#### 1. Nature and Continuance of Operations

Phoenix Gold Resources Corp. (formerly Zuri Capital Corp. ("Zuri")) was incorporated on May 2, 2011 under the laws of the province of British Columbia, Canada. Zuri commenced trading on the TSX Venture Exchange as a Capital Pool Company on March 19, 2012. On April 23, 2014, Zuri was acquired by Phoenix Gold Resources Ltd. ("Phoenix") in a reverse takeover transaction and as a result Zuri carries on the business of Phoenix and continues pursuant to the laws of British Columbia. Hereafter Phoenix and the combined business of Phoenix and Zuri after the date of the RTO is referred to as the "Company" or "PXA". These condensed interim consolidated financial statements reflect the financial position, operating results and cash flows of the Company's legal subsidiary, Phoenix. Effective April 23, 2014, Zuri changed its name to Phoenix Gold Resources Corp. and resumed trading on April 25, 2014 on the TSX Venture Exchange with the trading symbol "PXA". The Company's registered address is Suite 700 – 595 Burrard Street, Vancouver, British Columbia, Canada, V7X 1S8.

The Company is a TSX Venture Exchange ("Exchange") tier 2 listed mineral exploration and development company with its principal business focusing on the acquisition and exploration of the gold mineral rights located in Nevada, USA.

#### 2. Going Concern

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future.

The Company's long term continuance is dependent on obtaining sufficient external financing (predominantly through the issuance of equity to the public). To date, the Company has not generated any revenue from operations and is considered to be in the exploration stage. As at October 31, 2016, the Company had an accumulated deficit of \$3,812,840(January 31, 2016 – \$3,663,276), and hadnegative working capital of \$2,128,811 (January 31, 2016 – negative working capital of \$1,882,119). These condensed interim consolidated financial statements do not reflect adjustments to the carrying value of assets, liabilities, the reported expenses and financial position classifications used that might be necessary if the going concern assumption were not appropriate.

#### 3. Significant Accounting Policies

The accounting policies set out below have been applied consistently to all periods presented in these condensed interim consolidated financial statements.

#### a) Statement of compliance to IFRS

These condensed interim consolidated financial statements have been prepared in accordance with IFRS, as issued by the International Accounting Standards Board. The policies applied in these condensed interim consolidated financial statements are based on IFRS issued and outstanding as at December 21, 2016 the date the Board of Directors approved these condensed interim consolidated financial statements for issue.

#### b) Basis of presentation

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34, Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards ("IFRS"). Accordingly, certain disclosures included in annual financial statements prepared in accordance with IFRS have been condensed or omitted and these unaudited condensed interim consolidated financial statements should be read in conjunction with the Company's audited financial statements for the years ended January 31, 2016 and 2015.

These condensed interim consolidated financial statements include the accounts of Phoenix Gold Resources Corp. and its wholly-owned subsidiaries, Phoenix and Phoenix USA. All intercompany transactions, balances, and unrealized gains and losses on intercompany transactions have been eliminated. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Where control of an entity is obtained during a financial period, its results are included in the consolidated statement of loss and comprehensive loss from the date on which control commences. Where control of an entity ceases during a financial period, its results are included for that part of the period during which control existed.

#### c) Functional currency translation

#### i) Functional and presentation currency

Items included in the financial statements of each consolidated entity in the group are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The condensed interim consolidated financial statements are presented in Canadian dollars, which is the reporting parent's and Phoenix's functional currency. The functional currency of the reporting parent's subsidiary, Phoenix USA, is the United States dollar ("USD").

#### 3. Significant Accounting Policies (cont'd)

#### c) Functional currency translation (cont'd)

The financial statements of entities that have a functional currency different from that of the reporting parent's operations are translated into Canadian dollars as follows: assets and liabilities – at the closing rate at the date of the consolidated statement of financial position, and income and expenses – at the average rate for the period (as this is considered a reasonable approximation to the actual rates). All resulting changes are recognized in other comprehensive income or loss as cumulative translation adjustments.

When an entity disposes of its entire interest in a foreign operation, or loses control, joint control, or significant influence over a foreign operation, the foreign currency gains or losses accumulated in other comprehensive income or loss related to the foreign operation are recognized in profit or loss. If an entity disposes of part of an interest in a foreign operation which remains a subsidiary, a proportionate amount of foreign currency gains or losses accumulated in other comprehensive income related to the subsidiary are reallocated between controlling and non-controlling interests.

#### ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Generally, foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in currencies other than an operation's functional currency are recognized in the consolidated statement of loss and comprehensive loss.

