VELOCITY DATA INC.

(FORMERLY GTO RESOURCES INC.)

CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED OCTOBER 31, 2015 AND 2014

(Expressed in United States dollars)

Independent Auditor's Report

To the Shareholders of Velocity Data Inc. (Formerly GTO Resources Inc.)

We have audited the accompanying consolidated financial statements of Velocity Data, Inc. which comprise the consolidated statements of financial position as at October 31, 2015 and 2014 and the consolidated statements of earnings (loss), statements of changes in shareholders' equity (deficit) and statements of cash flows for the years then ended, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards.

Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Velocity Data Inc. as at October 31, 2015 and 2014 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of matter

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements which describe matters and conditions that indicate the existence of a material uncertainty that may cast significant doubt about Velocity Data, Inc.'s ability to continue as a going concern.

1. Nature of Operations and Going Concern

Velocity Data Inc. (the "Company") was incorporated as GTO Resources Inc. on May 10, 2011 under the Business Corporations Act (British Columbia). The Company changed its name to Velocity Data Inc. on August 7, 2014 and is engaged in the business of selling computer systems and related components, particularly to government contractors and federal government end-users.

The Company's registered office is located at Suite 600 – 1285 West Broadway, Vancouver, BC V6H 3X8.

On May 23, 2014, the Company entered into a share exchange agreement with ACL Computers and Software, Inc. ("ACL") and the sole shareholder of ACL to acquire all of the issued and outstanding common shares of ACL in exchange for 72,000,000 common shares of the Company. The agreement closed on July 22, 2014, at which time ACL became a whollyowned subsidiary of the Company.

For accounting purposes, this transaction was accounted for as a reverse merger and has been treated as a recapitalization of the Company, where ACL is considered the accounting acquirer, and the financial statements of the accounting acquirer became the financial statements of the legal acquirer. The historical consolidated financial statements include the operations of the accounting acquirer for all periods presented.

For the year ended October 31, 2015, the Company has reported net losses of \$4,529,713, accumulated deficit of \$5,022,385 and working capital deficit of \$4,193,630. These financial statements have been prepared on a going concern basis, which implies that the Company will continue to meet its obligations and continue its operations for the next fiscal year. These factors raise substantial doubt regarding the Company's ability to continue as a going concern. The continuation of the Company as a going concern is dependent upon financial support from its stockholders, the ability of the Company to obtain necessary equity financing to continue operations, and the attainment of profitable operations.

Management anticipates that the Company will be dependent, for the near future, on additional investment capital to fund operating expenses. The Company intends to position itself so that it may be able to raise additional funds through the capital markets. In light of management's efforts, there are no assurances that the Company will be successful in this or any of its endeavors or become financially viable and continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

2. Significant Accounting Policies

The principal accounting policies applied in the preparation of the audited consolidated financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated.

(a) Statement of Compliance

The audited consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee.

(b) Basis of Presentation and Principles of Consolidation

The audited consolidated financial statements have been prepared on a historical cost basis. The audited consolidated financial statements are presented in United States dollars, which is the Company's functional currency.

(c) Use of Estimates and Judgments

The preparation of the financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Significant areas requiring the use of estimates include, but are not limited to, receivable allowances, impairment of intangible assets and goodwill, and deferred income tax asset valuation allowances. There are no judgments made by management in the application of IFRS that have a significant effect on the financial statements and estimates with a significant risk of material adjustment in the current and following years.

(d) Cash and Cash Equivalents

The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance, are readily convertible to known amounts of cash, and are subject to an insignificant risk of changes in fair value to be cash equivalents.

VELOCITY DATA INC.

(FORMERLY GTO RESOURCES INC.)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the years ended October 31, 2015 and 2014
(Expressed in United States dollars)

2. Significant Accounting Policies (continued)

(e) Accounts Receivable

Accounts receivable is recorded net of an allowance for expected losses. The allowance is estimated from historical performance and projections of trends. Management closely monitors outstanding balances and writes off, as of year-end, all balances that are not expected to be collected by the time the financial statements are issued.

(f) Inventory

Inventory for resale are stated at the lower of cost or market, cost being determined on a first-in, first-out basis.

(g) Property and Equipment, net

Depreciation of property and equipment is provided using the straight-line and accelerated methods over the estimated useful lives ranging from 5 to 15 years. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred.

