

Organic Potash Corporation

June 30, 2022

Management's Discussion and Analysis ("MD&A")

October 20, 2022

Introduction

The following discussion and analysis is a review of operations, current financial position, and outlook for Organic Potash Corporation (the "**Company**" or "**OPC**") and should be read in conjunction with the audited consolidated financial statements for the year ended June 30, 2022, and 2021. Results are presented for the years ended June 30, 2022, and 2021. Amounts are reported in Canadian dollars based upon the audited consolidated financial statements prepared in accordance with International Financial Reporting Standards.

This MD&A provides management's view of the financial condition of the Company and the results of its operations for the reporting periods indicated. Additional information related to OPC is available as filed on the Canadian Securities Administrators' website at www.sedar.com.

Forward-looking information

This MD&A contains "forward-looking information" which may include, but is not limited to, statements with respect to the future financial or operating performance of the Company, the future price of resources, the estimation of resources, the realization of resource estimates, the timing and amount of estimated future production, costs of production, capital and operating expenditures, access to sufficient liquidity and capital resources, requirements for additional capital, government regulations and limitations of insurance coverage. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "foresees" or "believes" or variations (including negative variations) of such words and phrases, or state that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved.

Forward-looking statements are based on the opinions and estimates of management as of the date such statements are made and are based on assumptions. They involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance, or achievements of the Company and/or its subsidiaries to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such factors include, among others, general business, economic, competitive, political and social uncertainties; future prices of resources; possible variations recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the industry; political instability; delays in obtaining financing or in the completion of construction activities, as well as those factors discussed in the section entitled "Risk Factors" in this MD&A. Although the Company has attempted to identify important factors that could cause actual actions, events, or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events, or results to differ from those anticipated, estimated, or intended. Forward-looking statements contained herein are made as of the date of this MD&A, and the Company disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events, or result, except as may be required by applicable securities laws. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

General Development of the Business

Company Overview

The Company (originally incorporated under the name Ghana Canada Resources Inc.) was incorporated in Ontario on June 26, 2009. The Company has a former subsidiary GC Resources Ltd. (“GCR”), in which it now holds a minority position, incorporated under the laws of Ghana, with its head office located in Accra, Ghana. The Company has been engaged in the production and export of potassium carbonate produced from agricultural waste, in particular, cocoa husks. The Company trades on the Canadian Securities Exchange under the symbol OPC. In 2016 the operations are on hold pending additional funding. The address of the Company’s registered office is 10 Wilkinson Road, Suite 22, Brampton, Ontario, L6T 5B1, Canada.

On July 31, 2009, GCR entered into a license agreement with GC Technology Limited (“Technology”), acquiring the rights to manufacture and sell organic potassium carbonate produced using Technology’s patented process to manufacture industrial grade potassium carbonate from the ash of cocoa husks. As the agreement was originally signed with GC Resources Ltd., on July 1, 2014, a revised license was signed directly with OPC on the same terms and conditions save as to a renewal of the terms. The Company then sub-licensed with GC Resources Ltd. exclusively and limited to Ghana on the same date. This license continues on a month-to-month basis.

Ghana is the second-largest cocoa producer in the world and shares a border with the largest cocoa producer in the world, the Ivory Coast. The combined cocoa production of Ghana and the Ivory Coast accounts for approximately 60% of the world’s cocoa production.

Sales and Operations Update

Ghana Operations

In 2015, the Company entered into agreements with Mclean Ghana Ltd. (“MGL”) (a corporation controlled by Mr. Augustus Tanoh a director of OPC) to facilitate the receipt of funding necessary to construct and operate a production facility in Ghana. The effective date of the transaction was on November 18, 2015, upon the registrar of companies certifying the transfer of the shares.

