PRESS RELEASE: FOR IMMEDIATE RELEASE

TARTISAN NICKEL CORP. PROVIDES UPDATE ON THE 10,000 METER DRILL PROGRAM AT THE KENBRIDGE NICKEL DEPOSIT AND GRANTS STOCK OPTIONS

Toronto, Ontario, August 10, 2021 – Tartisan Nickel Corp. (CSE:TN, OTC:TTSRF, FSE:A2D) (“Tartisan”, or the “Company”) is pleased to provide an update on the exploration program at the Company’s flagship Kenbridge Nickel Property where a 10,000 meter diamond drilling program is in progress. The drill program is designed to test the on strike and down dip potential for additional nickel sulphide mineralization to enhance the size and grade of the Kenbridge Deposit.

As previously reported, two drill rigs have been mobilized to the site and are currently operating. A total of 3,200m of drilling has been completed to date (32% of the proposed 10,000m program). The first 3 drill targets have been completed (drill holes 198, 199 and 200 outlined on attached diagram) and a total of 137 samples have been delivered to TSL Labs in Saskatoon, Saskatchewan for analysis. The drill rigs are currently drilling the 4th and 5th drill holes (201 and 202).

Tartisan CEO Mark Appleby states, “The Tartisan 2021 drill program is testing multiple high probability targets as we look to add to the Mineral Resource Estimate at the Kenbridge Deposit, and additionally have proposed drilling a 400 meter conductor at the Kenbridge North site. Tartisan is committed to the rapid advancement of the Kenbridge Nickel Project, a source of the critical metals (nickel & copper) required for electric vehicles and battery storage to the North American supply chain”.

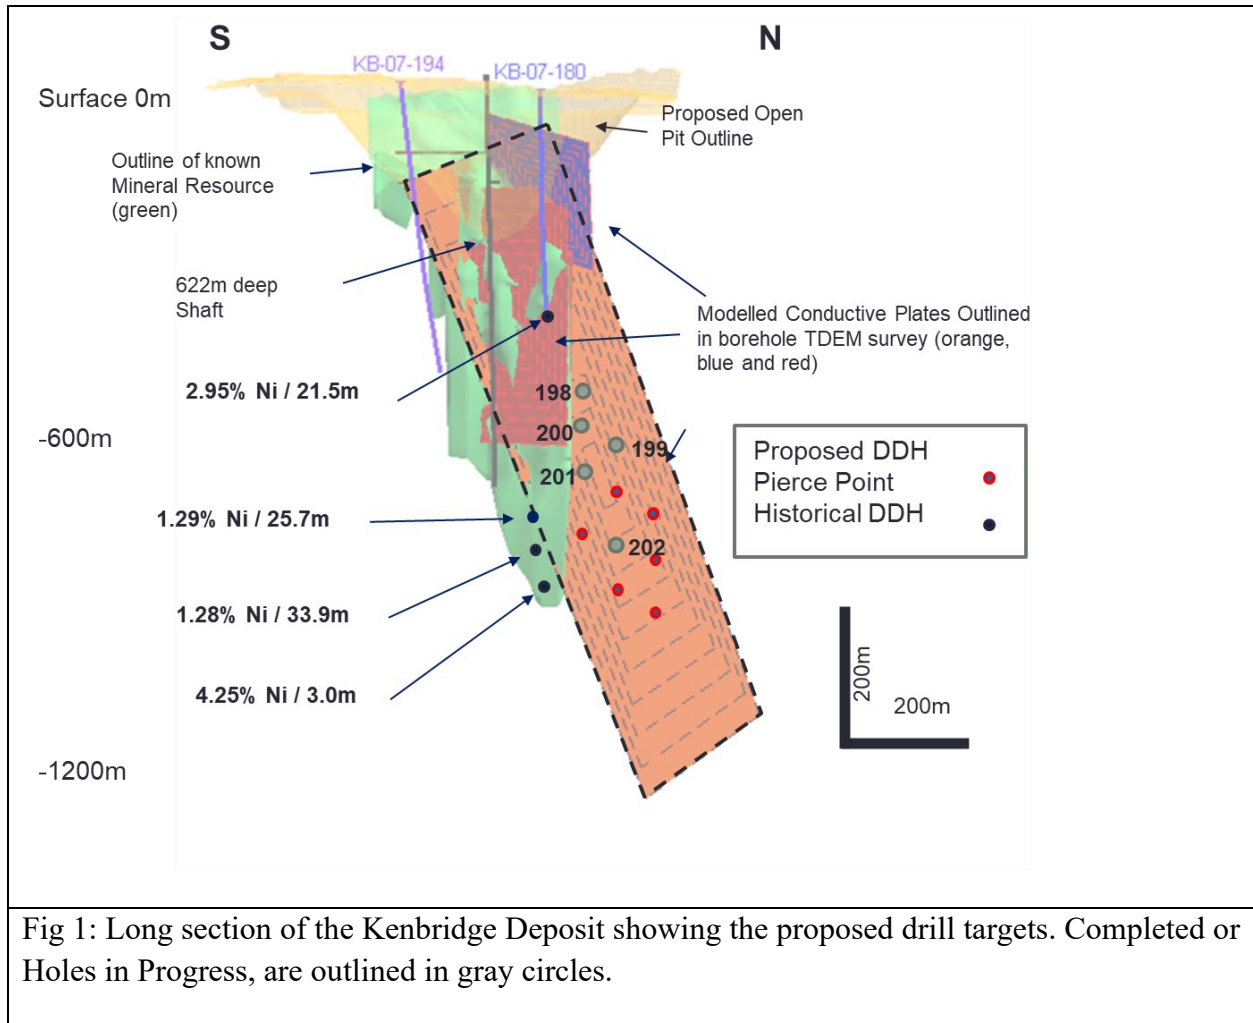

Fig 1: Long section of the Kenbridge Deposit showing the proposed drill targets. Completed or Holes in Progress, are outlined in gray circles.

Grant of Stock Options

The Company also reported today that two million stock options have been granted to directors, officers, and consultants to the Corporation, exercisable for a period of five years, at the exercise price of sixty cents per share.
