

## **CERTIFICATE OF QUALIFICATION**

**I, Christian Derosier, of the City of Saint-Lazare, Province of Quebec,**

do hereby certify that :

1. I am a Senior Geologist with a business address at: 1957 montée Harwood, Saint-Lazare, Quebec;
2. I am responsible for the preparation of the technical report titled "Magnesium Bearing Waste Dumps Project, National Instrument Form 43-101F1 Technical Report, Jeffrey Mine Tailings" and dated September 25th, 2017 for Mag One Products Inc. of Montreal, Quebec;
3. I have graduated and obtained a D.Sc. degree in geological sciences at the University of Paris, France, in 1971. I have practiced my profession since that time and have worked for SNC-Lavalin Inc. during ten years, Rio Algom Ltd from 1982 to 1986 and then as consulting geologist for my own Company;
4. I have more than 49 years of experience in mining exploration and mining development. I worked on several pre-feasibility and feasibility studies in my quality of geologist or consulting geologist. I have prepared and made numerous mineral resource and reserve calculations for productive mines as well as developed precious metals, base metals and industrial minerals projects. I am well aware of the different methods of calculation and the geostatistics applied to metallic and non-metallic projects as well as industrial mineral projects. To date, I have spent more than six doing resource and reserve calculations;
5. I have several years of experience in underground mining and surface exploitation (open-pits and quarries) in Canada and abroad, for different commodities including: gold, silver, copper, Iron-titanium-vanadium, limestone, asbestos, bauxite, copper-nickel, phosphate, salt, coal, copper-zinc, silica sands, vermiculite, micas, talc, graphite, feldspars and construction stones (granite and anorthosite);
6. While employed by SNC-Lavalin Inc. In the 70's, I have been involved in the feasibility of asbestos deposits in Canada, USA, Morocco and Algeria, from the exploration stage to the construction of the mill. All asbestos samples needed to be treated in the Quebec Government's pilot plant with the Quebec Standard Test (ASTM D3639), the Turner and Newall Testing method and/or the McNett Wet classification of Asbestos Fibers (ASTM D25989). Those mineral processing tests were made under my supervision. From April 1997 to June 2000, as president and CEO of Raudin de Venezuela S.A., I supervised and managed the rehabilitation of a 75 tonnes per day carbon in pulp plant and a 150 tonnes per day heap leach facility, in El Callao, Venezuela, helped in that task by Venezuelan and Kilkorn-SNC-Lavalin metallurgists and hydrometallurgists engineers.
7. I am a member of the Ordre des Géologues du Québec (No 129);
8. The author visited the property on February 6th, 2017;
9. I have visited the Jeffrey Mine several times in the 60's and 70's but I have never been involved in the development or the exploitation of the property which is the object of the present Technical Report.

10. I have read the definition of “Qualified person” set out in the National Instrument 43-101 (“NI 43-101”) and certify that by reason of my education, affiliation with a professional association (as defined in NI 43-101) and past and relevant work experience, I fulfill the requirements to be a “Qualified Person” for the purposes of NI 43-101.
11. I have prepared several Items of this report in accordance with the guidelines of National Instrument 43-101 (Standard of Disclosure for Mineral Projects);
12. I have prepared and is responsible for the following Items: Item 6, 7, 8, 9, 10, 15, and 17 and jointly responsible for Items 3, 24, 25, 26 and 27 of the Report;
13. I have read the Instrument NI 43–101 and the Technical Report including the parts that I am responsible for. This Technical Report has been prepared in compliance with that Instrument;
14. I have no interest, either direct or indirect, in the property described in the present report and I do not expect to receive any interest. I have no shares of **Mag One Products Inc.**, nor do I expect to receive any interest in the securities of this Company. I am independent from the issuer and the vendors (Jeffrey Mine), applying all of the tests in section 1.4 of National Instrument 43-101;
15. That the present report is based on a study of data available on the property obtained from the Quebec Government, and from the Company. Prior to the present report, I have never been involved with the Jeffrey Mine Serpentinite Tailings that is subject of the Technical Report;
16. I am not aware of any material fact or material change with respect to the subject matter of this Technical Report that is not reflected in the Technical Report, the omission to disclose which would make this report misleading;
17. That as of September 25th, 2017 to the best of my knowledge, information and belief, the technical report contains all scientific and technical information that is required to be disclosed to make the technical report not misleading;
18. The writer consents to the filing of the Technical Report with any stock exchange or other regulatory authority and any publication by them for regulatory purposes, including electronic publication in the public company files on their websites accessible by the public, of the Technical report.

Saint Lazare

Dated: September 25th, 2017

Christian Derosier, P. Geol. # 129

Senior Geologist, MSC., DSc.,