The agreement with MGL is as follows:

- MGL will purchase fifty-five percent (55%) of the issued and outstanding shares of GC Resources Ltd. (“GC”) from OPC for the sum of one hundred Canadian dollars (\$100) and the successful raise of funds, in the form of a mixed grant and interest-free debt, from the Export Trade, Agricultural & Industrial Development Fund of Ghana (“EDAIF”) of 8,832,000 Ghana Cedis (approximately three million Canadian dollars (\$3,000,000) (“Raise of Funds”). Closing will occur on the date of the first drawdown on the EDAIF facility. As at June 30, 2022, no funds have been received.
- The conveyance of shares has occurred however the date for successful raise of funds expired. The first renewal was granted until December 31, 2016, at which time if not complete the shares were to revert to the Company. However, the Company had to extend the expiry date to June 30, 2017, due to Ghana electing a new party in Government. Loan/grant applications will be resubmitted under the new regime. After June 30, 2017, the Company continued the agreement on a month to month basis.

- OPC will maintain 50% control of the Board of GC, and it is agreed that prior to any payments being completed, approval must be received from an OPC designated representative. The CEO of OPC shall remain as Chair of GC.
- An option agreement was also executed where-in-which, after the Raise of Funds has been completed OPC may repurchase the 55% of GC, acquired by MGL, at any time, by paying MGL, one hundred Canadian dollars (\$100.00 CAD) plus three hundred and fifty thousand (350,000) common share options at \$0.05 of OPC and repaying all the amounts advanced by the EDAIF.

Ivory Coast Operations and Subscription of Shares

On November 20, 2015, the Company signed a Joint Venture Agreement (“JV”) with New Commodity Ventures (“NCV”). Under the terms of the JV, OPC and NCV will incorporate a new company (“JVco”), with each of OPC and NCV owning 50%, which will be granted an exclusive sublicense for the production and sale of potassium carbonate in the Ivory Coast. The sublicense will have a royalty rate of 5% of gross sales, payable quarterly up until US\$800,000 has been paid annually, and then the royalty will be reduced to 1.5%. The term of the license will be for the same period as OPC’s current license with GC Technology.

Under the terms of the JV, OPC will provide the license, technology expertise, marketing, and sales expertise, and such other support as may be appropriate with the design and implementation of the plant facility, without being responsible for any hard costs. NCV will be responsible to raise all funds necessary for the start-up and continued operation of the JV, not to be less than USD\$2,000,000. NCV will also be responsible for recruiting the local team, management of the day-to-day administration and operations as well as developing and structuring the supply chain in the Ivory Coast. As at June 30, 2022, the Joint Venture has not commenced operations and has no assets and liabilities.

In conjunction with the JV, NCV purchased 2,916,667 common shares of the Company at US\$0.06 per share for the total subscription value of US\$175,000.

Selected Financial Information and Management's Discussion and Analysis

This MD&A provides an analysis of the Company's financial results for the years ended June 30, 2022, 2021, and 2020. The following information should be read in conjunction with the audited consolidated financial statements of the Company for the years ended June 30, 2022, and 2021 (and the notes thereto).

Annual Information

The following table summarizes the Company's financial results for the years ended June 30:

	2022		2021		2020	
Revenue	\$	Nil	\$	Nil	\$	Nil
Finance income (loss) ⁽¹⁾		14,689		17,174		(17,483)
Net income (loss)		(49,625)		(60,172)		(97,361)
Total assets		13,444		69,126		49,945
Total long term liabilities		Nil		Nil		Nil
Cash dividends declared	\$	Nil	\$	Nil	\$	Nil

(1) Finance Income (Loss) consists of interest expense and foreign exchange gain (loss).

Discussion on Results of Annual Operations

During the year ended June 30, 2022, the Company did not complete any sales as it remained focused on financing.

The Company's net loss for the year ended June 30, 2022, was \$49,625 or \$0.00 per share (loss of \$60,172 for the year ended June 30, 2021, or \$0.00 per share).

On May 29, 2018, the Board of Directors agreed that the outstanding non-cash fees of \$1,579,943 owing to the current and former directors would be forgiven. This resulted in a gain of the settlement of debt of \$1,579,943 to be booked in the statement of income (loss) and comprehensive income (loss) for the year ended June 30, 2018.

On December 31, 2018, the Company extinguished a total of \$10,000 debentures and \$5,751 of accrued interest and recorded a gain of \$15,751 on the statement of income and comprehensive loss as a result of the extinguishment of debentures and interest.

