(formerly GTO Resources Inc.) Consolidated Financial Statements For the Years Ended April 30, 2014 and 2013 (Expressed in Canadian dollars)

#### **INDEPENDENT AUDITORS' REPORT**

#### To the Shareholders of Velocity Data Inc. (formerly GTO Resources Inc.)

We have audited the accompanying consolidated financial statements of Velocity Data Inc. (formerly GTO Resources Inc.) (the "Company"), which comprise the consolidated statements of financial position as at April 30, 2014 and 2013, and the consolidated statements of operations and comprehensive loss, changes in equity, and cash flows for the years then ended, and the related notes comprising a summary of significant accounting policies and other explanatory information.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also involves evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at April 30, 2014 and 2013, its financial performance and its cash flows for the years then ended, in accordance with International Financial Reporting Standards.

#### **Emphasis of Matter**

Without qualifying our opinion, we draw attention to Note 1 of the consolidated financial statements which indicates the existence of a material uncertainty that may cast significant doubt on the ability of the Company to continue as a going concern.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 1. Nature of Operations and Going Concern

Velocity Data Inc. (formerly GTO Resources Inc.) (the "Company") was incorporated on May 10, 2011 under the Business Corporations Act (British Columbia). Pursuant to an arrangement agreement between Firebird Resources Inc. ("Firebird") and the Company dated May 12, 2011, the Company acquired all of Firebird's interest in the Robert Creelman Property and the Hyman Porter Property located in Ontario, in exchange for common shares of the Company (the "Arrangement"). Pursuant to the terms of the agreement dated July 27, 2011, being the effective date of the Arrangement, each Firebird shareholder received one new common share in the capital of Firebird and one half of a common share of the Company for each Firebird common share then held. Pursuant to the Arrangement, each whole warrant issued has (i) an exercise price equal to the existing exercise price of the Firebird warrants exchanged, and (ii) a term equal to the term remaining on the Firebird warrants exchanged. The common shares of the Company commenced trading on the TSX Venture Exchange under the stock symbol "GTR" effective July 28, 2011. On July 25, 2014, the Company listed for trading on the Canadian Securities Exchange and was delisted from TSX Venture Exchange. On August 13, 2014, the Company changed its name to Velocity Data Inc. and began trading under the symbol "VCT". The Company's registered office is located at Suite 1000, 925 West Georgia Street, Vancouver, BC, V6C 3L2.

These consolidated financial statements have been prepared on the going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at April 30, 2014, the Company had a working capital deficit of \$443,972, an accumulated deficit of \$633,642, and no source of revenue. Furthermore, the Company does not have sufficient cash to sustain operations for the next twelve months without additional financing. The continued operations of the Company are dependent on its ability to generate future cash flows and/or obtain additional financing. Management is of the opinion that sufficient working capital will be obtained from external financing to meet the Company's liabilities and commitments as they become due. These factors indicate the existence of a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern. These consolidated financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

#### 2. Significant Accounting Policies

(a) Statement of Compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee.

(b) Basis of Presentation and Principles of Consolidation

These consolidated financial statements have been prepared on a historical cost basis. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. These financial statements are presented in Canadian dollars, which is the Company's functional currency.

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Hyman Porter Resources Inc. and RCU Resources Inc. All significant intercompany balances and transactions have been eliminated on consolidation.

(c) Use of Estimates and Judgments

The preparation of the consolidated financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 2. Significant Accounting Policies (continued)

(c) Use of Estimates and Judgments (continued)

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Significant areas requiring the use of estimates include the impairment of exploration and evaluation assets, equity component of convertible loan payable, measurement of share-based payments, and deferred income tax asset valuation allowances. There are no judgments made by management in the application of IFRS that have a significant effect on the consolidated financial statements and estimates with a significant risk of material adjustment in the current and following years.

(d) Cash and Cash Equivalents

The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance, are readily convertible to known amounts of cash, and are subject to an insignificant risk of changes in fair value to be cash equivalents.

(e) Exploration and Evaluation Expenditures

Exploration and evaluation expenditures include the costs of acquiring licenses, costs associated with exploration and evaluation activity, and the fair value (at acquisition date) of exploration and evaluation assets acquired in a business combination. Exploration and evaluation expenditures are capitalized. Costs incurred before the Company has obtained the legal rights to explore an area are charged to operations.

