**Financial Instruments**

(a) Fair Values

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's statement of financial position as at January 31, 2013 as follows:

|                           | Fair Value Measurements Using   |  |  | Balance,<br>January 31,<br>2013<br>\$ |
|---------------------------|---|--|--|---------------------------------------|

| Cash and cash equivalents | 363,642   | –  | –  | 363,642                               |

(d) Interest Rate Risk

The Company does not have any significant interest rate risk.

(e) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising debt or equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

(f) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

**Capital Management**

The capital structure of the Company consists of cash and equity comprised of issued share capital, share-based payment reserve, equity component of convertible debt, and deficit.
