1. Nature of Operations

Zadar Ventures Ltd. ("Zadar" or the "Company") was incorporated on August 6, 2008 under the Business Corporations Act of British Columbia and its principal activity is the exploration of mineral properties. Zadar is a public company with shares listed on the TSX Venture Exchange. The head office, principal address and records office of the Company are located at Suite 1100 – 888 Dunsmuir Street, Vancouver, British Columbia, Canada, V6C 3K4.

Going concern of operations

These financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred $4,938,708 of losses since its inception and the ability of the Company to continue as going-concern depends on its ability to raise adequate financing and to develop profitable operations. This creates a material uncertainty and raises significant doubt about the Company's ability to continue as a going concern.

Management is actively targeting sources of additional financing. Although the Company has been successful in past financings, there is no assurance that future financings will be successful. As the Company is in the exploration and evaluation stage, the Company has not identified a known body of commercial grade mineral on any of its properties. The ability of the Company to realize the costs it has incurred to date on these properties is dependent upon the Company identifying a commercial mineral body, to finance its development costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the property.

2. Basis of Preparation

These interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The interim financial statements should be read in conjunction with the annual financial statements for the year ended July 31, 2015, which have been prepared in accordance with IFRS as issued by the IASB.

The accounting policies adopted are consistent with those of the previous financial year. The interim financial statements were approved by the Board of Directors on April 1, 2016.

All dollar amounts are presented in Canadian dollars unless otherwise specified.

3. Investment

		January 31 2016		July 31 2015
Cost	**$**	**1,248,000**	$	1,248,000
Fair value adjustments		**(1,190,615)**		(1,072,173)
Total	**$**	**57,385**	$	175,827

3. Investment (continued)

On January 21, 2014, the Company acquired 676,129 shares of Global Resources Investment Trust ("GRIT") valued at £1.00 each, in consideration for 4,160,000 shares of the Company valued at $0.30 each. The GRIT shares trade through the facilities of the London Stock Exchange.

On acquisition, the GRIT shares were valued at $1,248,000. The GRIT shares have been designated as held for trading and are recorded at fair value, with unrealized gains and losses recognized in profit or loss. At January 31, 2016, the fair value of the GRIT shares is $57,385.

The fair value of GRIT has been determined by reference to published price quotations in an active market.

While the Company will seek to maximize the proceeds it receives from the sale of its GRIT Shares on the London Stock Exchange, there is no assurance as to the timing of disposition or the amount that will be realized. Funds realized from the sale of the GRIT Shares will be used by the Company for working capital and general corporate purposes.

4. Exploration and Evaluation Assets

Whiskey Gap

The Company entered into an option agreement with 1177129 Alberta Ltd., (the "Optionor"), a company controlled by a company having an officer in common with Zadar, in April 2010, subsequently amended May 30, 2011, September 30, 2011, June 1, 2012 and November 19, 2014, to acquire up to a 100% interest in certain mineral interests located in Alberta, known as the Whiskey Gap Project.

To earn a 60% interest, the Company must make payments and issue shares as follows:

a) $12,500 (paid) and issue and allot to the Optionor 100,000 shares of the Company (issued);

b) on or before the first anniversary of the execution of the Agreement, a further $12,500 (paid) and issue and allot to the Optionor a further 200,000 shares (issued);

c) on or before the second anniversary of the execution of the Agreement, a further $25,000 (paid) and issue and allot to the Optionor a further 300,000 shares (issued);

d) on or before September 30, 2010, the Company shall expend not less than $100,000 on Exploration Expenditures on the Property; (incurred)

e) on or before June 30, 2012, the Company shall pay $100,000 to the Optionor (paid);

f) on or before December 31, 2012, the Company shall pay a further $50,000 (paid) and issue and allot to the Optionor a further 500,000 shares (issued).

4. Exploration and Evaluation Assets (continued)

The Company has a further option to acquire the remaining 40% interest in the Property by paying the Optionor $100,000 and by issuing the Optionor an additional 1,000,000 shares (issued, fair value of $250,000) on or before September 30, 2015, which was extended by the Optionor until September 30, 2016.

Upon earning a 60% interest by making the cash payments, issuing the shares, and incurring the exploration expenditures as set out above and electing not to acquire any further interests after earning 60%, the Company and the Optionor will form a joint venture with standard dilution clauses.

At July 31, 2015, management has decided to write the costs accumulated on the property down to $10,000 as an asset impairment. While management still believes that the property is of merit and warrants continued development, lack of activity due to market conditions, and difficulty obtaining financing, necessitates a write down at this time in line with the Company's accounting policy for exploration and evaluation assets.

e) $250,000 cash payment by the earlier of April 12, 2019 or upon receipt of a NI 43-101 report indicating resources of a minimum 250,000 lbs of uranium deposits on the property.

Option pricing models require the input of highly subjective assumptions, particularly the expected stock price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

(d) Share purchase warrants

The Copmany has 23,500,000 share purchase warrants outstanding, which entitle the holder to one common share of the company for an exercise price of $0.05 until December 23, 2018.

6. Financial Instruments and Risk Management

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company's cash and due from related parties are subject to credit risk. The Company manages credit risk by placing cash with major Canadian financial institutions. Management believes that credit risk related to these amounts is nominal.

6. Financial Instruments and Risk Management (continued)

Liquidity risk

Liquidity risk arises from the excess of financial obligations over available financial assets due at any point in time. The Company's approach to managing liquidity risk is to try to have sufficient liquidity to meet liabilities when due. As at January 31, 2016, the Company had a cash balance of $98,447 to settle current liabilities of $359,793. All of the Company's accounts payable and accrued liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms. To maintain liquidity, the Company is currently investigating financing opportunities. Management intends to continue to finance its activities by raising funds by private equity investments. While the Company has been successful in obtaining its required funding in the past there is no assurance that this financing will be extended or that any additional future financing will be available. The Company is exposed to risk that it will encounter difficulty in satisfying its liabilities. The Company may mitigate this risk by selling its investment to cover its current liabilities.

Market risk
