Notes to the Interim Financial Statements

March 31, 2012

(In Canadian Dollars)

1. Nature and continuance of operations

Signal Exploration Inc. (the "Company") was incorporated in the province of British Columbia on March 9, 2010. The Company is a resource exploration company that is acquiring and exploring mineral properties. On December 28, 2011, the Company completed an Initial Public Offering ("IPO") and its shares commenced trading on the TSX-Venture Exchange (TSX-V) on January 9, 2012.

These financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. As at March 31, 2012, the Company has not generated any revenue and has incurred losses since inception. The Company's continuation as a going concern is dependent on its ability to generate future cash flows and/or obtain additional financing. Management intends to finance operating costs over the next twelve months with cash on hand, loans from directors and companies controlled by directors and/or private placements of common stock. There is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

2. Significant accounting policies

(a) Basis of preparation

These Interim Financial Statements have been prepared in accordance with International Accounting Standard ("IAS 34"), Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB"). They do not include all of the information required for full annual financial statements, and should be read in conjunction with the Company's financial statements as at and for the year ended December 31, 2011. Accounting policies applied in the preparation of these unaudited interim financial statements are the same as those applied in the preparation of Company's annual financial statements for the year ended December 31, 2011. The unaudited interim financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities, which are stated at fair value.

New or amended accounting standards that have been issued by the IASB but are not yet effective, and have not been applied by the Company, are as outlined in Note 2 of the 2011 annual financial statements.

These unaudited interim financial statements were authorized for issue by the Board of Directors on May 16, 2012.

(b) Use of estimates and judgments

The preparation of the Company's financial statements in conformity with International Financial Reporting Standards ("IFRS") requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Significant areas requiring the use of estimates include the recoverability of exploration and evaluation assets, fair value of stock-based compensation, and deferred income tax asset valuation allowances.
