in the amount of \$18,500 (January 31, 2020 – \$nil) related to an amount due from related parties. Amounts due from related parties were non-interest bearing with no terms of repayment, other than the loan payable as discussed in Note 8.

The right-of-use assets (Note 14), the lease obligations (Note 15), and the license fees of \$19,607 and \$45,593 for the three and nine months ended January 31, 2021 were paid to entities which are considered to be related parties by virtue of a common officer and director.

#### 12. FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash and cash equivalents, due from related party, rental deposit, accounts payable and accrued liabilities, and convertible debentures.

The Company's cash and cash equivalents is measured at fair value under the fair value hierarchy based on level one quoted prices in active markets for identical assets or liabilities. The presentation of the Company's accounts payable and accrued liabilities is fair value, taking into account their short-term nature. The fair value of convertible debentures are measured on the statement of financial position using level 3 of the fair value hierarchy.

The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, liquidity risk, interest rate risk, price risk and foreign currency risk.

# Financial risk management and objectives

The Company, through its financial assets and liabilities, is exposed to various risks. The Company has established policies and procedures to manage these risks, with the objective of minimizing any adverse effect that changes in these variables could have on these condensed interim consolidated financial statements. The following analysis provides a measurement of risks as at January 31, 2021:

# Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company is not exposed to significant credit risk.

#### Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if its access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Company. The Company generates cash flows primarily from its financing activities.

# 12. FINANCIAL INSTRUMENTS (continued)

The Company manages its liquidity needs by carefully monitoring scheduled costs. Liquidity is measured in various time bands, on day to day and week-to-week basis, as well as on long term liquidity needs over 180 day to 360 day look out periods. Funding for long term liquidity needs is based on the ability of the Company to successfully complete private placements as well as, in certain cases, to pay the outstanding balances owed in shares of the Company rather than in cash.

As at January 31, 2021, the Company had cash of \$262,025 and current liabilities of \$1,012,369.

The Company considers expected cash flow from financial assets in managing liquidity risk. The Company's existing cash resources currently do not meet the current cash outflow requirements. As a result, the Company is at a risk of not being a going concern if management is unable to raise the appropriate funds prior to the maturity of the financial liabilities. Appropriate going concern disclosures have been made in Note 1.

#### Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, commodity and equity prices, and foreign exchange rates.

#### a) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risk.

#### b) Price Risk

The Company is not exposed to significant price risk as it does not possess investments in publicly traded securities.

# c) Foreign Currency Risk

The Company is exposed to foreign currency risk from fluctuations in foreign exchange rates and the degree of volatility in these rates due to the timing of their accounts payable balances. The risk is mitigated by timely payment of creditors and monitoring of foreign exchange fluctuations by management. As at January 31, 2021, the Company did not use derivative instruments to hedge its exposure to foreign currency risk.

#### 13. CONTINGENCIES AND COMMITMENTS

On September 1, 2018, the Company executed a lease on real property and paid a rental deposit of \$64,817 (the "Lease"). The Lease expires on August 31, 2023, subject to a 5-year renewal option at fair value rent. In years 1 and 2, the monthly rent (including common area cost) is \$10,714, for years 3 and 4 \$11,581 and year 5 \$12,449. The Company has the option to acquire the property for \$1,500,000. The option may be exercised at the end of the initial lease term on giving prior notice of at least six (6) months prior to the end of the initial lease term. On August 28, 2020, the Company entered into an assignment agreement whereby the Company assigned and transferred all right, title and interest in the Lease to a third party. As a result, the Company no longer has any obligations with regards to the Lease.