On March 25, 2019, \$60,000 of debentures were converted to 1,500,000 common shares valued at \$45,000 that were issued to various debenture holders. A gain of \$46,398 was recorded on the statement of income and comprehensive loss as a result of the extinguishment of debentures and interest.

As of June 30, 2022, the Company had \$130,000 (June 30, 2021 - \$130,000) of debentures remaining outstanding with accrued interest of \$130,130 included in accounts payable and accrued liabilities (June 30, 2021 - \$117,130).

The other principal components of the net loss during the year ended June 30, 2022, were administrative and general expenses of \$64,314 (\$77,346 in the year ended June 30, 2021); finance costs of \$13,000 (\$13,000 in the year ended June 30, 2021); stock-based compensation of \$Nil a

non-cash expense, compared to \$nil for the year ended June 30, 2021. During the 2022 fiscal year, the Company incurred no salaries and wages expenditures.

Share-based compensation

On September 29, 2016, the Company granted 3,350,000 options to its directors. The fair value of the options granted that vested immediately have been estimated at the date of grant using the Black-Scholes pricing model with the following assumptions: the risk-free weighted-average interest rate of 1.63% and based on the full life of the option of 5 years, expected dividend yield of nil, expected forfeiture rate of nil, expected volatility of 316% and based on the annualized, weekly stock price calculated over the previous common share trading history, equal to the life of the option and expected life term of five years.

On November 20, 2019, and 29 December 2019, the granted 250,000 and 750,000 options to its directors and officers.

The variances in administrative and general expenses for the year ended June 30, 2022, as compared to the year ended June 30, 2021, are generally reflective of a normalization of the office and general expenses, professional and consulting fees, and fewer travel expenses to Africa.

General and administration decreased over the prior year ended June 30, 2021, to \$64,314 in the year ended June 30, 2022, mainly due to the fewer travel expenses to Africa. The Company plans to keep the significant cost-cutting mechanisms in place until the Company is successful with its financing. The remaining general and administration costs incurred are mostly accrued and remain payable.

Summary of Quarterly Results

The following table sets out selected unaudited financial information, presented in Canadian dollars and prepared in accordance with International Financial Reporting Standards (“IFRS”), for each of the last eight quarters ended, up to and including June 30, 2022:

Period	2022	2022	2021	2021
Ending	June 30	March 31	December 31	September 30
Revenue	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Finance Income (Loss) ⁽¹⁾	(4,462)	(3,475)	(3,277)	(3,475)
Working Capital (Deficit)	(352,209)	(401,570)	(385,266)	(367,372)
Expenses (Recovery)	(4,892)	17,989	18,359	18,169
Net Income (Loss)	4,892	(17,989)	(18,359)	(18,169)
Net Income (Loss) (per Share)	(0.00)	(0.00)	(0.00)	(0.00)

Period	2021	2021	2020	2020
Ending	June 30	March 31	December 31	September 30
Revenue	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Finance Income (Loss) ⁽¹⁾	1,201	211	26,115	(10,353)
Working Capital	(346,439)	(321,265)	(397,422)	(405,138)
Expenses	6,177	29,753	(4,468)	28,710
Net Income (Loss)	(6,177)	(29,753)	4,468	(28,710)
Net Loss (per Share)	(0.00)	(0.00)	(0.00)	(0.00)

(1) Finance Income (Loss) consists of interest expense and foreign exchange gain (loss).

Revenue

During the quarter ended June 30, 2022, the Company did not complete any sales as it remains focused on financing, seeing out joint ventures, working on restructuring operations in Ghana, and a JV in the Ivory Coast. Continuing sales is dependent on the Company obtaining financing to continue producing and marketing the products.

Finance Income (Loss)

During the quarter ended June 30, 2022, the Company incurred a financial loss of \$4,462 compared to a financial gain of \$1,201 during the three months ended June 30, 2021. The interest expense was low as most of the debentures were converted to common shares, no accretion was incurred. The remaining fluctuations related to foreign exchange differences between the Canadian dollar compared to the United States Dollar and Ghanaian Cedi resulted. A significant portion of the foreign exchange gain relates to intercompany debt.