#### d) Measurement Uncertainty

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of the accounting policies to financial information presented. Actual results may differ from the estimates, assumptions and judgements made. Estimates and underlying assumptions are reviewed on an ongoing basis. Changes made to estimates are reflected in the period the changes are made.

#### 3. Significant Accounting Policies (cont'd)

#### d) Measurement Uncertainty (cont'd)

Significant areas requiring the use of estimates and assumptions include accounts payable and accrued liabilities, valuation of share-based payment reserves, warrant reserves, valuation of mineral rights, and recoverability of deferred tax assets. By their nature, these estimates and assumptions are subject to measurement uncertainty, and the impact of changes in estimates in the financial statements of future period could be material. These assumptions are reviewed periodically and, as adjustments become necessary, they are reported in earnings (loss) in the periods in which they become known.

#### e) Significant accounting judgements

The critical judgements that the Company's management has made in the process of applying the Company's accounting policies, apart from those involving estimations (note 3(d)), that have the most significant effect on the amounts recognized in the Company's condensed interim consolidated financial statements are related to the economic recoverability of the mineral rights, determining the smallest group of assets that generates independent cash flow stages of exploration, the interpretation and application of tax laws, the determination of functional currency for the Company and its subsidiaries, and the assumption that the Company will continue as a going concern.

#### f) Financial instruments

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

#### 3. Significant Accounting Policies (Cont'd)

#### f) Financial instruments (Cont'd)

At initial recognition, the Company classifies its financial instruments in the following categories depending on the purpose for which the instruments were acquired:

#### i) Financial assets and liabilities at fair value through profit or loss

A financial asset or liability is classified in this category if acquired principally for the purpose of selling or repurchasing in the short-term. Derivatives are also included in this category unless they are designated as hedges. The Company's cash is designated in this category.

Financial instruments in this category are recognized initially and subsequently at fair value. Transaction costs are expensed in the statement of income (loss). Gains and losses arising from changes in fair value are presented in the statement of income (loss) within other gains and losses in the period in which they arise.

#### ii) Available-for-sale investment

Available-for-sale investments are non-derivatives that are either designated in this category or not classified in any of the other categories. The Company at this time does not have any financial instruments in this category.

Available-for-sale investments are recognized initially at fair value and subsequently at fair value. Gains or losses arising from changes in fair value are recognized in other comprehensive income (loss). Available-for-sale investments are classified as non-current, unless the investment matures within twelve months, or management expects to dispose of them within twelve months.

Interest on available-for-sale investments, calculated using the effective interest method, is recognized in the statement of loss as part of interest income. Dividends on available-for-sale equity instruments are recognized in the statement of loss as part of other gains and losses when the Company's right to receive payment is established. When an available-for-sale investment is sold or impaired, the accumulated gains or losses are moved from accumulated other comprehensive income (loss) to the statement of loss and included in other gains and losses.

#### 3. Significant Accounting Policies (Cont'd)

#### f) Financial instruments (Cont'd)

#### iii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Company's loans and receivables are comprised of other receivables, and are included in current assets due to their short-term nature. Loans and receivables are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method less a provision for impairment, if any.

#### iv) Held to maturity investments

Held to maturity investments are non-derivative financial assets with no fixed or determinable payments and fixed maturities that the Company's management has the intention and ability to hold to maturity. These assets are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method. The Company at this time does not have any financial instruments in this category.

#### v) Other financial liabilities

Other financial liabilities are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

The Company has classified its accounts payable and accrued liabilities, promissory note payable, and advances from related companies as other financial liabilities. Financial liabilities are classified as current liabilities if payment is due within twelve months. Otherwise they are presented as non-current liabilities.

#### g) Impairment of financial assets

At each reporting date, the Company assesses whether there is objective evidence that a financial asset is impaired. If such evidence exists, the Company recognizes an impairment loss, as follows:

The loss is the difference between the amortized cost of the financial asset and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. An impairment loss on an available for sale financial asset or fair value through profit or loss financial asset is calculated by reference to its fair value. The carrying amount of the asset is reduced by this amount either directly or indirectly through the use of an allowance account. The amount of the impairment is recognized in net loss.

#### 3. Significant Accounting Policies (Cont'd)

#### g) Impairment of financial assets (Cont'd)

Impairment losses on financial assets carried at amortized cost may be reversed in subsequent periods if the amount of the loss decreases and the decreases can be related objectively to an event occurring after the impairment was recognized. Financial assets measured at amortized cost and available for sale financial assets that are debt securities are reversed through profit and loss. For available for sale financial assets that are equity securities, the reversal is recognized in other comprehensive income.

