Overview and Going Concern

The Company is in the business of acquiring exploration and evaluation assets. The Company currently has negotiated two property agreements, a property option agreement and a earn-in-agreement (“*see mineral property agreements”* below) and is in the process of looking for an acquisition of additional exploration and evaluation assets. Further, the Company expects its current capital resources will not be sufficient to complete its exploration plans and operations through its current operating year and will be required to raise additional funds through future equity issuances. The Company’s ability to continue as a going concern is therefore dependent on its ability to raise additional funds through equity issuances. These material uncertainties may cast significant doubt on the entity’s ability to continue as a going concern.

The financial statements for the year ended April 30, 2018 were prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

Results of Operations

The results of operations reflect the overhead costs incurred by the Company to maintain good standing with the various regulatory authorities and to provide an administrative infrastructure to manage the acquisition, and financing activities of the Company. General and administrative costs can be expected to increase or decrease in relation to the changes in activity required as property acquisitions continues. The Company has not recorded, since the date of its incorporation, any revenues from its mineral exploration and development activities.

The Company incurred a loss and comprehensive loss for the three month period ended July 31, 2018 of $96,434 (2017 - $16,633).

A brief explanation of the significant changes in expense categories is provided below:

i) Filing fees of $1,420 (2017 - $Nil). The increase is due to costs incurred primarily due to reguatory fees paid for the resumption of trading on the stock exchange.

ii) Management fees of $30,000 (2017 - $15,000). The decrease is a result of Graham Keevil resigning as CEO effective April 30, 2017 and fees were negotiated with new management during the current year.

iii) Professional fees of $9,732 (2017 – $(3,125)). The increase is due to accounting and legal services incurred during the current year.

Financial Risk Factors

The Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities, and loans payables. The fair value of these financial instruments, other than cash, approximates their carrying values due to the short-term nature of these instruments. Cash is measured at fair value using level 1 inputs.

The Company is exposed to a variety of financial risks by virtue of its activities including currency, credit, interest rate, liquidity and commodity price risk.

a) Currency risk

The Company is exposed to nominal foreign currency risk.

b) Credit risk

Credit risk is risk of financial loss to the Company if the counterparty to a financial statement fails to meet its contractual obligations. The Company's cash is held in large Canadian financial institutions and is not exposed to significant credit risk.

c) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to limited interest rate risk as it only holds non-interest bearing debt.

d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they come due. At July 31, 2018, the Company had cash of $10,510 and current liabilities of $165,628. This emphasizes that the Company's ability to continue as a going concern is dependent on management's ability to raise the required capital through future equity or debt issuances. See "Liquidity and Capital Resources" above. There is no guarantee that the Company will be able to raise capital. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the directors are actively involved in the review, planning, and approval of significant expenditures and commitments.

e) Price risk

The ability of the Company to explore and develop its exploration and evaluation assets and the future profitability of the Company are directly related to the price of commodities. The Company monitors these prices to determine the appropriate course of action to be taken.