(h) Goodwill and Intangible Assets

Goodwill represents the excess of the cost of an acquired business over the fair value of the identifiable assets acquired and liabilities assumed. Goodwill is tested for impairment on an annual basis or whenever facts or circumstances indicate that the carrying amount may exceed its recoverable amount.

Intangible assets other than goodwill are amortized on a straight-line basis over a period of three years.

(i) Impairment of Non-Financial Assets

Impairment of goodwill

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows. As a result, some assets are tested individually for impairment and some are tested at the cash-generating unit ("CGU") level. Goodwill is allocated to CGUs or groups of CGUs for impairment testing purposes based on the level at which management monitors it, which is not higher than an operating segment. The allocation is made to those CGUs or group of CGUs that are expected to benefit from synergies of the related business combination in which the goodwill arises.

2. Significant Accounting Policies (continued)

(i) Impairment of Non-Financial Assets (continued)

Impairment of other non-financial assets

Non-financial assets with finite lives are tested for impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. In addition, non-financial assets that are not amortized are subject to an annual impairment assessment. Any impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (CGUs). The Company evaluates impairment losses for potential reversals, other than goodwill impairment, when events or changes in circumstances warrant such consideration.

(j) Financial Instruments

i. Non-derivative financial assets

The Company initially recognizes loans and receivables and deposits on the date that they are originated. All other financial assets (including assets designated at fair value through profit or loss) are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risk and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Financial assets at fair value through profit or loss

Financial assets are classified as fair value through profit or loss when the financial asset is held for trading or it is designated as fair value through profit or loss. A financial asset is classified as held for trading if: (i) it has been acquired principally for the purpose of selling in the near future; (ii) it is a part of an identified portfolio of financial instruments that the Company manages and has an actual pattern of short-term profit taking; or (iii) it is a derivative that is not designated and effective as a hedging instrument.

Financial assets classified as fair value through profit or loss is stated at fair value with any gain or loss recognized in profit or loss. The net gain or loss recognized incorporates any dividend or interest earned on the financial asset. Cash and cash equivalents are classified as fair value through profit or loss.

2. Significant Accounting Policies (continued)

(j) Financial Instruments (continued)

Held-to-maturity investments

Held-to-maturity investments are recognized on a trade-date basis and are initially measured at fair value, including transaction costs. The Company does not have any assets classified as held-to-maturity investments.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are designated as available-for-sale and that are not classified in any of the previous categories. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses and foreign currency differences on available-for-sale equity instruments, are recognized in other comprehensive income and presented within equity in the fair value reserve. When an investment is derecognized, the cumulative gain or loss in other comprehensive income is transferred to profit or loss. The Company does not have any available-for-sale financial assets.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are initially recognized at fair value plus any directly attributable transaction costs. Subsequent to initial recognition loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses. Loans and receivables are comprised of accounts receivable.

Impairment of financial assets

When an available-for-sale financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income or loss are reclassified to profit or loss in the period. Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the investments have been impacted. For marketable securities classified as available-for-sale, a significant or prolonged decline in the fair value of the securities below their cost is considered to be objective evidence of impairment. For all other financial assets objective evidence of impairment could include:

- a) significant financial difficulty of the issuer or counterparty; or
- b) default or delinquency in interest or principal payments; or
- c) it becoming probable that the borrower will enter bankruptcy or financial reorganization.

- (i) Financial Instruments (continued)
 - i. Non-derivative financial assets (continued)

For certain categories of financial assets, such as accounts receivable, assets that are assessed not to be impaired individually are subsequently assessed for impairment on a collective basis. The carrying amount of financial assets is reduced by the impairment loss directly for all financial assets with the exception of amounts receivable, where the carrying amount is reduced through the use of an allowance account. When an amount receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

With the exception of available-for-sale equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized. In respect of available-for-sale equity securities, impairment losses previously recognized through profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized directly in equity.

VELOCITY DATA INC.

(FORMERLY GTO RESOURCES INC.)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the years ended October 31, 2015 and 2014

(Expressed in United States dollars)

2. Significant Accounting Policies (continued)

(i) Financial Instruments (continued)

ii. Non-derivative financial liabilities

The Company initially recognizes debt securities issued on the date that they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are recognized initially on the trade at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Company has the following non-derivative financial liabilities: accounts payable and accrued liabilities, unsecured borrowings and secured borrowings.