Exploration and evaluation assets are assessed for impairment if (i) sufficient data exists to determine technical feasibility and commercial viability, and (ii) facts and circumstances suggest that the carrying amount exceeds the recoverable amount.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets within property, plant and equipment.

Recoverability of the carrying amount of any exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

All capitalized exploration and evaluation expenditure is assessed for impairment for each reporting period and is impaired if facts and circumstances indicate that impairment may exist. In circumstances where a property is abandoned, the cumulative capitalized costs relating to the property are written off in the period.

#### Mineral Property Options

The Company does not record any expenditures made by the optionee in its accounts. It also does not recognize any gain or loss on its exploration and evaluation option arrangements but redesignates any costs previously capitalized in relation to the whole interest as relating to the partial interest retained and any consideration received directly from the optionee is credited against costs previously capitalized.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 2. Significant Accounting Policies (continued)

(f) Reclamation and Remediation Provisions

The Company recognizes the fair value of a decommissioning and restoration liability in the year which it is incurred when a reasonable estimate of fair value can be made. The carrying amount of the related long-lived asset is increased by the same amount as the liability.

Changes in the decommissioning and restoration liability due to the passage of time will be measured by applying an interest method of allocation. The amount will be recognized as an increase in the liability and an accretion expense in the statement of operations. Changes resulting from revisions to the timing or the amount of the original estimate of undiscounted cash flows are recognized as an increase or a decrease to the carrying amount of the liability and the related long-lived asset.

(g) Impairment of Non-Current Assets

At each reporting date, the Company reviews the carrying amounts of its tangible assets to determine whether there are any indications of impairment. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any.

Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash generating unit ("CGU") to which the asset belongs. The recoverable amount is determined as the higher of fair value less direct costs to sell and the asset's value in use. In assessing value in use, the estimated future cash flows are discounted to their present value. Estimated future cash flows are calculated using estimated recoverable reserves, estimated future commodity prices and the expected future operating and capital costs. The pre-tax discount rate applied to the estimated future cash flows reflects current market assessments of the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

If the carrying amount of an asset or CGU exceeds its recoverable amount, the carrying amount of the asset or CGU is reduced to its recoverable amount through an impairment charge to the statement of income.

Assets that have been impaired are tested for possible reversal of the impairment whenever events or changes in circumstance indicate that the impairment may have reversed. When an impairment subsequently reverses, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but only so that the increased carrying amount does not exceed the carrying amount that would have been determined (net of depreciation, depletion and amortization) had no impairment loss been recognized for the asset or CGU in prior periods. A reversal of impairment is recognized as a gain in the statement of operations.

- (h) Financial Instruments
  - (i) Non-derivative financial assets

The Company initially recognizes loans and receivables and deposits on the date that they are originated. All other financial assets (including assets designated at fair value through profit or loss) are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risk and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 2. Significant Accounting Policies (continued)

- (h) Financial Instruments (continued)
  - (i) Non-derivative financial assets (continued)

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

#### Financial assets at fair value through profit or loss

Financial assets are classified as fair value through profit or loss when the financial asset is held for trading or it is designated as fair value through profit or loss. A financial asset is classified as held for trading if: (i) it has been acquired principally for the purpose of selling in the near future; (ii) it is a part of an identified portfolio of financial instruments that the Company manages and has an actual pattern of short-term profit taking; or (iii) it is a derivative that is not designated and effective as a hedging instrument.

Financial assets classified as fair value through profit or loss is stated at fair value with any gain or loss recognized in profit or loss. The net gain or loss recognized incorporates any dividend or interest earned on the financial asset. Cash and cash equivalents are classified as fair value through profit or loss.

#### Held-to-maturity investments

Held-to-maturity investments are recognized on a trade-date basis and are initially measured at fair value, including transaction costs. The Company does not have any assets classified as held-to-maturity investments.

#### Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale and that are not classified in any of the previous categories. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses and foreign currency differences on available-for-sale equity instruments, are recognized in other comprehensive income and presented within equity in the fair value reserve. When an investment is derecognized, the cumulative gain or loss in other comprehensive income is transferred to the statement of operations and comprehensive loss. The Company does not have any available-for-sale financial assets.

#### Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Such assets are initially recognized at fair value plus any directly attributable transaction costs. Subsequent to initial recognition loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses. Loans and receivables are comprised of amounts receivable.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 2. Significant Accounting Policies (continued)

- (h) Financial Instruments (continued)
  - (i) Non-derivative financial assets (continued)

#### Impairment of financial assets

When an available-for-sale financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income or loss are reclassified to profit or loss in the period. Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the investments have been impacted. For marketable securities classified as available-for-sale, a significant or prolonged decline in the fair value of the securities below their cost is considered to be objective evidence of impairment.

For all other financial assets objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- · default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organization.

For certain categories of financial assets, such as amounts receivable, assets that are assessed not to be impaired individually are subsequently assessed for impairment on a collective basis. The carrying amount of financial assets is reduced by the impairment loss directly for all financial assets with the exception of amounts receivable, where the carrying amount is reduced through the use of an allowance account. When an amount receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in the statement of operations.

With the exception of available-for-sale equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through the statement of operations to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized. In respect of available-for-sale equity securities, impairment losses previously recognized through the statement of operations are not reversed through the statement of operations. Any increase in fair value subsequent to an impairment loss is recognized directly in equity.

(ii) Non-derivative financial liabilities

The Company initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are recognized initially on the trade at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 2. Significant Accounting Policies (continued)

- (h) Financial Instruments (continued)
  - (ii) Non-derivative financial liabilities (continued)

The Company has the following non-derivative financial liabilities: accounts payable and accrued liabilities, loan payable, and convertible loan payable.

Such financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortized cost using the effective interest method.

(iii) Share capital

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and stock options are recognized as a deduction from equity, net of any tax effects.

(i) Foreign Currency Translation

The functional and reporting currency is the Canadian dollar. Transactions denominated in foreign currencies are translated using the exchange rate in effect on the transaction date or at an average rate. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange in effect at the statement of financial position date. Non-monetary items are translated using the historical rate on the date of the transaction. Foreign exchange gains and losses are included in the statement of operations.

(j) Income Taxes

#### Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity and not in profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

#### Deferred income tax

Deferred income tax is provided using the balance sheet method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and recognized only to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 2. Significant Accounting Policies (continued)

(k) Flow-through Shares

The resource expenditure deductions for income tax purposes related to exploration and development activities funded by flow-through share arrangements are renounced to investors in accordance with Canadian tax legislation. On issuance, the premium recorded on the flow-through share, being the difference in price over a common share with no tax attributes, is recognized as a liability. As expenditures are incurred, the deferred income tax liability associated with the renounced tax deductions is recognized through the statement of operations with a pro-rata portion of the deferred premium.

(I) Loss Per Share

Basic loss per share is computed using the weighted average number of common shares outstanding during the period. The treasury stock method is used for the calculation of diluted loss per share, whereby all "in the money" stock options and share purchase warrants are assumed to have been exercised at the beginning of the period and the proceeds from their exercise are assumed to have been used to purchase common shares at the average market price during the period. When a loss is incurred during the period, basic and diluted loss per share are the same as the exercise of stock options and share purchase warrants is considered to be anti-dilutive. As at April 30, 2014, the Company had 19,773,243 (2013 – 20,204,597) potential dilutive shares outstanding.

(m) Convertible Loans

The Company classifies the proceeds received from convertible loans into their liability and equity components using the residual value approach. Under the residual value approach, the initial carrying amount of the liability component is determined by the net present value of future cash flows, and the remaining portion is allocated to the equity component.

(n) Comprehensive Loss

Comprehensive loss is the change in the Company's net assets that results from transactions, events and circumstances from sources other than the Company's shareholders and includes items that are not included in the statement of operations. The Company does not have items representing comprehensive income or loss.

(o) Stock-based Compensation

The grant date fair value of share-based payment awards granted to employees is recognized as an employee expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognized as an expense is based on the number of awards that meet the related service and non-market performance conditions at the vesting date. For share-based payment awards with non-vesting conditions, the grant date fair value is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.