#### h) Revenue recognition

Revenue will be recorded when consideration is received or receivable and will be recognized to the extent that it is probable that the economic benefits will flow to the Company and when the revenue can be reliably measured.

Interest income will be recognized as it accrues.

#### i) Comprehensive income or loss

Comprehensive income or loss is the change in equity of an enterprise during a period from transactions, events and circumstances other than those under the control of management and the owners. It includes all changes in equity during a period except those resulting from investments by owners and distributions to owners. The Company reports comprehensive income (loss) in its statement of loss and comprehensive loss and its statement of changes in equity (deficiency).

#### j) Income taxes

Income tax expense comprises current and deferred income taxes. Income tax expense is recognized in profit and loss except to the extent that it relates to equity transactions, in which case it is recognized in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

#### 3. Significant Accounting Policies (Cont'd)

#### i) Income taxes (Cont'd)

Deferred taxes are recorded using the statement of financial position liability method. Under the statement of financial position liability method, deferred tax assets and liabilities are recognized for future tax consequences attributable to unused tax losses and unused tax credits and differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. The following temporary differences are not provided for: the initial recognition of goodwill; the initial recognition of assets or liabilities in a transaction that affects neither accounting nor taxable loss and is not a business combination; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future.

Future tax assets and liabilities are measured using the enacted or substantively enacted tax rates expected to apply when the asset is realized or the liability settled.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the unused tax losses and unused tax credits and temporary differences can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized. Any such reduction will be reversed to the extent that it becomes probable that sufficient taxable profit will be available.

#### k) Non-monetary transactions

Transactions with no cash consideration are measured at the fair value of either the asset given up or the asset received, whichever is more reliably determinable.

#### I) Loss per share

Basic loss per share is calculated by dividing the net loss available to common shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share reflect the potential dilution of securities that could share in earnings of an entity. In a loss year, potentially dilutive common shares are excluded from the loss per share calculations as the effect would be anti-dilutive.

#### m) Identifiable intangible assets

The Company is in the exploration stage and defers all expenditures related to its acquired mineral rights until such time as the property is put into commercial production, sold or abandoned. Under this method, the amounts reported represent costs incurred to date less amounts amortized and/or written off, and do not necessarily represent present or future values.

#### 3. Significant Accounting Policies (Cont'd)

#### m) Identifiable intangible assets (Cont'd)

i)Pre-Exploration

Pre-exploration costs in areas where a legal right to explore has not been obtained are expensed as incurred.

#### ii) Exploration and evaluation expenditures

Exploration and evaluation ('E&E') costs incurred after the legal right to explore is obtained, but before technical feasibility and commercial viability of the project has been demonstrated are capitalized as E&E assets. These include the costs of acquiring the licenses and directly attributable general and administrative costs. All applicable costs are capitalized as either tangible or intangible E&E assets depending on the nature of the assets acquired. The costs are accumulated in cost centers by exploration area.

#### iii) Development and production costs

When technical feasibility and commercial viability of a property is established and the Company determines that it will proceed with development, all E&E costs attributable to that area are reclassified to construction in progress within property, plant and equipment or as intangible assets depending on the nature of the expenditure. If economically recoverable ore deposits are developed, the capitalized costs of the related property will be amortized using the unit-of-production method following the commencement of production.

#### n) Impairment of non-financial assets

Non-financial assets are reviewed for impairment if there is any indication that the carrying amount may not be recoverable. If any such indication is present, the recoverable amount of the asset is estimated in order to determine whether an impairment exists. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit ("CGU") to which the asset belongs. Any intangible asset with an indefinite useful life is tested for impairment annually and whenever there is an indication that the asset may be impaired.

A CGU recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value, using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which estimates of future cash flows have not been adjusted.

#### 3. Significant Accounting Policies (Cont'd)

#### n) Impairment of non-financial assets (Cont'd)

If the recoverable amount of an asset or CGU is estimated to be less than its carrying amount, the carrying amount is reduced to the recoverable amount. Impairment is recognized immediately in profit or loss. Where an impairment subsequently reverses, the carrying amount is increased to the revised estimate of recoverable amount but only to the extent that this does not exceed the carrying value that would have been determined if no impairment had previously been recognized.

Industry specific indicators for an impairment review on mineral rights and capitalized exploration related expenditures arise typically when one of the following circumstances applies:

- Substantive expenditure on further exploration and evaluation activities is neither budgeted nor planned;
- Title to the asset is compromised;
- Adverse changes in variations in commodity prices and markets; and
- Variations in the exchange rate for the currency of operation.