Financial liabilities are measured at amortized cost using the effective interest method, except for financial liabilities held for trading or designated at fair value through profit or loss, which are carried subsequently at fair value with gains or losses recognized in net earnings (loss).

iii. Share capital

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and stock options are recognized as a deduction from equity, net of any tax effects.

(k) Foreign Currency Translation

The Company's functional and reporting currency is the United States Dollar Transactions denominated in foreign currencies are translated using the exchange rate in effect on the transaction date or at an average rate. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange in effect at the statement of financial position date. Non-monetary items are translated using the historical rate on the date of the transaction. Foreign exchange gains and losses are included in profit or loss.

(I) Stock-Based Compensation

The Company measures compensation expense for all share-based payment awards, including stock options granted to employees, directors, and non-employees based on the estimated fair values on the date of each grant. The fair value of each stock option granted is estimated using the Black-Scholes-Merton option valuation model. Stock-based compensation is recognized on a straight-line basis over the requisite service period, net of estimated forfeitures.

2. Significant Accounting Policies (continued)

(m) Revenue Recognition

Revenue from product sales is measured at the fair value, net of estimated customer returns and allowances at the time of recognition. The estimates of fair value are based on the Company's historical experience with each customer and the specifics of each arrangement.

Revenue from product sales is recognized when the risks and rewards of ownership have been transferred to the buyer (which occurs either upon shipment or delivery depending on the terms of the sale) and collectability of the related receivables is reasonably assured. Revenue is recognized when (a) it can be measured reliably; (b) it is probable that the economic benefits associated with the transaction will flow to the Company; and (c) the costs incurred or to be incurred can be measured reliably.

(n) Income Taxes

Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity and not in profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred income tax is provided using the balance sheet method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and recognized only to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. Deferred income tax assets and deferred income tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

2. Significant Accounting Policies (continued)

(o) Loss Per Share

Basic loss per share is computed using the weighted average number of common shares outstanding during the period. The treasury stock method is used for the calculation of diluted loss per share, whereby all "in the money" stock options and share purchase warrants are assumed to have been exercised at the beginning of the period and the proceeds from their exercise are assumed to have been used to purchase common shares at the average market price during the period. When a loss is incurred during the period, basic and diluted loss per share are the same as the exercise of stock options and share purchase warrants is considered to be anti-dilutive. At October 31, 2015, the Company had 113,605,577 shares outstanding with 4,272,076 unexercised or unexpired shares outstanding.

(p) Recent Accounting Pronouncements

The International Accounting Standards Board ("IASB") issued a number of new and revised International Accounting Standards, International Financial Reporting Standards, amendments and related interpretations which are effective for the Company's financial year beginning on or after November 1, 2015. Many are not applicable or do not have a significant impact on the Company and so have been excluded from the list below. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

- (a) IFRS 9 Financial Instruments was issued by the IASB in October 2010 and will replace IAS 39 – Financial Instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018.
- (b) In May 2014, the IASB issued IFRS 15 which replaces IAS 18 Revenues, and covers principles for reporting about the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. IFRS 15 is effective for annual periods beginning on or after January 1, 2017.
- (c) In January 2016, the IASB issued IFRS 16 which replaces IAS 17 Leases, and specifies how to recognize, measure, present and disclose leases. IFRS 16 is effective for annual periods beginning on or after January 1, 2018.

3. Acquisition and Push Down Accounting

On February 2, 2014, ACL entered into a stock purchase agreement with ACLH, LLC ("ACLH") wherein the latter acquired a 100% interest in ACL for an initial purchase price of \$2,256,181. Of the total purchase price, \$2,006,181 was paid in cash and the balance of \$250,000 through the issuance of a note by ACLH to the sole shareholder of ACL. The note is subject to annual interest of 6% and payable in equal quarterly installments over a period of 2 years. The note was fully settled during the year ended October 31, 2014 through the payment of \$225,156. The balance of \$24,844 was forgiven and was accounted for as a reduction of the purchase price resulting in a final purchase price of \$2,231,337.

Under the acquisition method of accounting, the total estimated purchase price paid by ACLH is allocated to ACL's tangible and intangible assets and liabilities based on their estimated fair values at the date of the completion of the acquisition.