Working Capital

The working capital deficit increased period over the period from \$346,439 in the quarter ended June 30, 2021, to \$352,209 in the quarter ended June 30, 2022, mainly due to the decrease in the cash position and accounts payables balances increase.

During the fiscal 2020 for accounting purposes under IFRS, a debt can only be removed from the Company's Consolidated Statement of Financial Position when it is extinguished, meaning only when the contract is discharged, canceled, or expires. The effect of the Limitations Act is to prevent a creditor from enforcing an obligation, but it does not formally extinguish the debt for accounting purposes. It is the position of the Company's management that the Statute-Barred Claims cannot be enforced by the creditors, do not create any obligation for the Company to pay out any cash, and do not affect the financial or working capital position of the Company. The Statute-Barred Claims are required to be reflected on the Company's Consolidated Statement of Financial Position as a result of the current interpretation of IFRS, but they are classified as long-term liabilities since the Company has no intention to pay these Statute-Barred Claims and the creditors cannot enforce their payment. While the inclusion of these items is intended solely to comply with the IFRS requirements, the Company in no way acknowledges any of the Statute-Barred Claims.

On May 29, 2018, the Board of Directors agreed that the outstanding non-cash fees of \$1,579,943 owing to the current and former directors that remained in accounts payable and accrued liabilities should be forgiven. This resulted in a gain of the settlement of debt of \$1,579,943 that was booked in the statement of income (loss) and comprehensive income (loss) at June 30, 2018.

On July 9, 2018, the Company completed the non-brokered private placement for gross proceeds of \$110,000 comprised of 5,500,000 units at a purchase price of \$0.02 per unit.

On August 27, 2018, the Company converted \$235,301 of loan payable to equity at \$0.02 per share for a total of 11,765,049 common shares. All conversions were executed by members of the Board of Directors.

The working capital had a significant increase during the year ended June 30, 2016, due to the convertible debenture. On May 31, 2015, the Company's \$870,000 in convertible debentures came due and the conversion feature expired. As the Company has been unable to raise funds to repay the debentures, it continued to accrue interest until June 8, 2016. On June 9, 2016, the Board of Directors approved offering a conversion at CDN\$0.06 per share. It also permitted the conversion of all accrued interest at this time. Thus, on June 29, 2016, a total of \$650,000 of debentures and \$154,174.50 of accrued interest were converted to 13,402,077 common shares that were issued to various debenture holders.

On July 21, 2016, a total of \$20,000 of debentures and \$4,885 of accrued interest were converted to 414,728 common shares that were issued to the debenture holders. For the year ended June 30, 2017, a gain of \$13,333 was recorded on the statement of income and comprehensive loss as a result of the extinguishment of debentures and a gain of \$3,256 as a result of the debenture interest conversion.

On December 31, 2018, the Company extinguished a total of \$10,000 debentures and \$5,751 of accrued interest and recorded a gain of \$15,751 on the statement of income and comprehensive loss as a result of the extinguishment of debentures and interest.

On March 25, 2019, \$60,000 of debentures were converted to 1,500,000 common shares valued at \$45,000 that were issued to various debenture holders. A gain of \$46,398 was recorded on the statement of income and comprehensive loss as a result of the extinguishment of debentures and interest.

As of June 30, 2022, the Company had \$130,000 (June 30, 2021 - \$130,000) of debentures remaining outstanding with accrued interest of \$130,130 included in accounts payable and accrued liabilities (June 30, 2021 - \$117,130).

Going Concern

The Company has significant negative cash flows from operations and a significant working capital deficiency. Whether and when the Company can attain profitability and positive cash flows is uncertain. These uncertainties cast significant doubt upon the Company's ability to continue as a going concern. There can be no assurance that adequate funding will be available in the future, or available under terms favourable to the Company.

The financial statements associated with this MD&A have been prepared in accordance with IFRS applicable to an entity expected to continue as a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities and commitments

other than in the normal course of business and at amounts different from those in the accompanying financial statements. Adjustments to the statement of financial position would be material if the Company was unable to continue as a going concern.

