ACANA SIGNS ACCESS AGREEMENT

Surrey, British Columbia, Canada /March 25, 2015/ CSE:APB/ ACANA CAPITAL CORP. ("Acana" or the "Company") is pleased to announce, further to our press release of November 29, 2014, negotiations regarding an agreement to access and exploit a large mass of magnesium-silicate ore (serpentinite) in Danville, Quebec, Canada have been completed and an "Access Agreement" has been entered into by the Company with the owner of the site, which provides the Company with access to mine and extract 30 million tonnes of ore. The Company intends to obtain and utilize the ore as raw material for the production of magnesium related products and estimates this amount of raw material will be sufficient for roughly 70 years, at an annual production rate of 100,000 tonnes of Mg ingots annually. The test results of the tailings indicate a Mg content averaging 23%.

In addition, the Agreement allows Acana to lease a plant production site near the tailings deposit.

The agreement calls for Acana to provide a \$25,000 non-refundable deposit which has been sent with a closing June 30, 2015 at which time a further \$75,000 is required. A royalty of \$1.50/tonne on the first 20,000,000 tonnes is to be paid to the owners.

Information regarding the Company can be found on SEDAR at www.SEDAR.com, and by visiting the Canadian Securities Exchange website at www.thecse.com.

On behalf of the Board