The estimated fair values of the assets acquired and the liabilities assumed by ACLH at February 2, 2014 are as follows:

Purchase price	\$ 2,231,337
Cash and cash equivalents	411,167
Acounts receivable	2,636,591
Inventory	68,938
Prepayments and other current assets	59,722
Property plant and equipment	16,202
Accounts payable and accrued liabilities	(2,212,380)
Net assets	\$ 980,240
Excess of purchase price over net assets acquired	1,251,097
Allocated to:	
Customer list	563,045
Goodwill	688,052

The acquisition was accounted for as an acquisition of a business and ACLH elected to push down the purchase price to ACL's financial statements in accordance with the Financial Accounting Standards Board's *Business Combinations (Topic 805)*. The purchase price paid plus related purchase accounting adjustments have been reflected in the Company's consolidated financial statements for the year ended October 31, 2014. This resulted in a new basis of accounting that reflects the estimated fair value of the Company's assets and liabilities. ACLH also pushed down secured borrowings of \$1,833,318 to ACL which was charged to share capital.

4. Property and Equipment, Net

Property and equipment consists of:

	October 31, 2015 \$	October 31, 2014 \$
Furniture and equipment	67,871	67,871
Leasehold improvements	23,562	23,562
	91,433	91,433
Less - accumulated depreciation	(77,969)	(76,506)
	13,464	14,927

Depreciation expense for the years ended October 31, 2015 and 2014 was \$1,463 and \$1,656, respectively.

5. Intangible Asset, Net

During the year ended October 31, 2015, the Company had a finite-lived intangible asset pertaining to a customer list which was amortized using a straight-line method over its estimated useful life of three years. During the year ended October 31, 2015, the Company recognized amortization expense of \$187,682, which is included in selling, general and administrative expenses. During the Company's annual assessment for impairment of intangible assets, the Company's projections indicated a decrease in the value of the intangible asset, thus resulting in an impairment loss of \$234,602 and an intangible asset balance of \$0 as of October 31, 2015.

6. Goodwill

Adam Radly has been the President and Chief Executive Officer, and Chairman of the Board of Directors since July 2014. Mr. Radly's fees are received by Inflexion for work performed by Radly and Inflexion staff related to IT development, digital marketing, strategic, mergers and acquisition planning, developing and executing business strategy for each subsidiary, managing senior management of subsidiaries, hiring and firing of senior management, reporting to the board of directors, reporting to major shareholders and other CEO responsibilities.

During the year ended October 31, 2015, the Company paid \$63,000 to an entity controlled by one of the Company's board of directors for the provision of certain consulting service.

9. Share Capital

Authorized: Unlimited number of voting common shares Unlimited number of preferred shares

During the year ended October 31, 2015, the Company issued 6,800,000 common shares upon the exercise of warrants for net proceeds of \$286,000.

During the year ended October 31, 2015, the Company issued 6,803,670 common shares to a former director of the Company for consulting/advisory and financing services. The Company recorded stock-based compensation expense of \$486,069 based on the price of the shares at the respective issuance dates.

Stock Options

On January 30, 2015, the Company granted an aggregate of 4,272,076 fully vested stock options to certain officers and directors, exercisable at a price of \$0.10 per share until December 15, 2019.

During the year ended October 31, 2015, the Company incurred \$225,156 in stock-based compensation expense determined using the Black-Scholes model. Assumptions used in the valuations of the options were as follows:

- 4.49 periods, as calculated from the option grant date until the option expiration date
- 1.18% risk free interest rate
 223% volatility, is the historical volatility of the Company's stock.

Summary of stock option activity for the year ended October 31, 2015 is as follows.

	Number of stock options outstanding	Weighted average exercise price	Weighted average remaing cotractural terms (in years)	Aggregate intrinsic value
Balance at October 31, 2014	-	-	-	-
Granted	4,272,076	0.10	4.49	0.07
Exercised	-			
Forfeited	-			
Balance at October 31, 2015	4,272,076	0.10	3.66	0.07

VELOCITY DATA INC.

(FORMERLY GTO RESOURCES INC.)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the years ended October 31, 2015 and 2014
(Expressed in United States dollars)

10. Share Purchase Warrants

The following table summarizes the continuity of share purchase warrants:

	Number of Warrants	Weighted Average Exercise Price
Balance, October 31, 2014	11,925,000	0.05
Exercised	(6,800,000)	0.05
Expired	(5,125,000)	0.05

Balance, October 31, 2015

11. Income Taxes

The Company uses the liability method, where deferred tax assets and liabilities are determined based on the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities or financial and income tax reporting purposes. Due to the Company's accumulated net loss, there was no provision for income taxes for the years ended October 31, 2015 and 2014. The difference between the income tax expense of \$0 shown in the consolidated statements of earnings and pre-tax book net loss times the federal statutory rate of 26% is principally change in the valuation allowance.