Liquidity, Capital Resources, and Financings

As at June 30, 2022, the Company had a cash balance of \$12,240 (June 30, 2020 – \$67,689) and working capital deficit of \$352,209 (June 30, 2021 - \$346,439). The Company's commitments consist of the royalty under the licensing agreement. As the Company currently has negative working capital, additional financing is required to pay for capital, operating, and administrative costs to move the business forward.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Commitments and Contingencies

The Company currently has a license agreement with GC Technology Limited ("GC Technology"), a company where a director of the Company is a director, acquiring the rights to manufacture and sell organic potassium carbonate produced using GC Technology's patented process to manufacture industrial grade potassium carbonate from the ash of cocoa husks. The licensing shall expire on June 30, 2035, and has automatic renewal for an additional 20 years. As consideration for the license granted, the Company is to pay GC Technology an ongoing royalty fee equal to 4% of the gross sales up to a maximum of US\$800,000 royalty fee per year. No payments have been made to-date under this arrangement.

Transactions with Related Parties

On May 29, 2018, the Company agreed with current and former directors that the outstanding non-cash fees of \$1,579,943 owing would be forgiven. This resulted in a gain of the settlement of debt of \$1,579,943 to be booked in the statement of income (loss) and comprehensive income (loss) at the year ended June 30, 2018.

On July 9, 2018, the Company issued 625,000 shares valued at \$12,500 to the Chief Financial Officer as compensation for services for the fiscal year 2019.

On November 20, 2019, and December 29, 2019, the Company issued 250,000 and 750,000 stock options respectively to the director and key management personnel as compensation for services.

As of June 30, 2022, the Company:

- a) As at June 30, 2022 the Company has 1,000,000 (June 30, 2021 - 1,000,000) - stock options granted to key management.
- b) has a \$24,349 balance owing to key management and remained in accounts payable and accrued liabilities and other liabilities (June 30, 2021 - \$24,349).
- c) has a balance of \$47,339 owing to a company controlled by two directors of the Company and remained in accounts payable and accrued liabilities (June 30, 2021- \$46,769).

- d) had interest-free loans from directors and senior officers of the Company and companies controlled by the directors and senior officers. The total of these loans amounts to \$59,144 (June 30, 2021 - \$59,144), and consisted of GHC 238,349, and USD\$ 7,200. Of these amounts, \$45,399 are statute-barred as of June 30, 2022 (June 30, 2021 - \$45,399).
- e) As at June 30, 2022 the Company has \$280 (June 30, 2021 - \$40,280) held in trust by the director of the company.

Outstanding Share Data

For information regarding outstanding share capital and dilutive instruments of the Company, please see the table presented below as at October 20, 2022:

Common shares	121,124,961
Stock options	1,000,000
Debentures	3,250,000

On November 20, 2019, and December 29, 2019, the Company issued 250,000 and 750,000 stock options respectively to the director and key management personnel as compensation for services.

Options issued	250,000 & 750,000
Exercise price	\$0.05 & \$0.021
Share price	\$0.01 & \$0.02
Risk-free interest rate	0.35%
Expected volatility based on historical volatility	340% and 338%
Expected life of options	5 years
Expected dividend yield	Nil
Fair value	\$2,499 & \$14,998
Fair value per option	\$0.01 & 0.02

On August 19, 2022, the Company completed the non-brokered private placement for gross proceeds of \$86,250 comprised of 3,450,000 units at a purchase price of \$0.025 per unit.

Critical Accounting Estimates

The preparation of financial statements in accordance with IFRS requires management to make judgments, assumptions, and estimates that affect the financial results of the Company. These estimates are reviewed regularly, but changes in circumstances and new information may result in actual results that differ materially from current estimates.

Significant areas requiring the use of management estimates relate to the calculation of deferred taxes, allocations to share issue costs, functional currency amounts allocated to the liability versus equity components of convertible debentures, movement from property, plant, and equipment under construction, useful life and impairment indicators, and assumptions used for the Black-Scholes option pricing model for the valuation of warrants and share-based payments.