Share-based payment arrangements in which the Company receives goods or services as consideration for its own equity instruments are accounted for as equity-settled, share-based payment transactions, regardless of how the equity instruments are obtained by the Company.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 2. Significant Accounting Policies (continued)

(o) Stock-based Compensation (continued)

The fair value of the options is measured at the grant date using the Black-Scholes option pricing model. The fair value is recognized as an expense over the vesting period, which is the period over which all of the specified vesting conditions are satisfied with a corresponding increase in equity. For awards with graded vesting, the fair value of each tranche is recognized over its respective vesting period. Non-market vesting conditions are considered in making assumptions about the number of awards that are expected to vest. When the options are exercised, any proceeds received are credited to share capital along with the amount reflected in share-based payment reserve.

(p) Accounting Standards Issued But Not Yet Effective

A number of new standards, and amendments to standards and interpretations, are not yet effective for the year ended April 30, 2014, and have not been applied in preparing these consolidated financial statements.

New standard IFRS 9, "Financial Instruments"

New standard IFRS 10, "Consolidated Financial Statements" and IFRS 12 "Disclosure of interests in Other Entities"

New standard IFRS 11, "Joint Arrangements"

Amendments to IFRS 27, "Separate Financial Statements"

Amendments to IAS 32, "Financial Instruments: Presentation"

The Company has not early adopted these revised standards and is currently assessing the impact that these standards will have on the consolidated financial statements.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's consolidated financial statements.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

On July 27, 2011, the Company acquired a 100% interest in 34 claim units located in the Roberts and Creelman Townships ("RCU") and a 100% interest in 70 claim units located in the Hyman and Porter Townships ("HPU") of Sudbury, Ontario in a Plan of Arrangement with Firebird for 22,201,907 common shares of the Company with a fair value of \$228,386 and issuance of 18,238,250 share purchase warrants with a fair value of \$168,294.

The Company is obligated to pay the optionor minimum royalties of \$12,000 per annum, and upon commencement of commercial production in RCU or HPU, the Company will pay a royalty payment of \$0.20 per pound of uranium produced and sold. The Company has an option to purchase and cancel the royalty payment at any time in exchange for \$1,200,000.

### 4. Loan Payable

During the year ended April 30, 2014, the Company received a loan in the amount of \$5,460 (2013 - \$nil) from a non-related party. The loan is unsecured, non-interest bearing, and due on demand.

### 5. Convertible Loan Payable

On July 18, 2011, the Company entered into a loan agreement with Firebird for \$700,000. Under the terms of the loan, the amount is unsecured, bears interest at Royal Bank of Canada prime rate plus 3% per annum, and due on demand. In addition, the Company has the right, at any time during the term of the loan, to convert the loan into common shares of the Company using a weighted average closing price of the first ten trading days following listing of the common shares, subject to a minimum conversion price of \$0.10 per share. The Company commenced trading on the TSX Venture Exchange on August 18, 2011, and the conversion price was determined to be \$0.18 per share.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 5. Convertible Loan Payable (continued)

The convertible loan was recorded using the residual method where the loan has been bifurcated into a debt component and equity component comprised of the convertible feature embedded within the liability. The value of the liability component, at the time of issuance, was determined to be \$486,111 using a net present value calculation assuming a discount rate of 20% per annum. As a result, the value of the equity component was \$213,889 which was recorded as equity and an equivalent discount on the loan payable which will be accreted to the face value of \$700,000 over the term of the loan.

During the year ended April 30, 2014, the Company repaid \$86,592 (2013 - \$83,408) of principal payments and \$18,849 (2013 - \$69,092) of interest payments on the loan. During the year ended April 30, 2014, the Company recorded accretion expense of \$25,838 (2013 - \$110,607). As at April 30, 2014, the carrying value of the convertible loan payable is \$430,000 (2013 - \$490,754) and the unamortized discount is \$nil (2013 - \$25,838).