At October 31, 2015 and 2014, deferred tax assets consisted of the following:

	October 31,	October 31,	
	2015	2014	
	\$	\$	
Net operating loss carryforwards	1,128,286	228,233	
Less: valuation allowance	(1,128,286)	(228,233)	
2000: Middle of Allowarion	(1,120,200)	(220,200)	

In assessing the realization of deferred tax assets, management considers whether it is more likely than not that some portion of all of deferred assets will not be realized. The ultimate realization of the deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible.

Based on the available objective evidence, management believes it is more likely than not that the net deferred tax assets will not be fully realizable. Accordingly, management has applied a full valuation allowance against the Company's net deferred tax assets at October 31, 2015 and 2014. The net change in the total valuation allowance from October 31, 2015 was \$900,053.

As of October 31, 2015, the Company has federal net operating loss carry-forwards of approximately \$3,358,567, which if not utilized will expire beginning in 2032.

12. Financial Instruments and Risk Management

(a) Risk management overview

The Company's activities expose it to a variety of financial risks including credit risk, liquidity risk and market risk. This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. The Company employs risk management strategies and policies to ensure that any exposure to risk is in compliance with the Company's business objectives and risk tolerance levels. While the Board of Directors has the overall responsibility for the Company's risk management framework, the Company's management has the responsibility to administer and monitor these risks.

(b) Fair value of financial instruments

The carrying value of cash and cash equivalents, accounts receivable, accounts payables and accrued liabilities and secured borrowings approximate fair value due to the short term nature of those instruments.

(c) Credit risk

Credit risk refers to the possibility that a customer or counterparty will fail to fulfill its obligations under a contract and, as a result create a financial loss for the Company. The Company establishes an allowance for doubtful accounts as determined by management based on its assessment of collection; therefore, the carrying amount of accounts receivable generally represents the maximum credit exposure. As of October 31, 2015 and 2014, the Company has determined that no allowance for doubtful accounts is required. The provision for doubtful accounts, if any, is included in selling, general and administrative expenses in the consolidated statements of earnings (loss), and is net of any recoveries that were provided for in prior years. Credit risks also exists in cash and cash equivalents. The Company limits its exposure to credit loss by placing its cash and cash equivalents with high credit quality financial institutions.

(d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising debt or equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

(e) Market risk

Market risk is the risk that financial instruments fair values and the Company's future cash flows will fluctuate due to changes in market prices. The Company is exposed to currency risk but it does not have any significant foreign exchange rate risk.

13. Customer Concentration

Approximately 43% of the Company's revenues in the year ended October 31, 2015 were generated through transactions with two customers who also accounted for 18% of the Company's accounts receivable as of October 31, 2015.

14. Capital Management

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of cash and cash equivalents and equity comprised of issued share capital, share-based payment reserve, equity component of convertible debt, and deficit.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its Board of Directors, will balance its overall capital structure through new share issues or by undertaking other activities as deemed appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements and the Company's overall strategy with respect to capital risk management remains unchanged during the years ended October 31, 2015 and 2014.

15. Commitments and Contingencies

The Company leases its operating facilities under an operating lease expiring December 31, 2016 with options to renew. Tenant expenses for the years ended October 31, 2015 and 2014 both amounted to \$62,758. Minimum lease payments for the fiscal year ending October 31, 2016 amount to \$24,000.

16. Fraud Loss

During the year ended October 31, 2015, the Company incurred an estimated loss of \$345,000 in relation to orders placed by a fictitious customer. The Company has filed suit against the courier delivery service company and has also filed a claim with the U.S. military to recover these losses.

17. Subsequent Events

During November 2015 the Company paid off three of its five secured borrowings. The three notes were all paid off at discounts of \$80,000, \$176,000, and \$12,000, respectively.

ACL has sued Accord Financial for more than \$2.5 million in connection with excessive fees and damages associated with lost sales. As an attempt to get the company to drop its suit Accord has counter-sued ACL. The company is considering amending the complaint to add additional claims.
