
For Immediate Release.

**MAG ONE PRODUCTS INC. IS A
MAGNESIUM PRODUCTION AND TECHNOLOGY COMPANY**

VANCOUVER, BRITISH COLUMBIA, CANADA/22 March 2016 [CSE:MDD FSE:304 OTCQB:MgPRF]

MAG ONE PRODUCTS INC. (“Mag One” or “Company”) wishes to underscore that it is a magnesium (Mg) production and technology company that will use an already-mined resource (serpentinite tailings) in the Danville area of Quebec to manufacture 99.9% pure Mg ingots and ultra-pure Mg compounds. Mag One is not a mining/exploration company.

At the Company’s proposed plant site near Danville, there are more than 300 million tonnes of serpentinite tailings. It was disclosed in previous Mine Jeffrey and Magnola reports that the tailings are compositionally uniform throughout, with an estimated 22% Mg content. Mag One has already secured 30 million tonnes of these tailings and this amount alone is sufficient for 70 years of Mg ingot production at Mag One’s target manufacturing rate of 100,000 tonnes of Mg per annum. Significantly, many more tonnes of tailings are available to Mag One if ultimately required. But Mag One stresses that simply having a large mass of Mg ore is not the “key to the mint.” The Company’s innovative, proprietary, game-changing, patent- and patent application-protected production process and modular plant concept are the keys to competing successfully in today’s world markets.

To reconfirm the consistency and quality of its ore, Mag One retained a geo-metallurgical company to characterize a portion of the tailings. The geologist from this company reported that, “The magnesium is part of the ‘whole rock’ chemistry that is very homogeneous compared to other mineral resources. The variability is in the minerals present but all contain approximately the same amount of Mg, 22% +/- 1%.” The sampling work involved digging 3m x 120m trenches spaced 50m apart, along with 18 test pits. A total of 96 samples were taken, and those analyzed so far contain an average of 23 wt. % Mg.

“Nelson M. Skalbania, B.Ap.Sc., M.Sc., P.Eng.”

Chairman of the Board