#### o) Restoration, rehabilitation and environmental obligations

An obligation to incur restoration, rehabilitation and environmental costs arises when an environmental disturbance is caused by the exploration or development of a mineral property interest. Such costs arising from the decommissioning of plant, other site preparation work, and water and soil management, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditure is dependent on a number of factors such as the life and nature of the asset, the operation license conditions and, when applicable, the environment in which the mine operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value of the liability. These costs are charged against profit or loss over the economic life of the related assets, through amortization using either the unit-of-production or the straight line method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense in profit or loss.

#### 3. Significant Accounting Policies (Cont'd)

#### o) Restoration, rehabilitation and environmental obligations (Cont'd)

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company may in the future be affected from time to time in varying degrees by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation or environmental obligations as at October 31, 2016.

#### p) Share-based payments

The Company from time to time may issue shares or options to its directors, officers, consultants and employees. The Company values share-based payments using the fair-value method of the services provided. For stock options issued to its directors, officers, consultants and employees where the value of the services provided cannot be determined or the options are provided for services already provided to the Company, the Company values stock-based compensation by reference to the fair value of the stock options issued, utilizing the Black-Scholes option pricing model. The estimated fair value is recognized over the applicable vesting period as stock-based compensation expense and an increase to share-based payment reserve.

Any consideration paid by employees on the exercise of stock options or purchase of stock is credited to share capital plus the amounts originally recorded as share-based payment reserve. An individual is classified as an employee when they are an employee for legal purposes, or primarily performing services similar to the services that would be provided by a legal employee.

#### 3. Significant Accounting Policies (Cont'd)

#### New accounting standards and recent pronouncements q)

A number of new standards, and amendments to standards and interpretations, are not yet effective for three and nine months ended October 31, 2016, and have not been applied in preparing these condensed interim consolidated financial statements. The following standards and interpretations have been issued by the International Accounting Standards Board and the International Financial Reporting Interpretations Committees with effective dates relating to the annual accounting periods starting on or after the effective dates as follows:

#### **International Accounting Standards**

**Effective Date** 

IFRS 9 - Financial IFRS 9 was issued in November 2009 and contained Instruments requirements for financial assets. This standard addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: Amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments and such instruments are either recognized at the fair value through profit or loss or at fair value through other comprehensive income. Where such equity instruments are measured at fair value through other comprehensive income, dividends are recognized in profit or loss to the extent not clearly representing a return of investment; however, others gains and losses (including impairments) associated with such instruments remain in accumulated other comprehensive income indefinitely.

> Requirements for financial liabilities were added in October 2010 and they largely carried forward existing requirements in Financial Instruments – Recognition Measurement, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss would generally be recorded in other comprehensive income.

The Company is in the process of assessing the impact that the new and amended standards will have on its financial statements or whether to early adopt the new requirements.

January 1, 2018

#### 4. Mineral Rights

On July 9, 2013, Phoenix issued 500,000 common shares to Americas Gold Exploration Inc. ("AGEI"), at \$0.10 per share in order to acquire a 50% right, title and interest to the Plumas Property and 100,000 common shares to William Matlack ("Matlack") at \$0.10 per share as consideration for a 20-year renewable lease entered into for the remaining 50% right, title and interest to the Plumas Property. Matlack has the option to convert the lease payments into a 1% net smelter return royalty on the property and the Company has the right to buy back this option by paying Matlack \$1,341,100(US\$1,000,000).

The Plumas Property consists of two patented lode mining claims with extra lateral rights (40 acres) and one patented mill site claim (8.5 acres) situated in BattleMountain, Lander County, Nevada, USA.

Phoenix acquired a 50% right, title and interest to the Eldorado Property for a total payment of \$115,080 (US \$105,000) and in consideration of Phoenix assuming all of the obligations of AGEI.

The Eldorado Property consists of one patented lode mining claim (20 acres) named Eldorado situated in Battle Mountain, Lander County, Nevada, USA.

The Company's management determined that the mineral rights are impaired as of January 31, 2016 and recognized an impairment loss of \$761,576.

The cumulative costs incurred on the Company's mineral rights are as follows:

	October 31, 2016	January 31, 2016
	\$	\$
Opening balance	400,000	965,246
Incurred during the period	97,128	196,330
Impairment charges recognized during the period	-	(761,576)
Closing balance	497,128	400,000

#### 5. Promissory NotePayable

On May 12, 2014, the Company issued a promissory note of \$54,520 (US \$50,000) to an officer and director of the Company. The promissory note bears interest at a rate of 10% per annum, payable monthly in arrears on the last day of each and every month. The full amount was due on May 31, 2014 which was extended with the same terms and due on demand status. As of October 31, 2016, the Company had \$4,285 (2015 - \$4,285) remaining promissory notes payable with the same terms and due on demand status.

