WINSTON RESOURCES COMPLETES NI43-101 TECHNICAL REPORT ON ETAMAME NICKEL PROJECT

Toronto, Ontario, July 23, 2012 - Winston Resources Inc. (CNSX: WRW) ("Winston") is pleased to announce that it has received a NI43-101 Technical Report (the "Report") on its 100% owned Etamame Nickel Project ("Etamame"). The Report was prepared by the Sibley Basin Group and authored by Alan Aubut P. Geo, and incorporates the VTEM AEM survey conducted by Geotech, and an interpretation report and drilling recommendation analysis by Stephen Balch, consulting geophysicist at Balch Exploration Consulting ("Balch")

The Report recommends that the most significant electromagnetic targets, with a close magnetic association, be tested by drilling. It concurs with the recommendations made by Balch for a minimum diamond drilling program of 1,250 meters with 10 exploration drillhole locations. Further, it recommends a drilling budget of \$600,000. The full report is available for review on Winston's profile on Sedar and on its website www.WinstonResourcesInc.com

"This NI43-101 Report confirms our belief that Etamame represents a highly prospective potential nickel deposit that justifies a drilling program, and we intend to follow the recommendations of the report and plan to drill the project accordingly" said Danny Wettreich, CEO of Winston.

Etamame is located in the Lingman Lake Greenstone belt area about 47 kilometres west of Sachigo Lake in Northwestern Ontario, Canada, and consists of 10 claim blocks totalling 142 claim units that have not previously been drilled. Winston acquired the project on June 27, 2012, as well as the Geotech airborne survey, and commissioned the Report to provide a framework upon which a project development program can be established.

Alan Aubut, P. Geo., the author of the Etamame Technical Report, is the Qualified Person responsible for the scientific and technical work (as defined under National Instrument 43-101) discussed in this press release, and has reviewed and approved the content herein. Mr. Aubut is independent of Winston Resources Inc.

About Winston Resources

Winston is a Toronto based mineral company primarily focused on developing its 100% owned Elmtree Gold Project in New Brunswick, Canada, as well as the acquisition and development of other Canadian natural resource properties from joint ventures.