#### 6. Related Party Transactions

- (a) During the year ended April 30, 2014, the amount of \$15,000 (2013 \$15,000) was incurred to a company controlled by the spouse of the Chief Financial Officer of the Company for professional fees.
- (b) During the year ended April 30, 2014, the amount of \$47,500 (2013 \$45,000) was incurred to a company controlled by the spouse of the Chief Financial Officer of the Company for management and consulting fees.

#### 7. Share Purchase Warrants

The following table summarizes the continuity of share purchase warrants:

	Number of warrants	Weighted average exercise price \$
Balance, April 30, 2012	18,238,250	0.11
Expired	(913,250)	1.00
Balance, April 30, 2013 and 2014	17,325,000	0.06

As at April 30, 2014, the following share purchase warrants were outstanding:

Number of warrants outstanding	Exercise Price \$	Expiry date
1,200,000 11,000,000 5,125,000	0.25 0.05 0.05	September 25, 2014 November 13, 2014 January 8, 2015
17,325,000		

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 8. Financial Instruments

(a) Fair Values

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's statement of financial position as at April 30, 2014 as follows:

Fair Value Measurements Using		_		
	Quoted prices in		<b>.</b>	-
	for identical	Significant other observable	Significant unobservable	Balance,
	instruments (Level 1)	inputs (Level 2)	inputs (Level 3)	April 30, 2014
	\$	\$	\$	\$
Cash and cash equivalents	10,715	_	_	10,715

The fair values of other financial instruments, which include amounts receivable, accounts payable and accrued liabilities, loan payable, and convertible loan payable, approximate their carrying values due to the relatively short-term maturity of these instruments.

(b) Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash and cash equivalents and amounts receivable. The Company limits its exposure to credit loss by placing its cash and cash equivalents with high credit quality financial institutions. Amounts receivable consists of GST receivable which is due from the Government of Canada. The carrying amount of financial assets represents the maximum credit exposure.

(c) Foreign Exchange Rate Risk

The Company does not have any significant foreign exchange rate risk.

(d) Interest Rate Risk

The Company does not have any significant interest rate risk.

(e) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising debt or equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

(f) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 9. Capital Management

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of cash and cash equivalents and equity comprised of issued share capital, share-based payment reserve, and equity component of convertible debt.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its Board of Directors, will balance its overall capital structure through new share issues or by undertaking other activities as deemed appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements and the Company's overall strategy with respect to capital risk management remains unchanged from the period ended April 30, 2013.

#### 10. Income Taxes

The tax effect (computed by applying the Canadian federal and provincial statutory rate) of the significant temporary differences, which comprise deferred income tax assets and liabilities, are as follows:

	2014 \$	2013 \$
Canadian statutory income tax rate	26.0%	25.1%
Income tax recovery at statutory rate	(46,199)	(61,838)
Tax effect of: Permanent differences and other Change in enacted tax rates Valuation true up Change in valuation allowance	6,744 (2,562) 2,562 39,455	30,676 (2,462) 
Income tax provision	_	_

The significant components of deferred income tax assets and liabilities are as follows:

	2014 \$	2013 \$
Deferred income tax assets:		
Non-capital losses carried forward	106,054	66,599
Valuation allowance	(106,054)	(66,599)
Net deferred income tax asset	_	_

At April 30, 2014, the Company has non-capital losses carried forward of approximately \$407,901, which are available to offset future years' taxable income. These losses expire as follows:

	\$
2032	131,901
2033	124,250
2032 2033 2034	151,750
	407,901

At April 30, 2014, the Company also has available resource related expenditure pools totaling \$516,899 which may be deducted against future taxable income on a discretionary basis.

(formerly GTO Resources Inc.) Notes to the consolidated financial statements April 30, 2014 (Expressed in Canadian dollars)

#### 11. Subsequent Event

On May 23, 2014, the Company entered into a share exchange agreement with A.C.L. Computers and Software Inc. ("ACL") to purchase all of the issued and outstanding common shares of ACL in exchange for the issuance of 72,000,000 common shares of the Company. The agreement between the Company and ACL will be accounted for in accordance with IFRS 3, Business Combinations, and will constitute a reverse takeover whereby ACL is deemed to be the acquirer on an accounting basis. On July 21, 2014, the share exchange agreement was completed. On August 13, 2014, the Company changed its name to Velocity Data Inc.
