As global demand for decarbonization accelerates, the need for nuclear power is crucial. The Issuer is well positioned to capitalize on the growing demand for uranium to meet the world’s energy transition goals. Alongside and in collaboration with Denison Mines Corp. (“**Denison**”), the Issuer is committed to a disciplined exploration strategy to prove up resource on existing drill-ready targets with identified mineralization along strike of recent major discoveries.

The Issuer’s mission is to continue active exploration and development on its promising, yet underdeveloped fertile land package in the Athabasca Basin. Its portfolio includes properties that host high-grade mineralization alongside or within historical high-grade uranium deposits, as well as greenfield, near virgin territories with major upside potential.

As the world transitions towards a clean energy future, it has identified the crucial role of uranium as a low-cost fuel for emission-free electricity. The increased global demand for a net-zero environment has brought further focus to uranium as an essential component to meet global net zero targets. Foremost development plans include delivering low-cost energy fuel solutions to capitalize on the unprecedented global push to decarbonize electric grids.

The Issuer also maintains a secondary portfolio of significant lithium projects at different stages of development spanning 50,000+ acres across Manitoba and Quebec in Canada as well as its gold and silver mining property spanning one-hundred-forty-seven unpatented claims and two patented claims across almost 3,000 acres/1,214 hectares in Sierra County, New Mexico, United States (the “**Winston Property**”).

What are the business objectives that we expect to accomplish using the available funds?

Exploration and development of the Uranium Properties	From present to the end of the first quarter of 2025.	\$4,000,000

PART 3: USE OF AVAILABLE FUNDS

What will our available funds be upon the closing of the Offering?

The net proceeds of the Offering and the funds which will be available to the Issuer after the Offering are as follows:

		Assuming Maximum Offering
A	Amounts to be raised by the LIFE Offering:	\$5,000,000
B	Selling commissions and fees:	\$300,000
C	Estimated Offering costs (e.g., legal, accounting, audit):	\$45,000

D	Net proceeds of LIFE Offering: $D = A - (B+C)$:	\$4,655,000
E	Working capital as of September 30, 2024:	(\$3,096,532)
F	Additional sources of funding	\$5,500,000 ⁽¹⁾
G	Total available funds: $G = D+E+F$:	\$7,058,468

Note:

- (1) Assumes the completion of the Concurrent Private Placement for gross proceeds of up to \$4,500,000 and the exercise of the Agent's Option in full for additional proceeds of \$1,000,000.

How will we use the available funds?

The Issuer intends to use the available funds as follows:

Description of intended use of available funds listed in order of priority	Assuming Maximum Offering and 100% of Concurrent Private Placement
General corporate purposes and operating expenses:	\$1,100,000
Technical and exploration:	\$4,000,000
Repayment of indebtedness:	\$572,760
Investor relations:	\$150,000
Working capital:	\$1,235,708
Total:	\$7,058,468

Pursuant to the Option Agreement, the Issuer has committed to apply such portion of the net proceeds of all non-flow-through equity capital raises utilizing Part 5A of NI 45-106 within the twelve month period ended October 4, 2025 to the repayment of a minimum of 50% of the outstanding amounts under the Second Amended Note and use its best efforts to repay the entirety of the outstanding amounts thereunder from the net proceeds of any other non-flow-through equity capital raises during the same period. Any amounts remaining outstanding at that time will be converted to equity of the Issuer unless Denison elects to assume the loan. The loan governed by the Second Amended Note was provided for short term liquidity and working capital requirements during a period when capital markets were not receptive to incremental equity capital raises and was applied to ongoing general and administrative expenses and working capital. There was \$1,145,520 outstanding under the Second Amended Note as of October 25, 2024. The Issuer has estimated the application of \$572,760 to the repayment of indebtedness under the Second Amended Note, however the actual amount allocated to the repayment of indebtedness will be dictated by the Option Agreement and the aggregate net proceeds received on the sale of Units pursuant to the Offering.

The above noted allocation of capital and anticipated timing represents the Issuer's current intentions based upon its present plans and business condition, which could change in the future as its plans and business conditions evolve. Although the Issuer intends to expend the proceeds from the Offering and its available funds as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Issuer's ability to execute on its business plan.

The most recent audited annual financial statements and interim financial statements of the Issuer included a going concern note. Management is aware, in making its going concern assessment, of recurring losses, on-going negative cash flow and an ongoing dependence on financing activities that may cast significant

doubt on the Issuer’s ability to continue as a going concern. The Offering is intended to permit the Issuer to continue to advance its mineral properties and to fund its management and general costs and is not expected to affect the decision to include a going concern note in the next financial statements of the Issuer.

The available funds will not be paid to an insider, associate, or affiliate of the Issuer, except for normal course salaries or consulting fees that are currently or may be paid by the Issuer to its officers and/or director, except as set forth above in respect of the partial repayment of the Second Amended Note.

See “*Cautionary Note Regarding Forward-Looking Information*” section above.

How have we used the other funds we have raised in the past 12 months?

The following table sets out the particulars of how the Issuer used proceeds from financings in the 12 months preceding the Offering:

Previous Financings	Intended Use of Funds	Actual Use of Funds	(Over)/Under Expenditure
The 2024 Private Placement	The 2024 Private Placement was intended to be utilized for the drilling program at the Issuer’s Zoro property in the Snow Lake region of Manitoba and general corporate and working capital purposes.	Exploration and general corporate purposes	(\$1,337,290)

The reason for the variance for funds raised under the 2024 Private Placement is that the placement closed in two tranches of which both took longer than anticipated. As drilling had commenced previous to the closing of the first tranche, the Issuer utilized proceed originally allocated for general corporate and working capital on exploration. When the closing of the second tranche occurred, the drill program had almost completed providing a variance of \$1,337,290 that is still required to be spent on exploration on or before December 31, 2025.