Liquidity, Capital Resources, and Business Prospects

The audited consolidated financial statements of the Company have been prepared using accounting policies applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they fall due for the foreseeable future. For the year ended June 30, 2022, cash used in operations by the Company was \$55,449 (\$80,292 for the year ended June 30, 2021) and the Company carried an accumulated deficit of \$6,428,260 (June 30, 2021- \$6,376,318). Furthermore, the Company had not generated revenue from operations. While management can control the timing of significant capital expenditures, it has certain on-going cash obligations. At present, the Company has assessed it may have sufficient cash balance to meet required operating expenditures through the end of fiscal 2021. As such, in management's judgment there remains the existence of material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

The Company will continue to pursue opportunities to raise additional capital through equity markets and/or related party loans to fund its exploration and operating activities; however, there is no assurance of the success or sufficiency of these initiatives. The Company's ability to continue as a going concern is dependent upon it securing the necessary working capital and exploration requirements and eventually to generate positive cash flows either from operations or additional financing.

Risk Factors

The Company is exposed to a variety of risks and uncertainties, including, but not limited to the risks set out below:

No Ongoing Operations and No Production History

The Company will be a potassium carbonate producer and export company with no current or historical producing operations or revenue.

The Company's Operations are Subject to Operational Risks and Hazards Inherent in the Potassium Carbonate Industry

The Company's business will be subject to several inherent risks and hazards, including; environmental pollution, accidents or spills; industrial and transportation accidents, which may involve hazardous materials; labour disputes; power disruptions, accidents; failure of plant and equipment to function correctly, the inability to obtain suitable or adequate equipment, fires; blockades or other acts of social activism; changes in the regulatory environment; natural

phenomena, such as inclement weather conditions, underground floods, earthquakes, and technical failure of production methods. There is no assurance that these risks will not have adverse effects on the Company.

The Company Will Require Additional Capital in the Future

The Company has limited financial resources. The Company will continue to make substantial capital expenditures related to development and production. The development of the potassium carbonate manufacturing plant and related activities can require significant expenditures, with a period of time occurring before production can commence. There can be no assurance that the Company will be able to obtain necessary financing in a timely manner on commercially acceptable terms, if at all. Failure to obtain such additional financing could result in delay or indefinite postponement of the development of its potassium carbonate project.

Environmental Risks and Hazards

The Company's operations will be subject to environmental regulation in the jurisdictions in which it operates. These regulations set forth limitations on the general, transportation, storage, and disposal of waste. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments, and a heightened degree of responsibility for companies and their officers, directors, and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Company's operations.

Government Regulation

The Company's planned production and export activities may be subject to various laws governing the production, export, taxes, labour standards and occupational health, safety, toxic substances, land use, water use, land claims of local people, and other matters. Although the Company believes its production and export activities will be carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. Amendments to current laws and regulation governing operations or more stringent implementation thereof could have an impact on the Company and cause increased expenditures or reduction in levels of production.

Cocoa Husk Risks

The Company is dependent on the cocoa husks to be supplied by the cocoa farmers in Western Africa. If harm were to come to the cocoa crop through natural disasters such as flood, drought, or disease among others, the Company's ability to produce potassium carbonate could be significantly impacted. If other technologies were to be created which call for the use of cocoa husks, the Company would be exposed to competition in obtaining the husks.

Competition

The industry is competitive and the product is typically produced through the extraction of potassium carbonate or potash through mining. The Company will be competing with established potash companies in the mining industry for initial sales. The Company has no firm purchase commitments from any customers due to the early stage of operations. As the Company's potassium carbonate is produced through a manufacturing process converting cocoa husks to

potassium carbonate, customers may be hesitant with purchasing from the Company versus a competitor. Such competition may result in the Company being unable to acquire the desired entry in the market.

Political Risk

The Company's future prospects may be affected by political decisions about the potassium carbonate market. There can be no assurance that the Canadian, Ghanaian, or other government or quasi-governmental authority will not enact legislation or other rules affecting the production of potassium carbonate, or restricting to whom the Company can sell to.
