Management's Discussion and Analysis of Financial Position and Results of Operations
For the period ended June 30, 2018.

Going Concern

As at June 30, 2018, the Company is not able to finance day to day activities through operations. The continuing operations of the Company are dependent upon its ability to identify a viable business opportunity. This indicates the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. Management intends to finance operating costs with loans from directors and companies controlled by directors and or private placement of common shares. Should the Company be unable to continue as a going concern, the net realizable value of its assets may be materially less than the amounts on its statement of financial position.

Liquidity and Capital Resources

As at June 30, 2018, the Company's working capital deficiency increased to \$136,043 (September 30, 2017 – \$120,073) as a result of expenses during the period. As at June 30, 2018, the Company had cash on hand of \$3,481 (September 30, 2017 - \$729).

Financial Instruments

The Company's financial instruments consist of cash. It is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair values of the financial instruments approximate their amortized cost value due to their short-term nature. Cash is stated at cost plus accrued value, which approximates market value. Investments of cash are of sufficient quality and diversity to ensure a high probability of liquidity at the accrued value, at such times as needed to meet financial obligations.