#### 6. Advances from Related Company

As of October 31, 2016, the Company had advances from related companies, which are owned and controlled by officers and/or directors of the Company, in the amount of \$497,128 (January 31, 2015 - \$373,351). The advances are non-interest bearing, unsecured, and have no fixed term of repayment.

#### 7. Share Capital

a) Authorized
Unlimited number of common shares.

IFRS 2 recommends that an entity shall measure any equity-settled share-based payment transactions directly at the fair value of the goods or services received. The Company issued warrants and options as part of the private placements and compensation payments to agents and brokers. The Company determined that the fair value of services received is not reliably measurable because the warrants attached to these transactions are not from the result of any services purchased by the Company. Also, fair value of services from agents and brokers are not reliably determinable because there is no similar open market for the services they provide, and the compensation is not based on a fixed market rate, but rather subject to negotiation by management. Lastly, it is common for exploration stage companies to provide share-based compensation as part of its equity and debt transactions in addition to a cash component. As such management determined that the fair value of warrants rather than the fair value of services received should be used to determine the fair value of share-based transactions.

## b) Issued and outstanding Issued common shares are as follows:

	Number of shares <sup>1</sup>	Amount <sup>1</sup>
Balance – January 31, 2015	35,272,900	\$ 1,414,719
Broker's warrants expiry (d)(i)	-	32,076
Broker's warrants expiry (d)(ii)	-	3,597
Broker's warrants expiry (d)(iii)	-	3,600
Balance – January 31, 2016&October 31, 2016	35,272,900	\$ 1,453,992

#### 7. Share Capital (Cont'd)

c) Stock options and share-based payment (Cont'd)

As at October 31, 2016, the Company had 3,162,500stock options outstanding. The following table summarizes information about stock options outstanding as at October 31, 2016:

	Number	Weighted	•
		exerc	cise price
Balance –January 31, 2014	-	\$	-
Zuri stock options recognized on April 23, 2014 (i)	400,000		0.10
Agent's options issued on April 23, 2014 (ii)	280,000		0.10
Stock options forfeited on July 22, 2014 (iii)	(400,000)		0.10
Vesting of stock options issued for services (iv)	450,000		0.10
Stock options issued to management and directors (v)	2,582,500		0.10
Balance – January 31, 2015	3,312,500	\$	0.10
Stock options forfeited on February 3, 2015 (vi)	(300,000)		0.10
Vesting of stock options issued for services (iv)	150,000		0.10
Balance – January 31, 2016 &October 31, 2016	3,162,500	\$	0.10

- (i) The assumptions utilized in determining the value of the 400,000 stock options was a share price of \$0.0783, an exercise price of \$0.10, a risk free interest rate of 1.19%, volatility of 120%, expected yield of nil, and an expected life of 2.9 years. The estimated fair value of the 400,000 options issued was \$20,680, which were fully vested. These options expire on March 19, 2017.
- (ii) The assumption utilized in determining the value of the 280,000 stock options was a unit price of \$0.10, an exercise price of \$0.10, a risk free interest rate of 1.19%, volatility of 120%, expected yield of nil, and an expected life of 3 years. The estimated fair value of the 280,000 options issued was \$19,796. These options entitle the holder to acquire one unit of the Company which is comprised of one common share and half of the common share purchase warrant of the Company. Each whole warrant entitles the holder to acquire one common share of the Company for \$0.20 per share for a period of 3 years from the date of issuance.
- (iii) The stock options originally recognized on April 23, 2014 were forfeited due to the resignation of the officers and directors of Zuri at RTO. These options had original expiration date of March 19, 2017.

#### 7. Share Capital (Cont'd)

- c) Stock options and share-based payment (Cont'd)
  - (iv) On May 1, 2014, the Company granted 600,000 stock options to CHF Investor Relations ("CHF") exercisable for a period of five years from the date of grant at an exercise price of \$0.10 per share. These options vest evenly over the four quarters subsequent to the date on which they were granted. The assumptions utilized in determining the fair value of the 600,000 stock options was a share price of \$0.05, an exercise price of \$0.10, a risk free interest rate of 1.67%, volatility of 120%, expected yield of nil, and an expected life of 5 years. The estimated fair value of the 600,000 stock options issued was \$22,800. Upon termination of the services agreement, all vested options will be cancelled after 30 days.
  - (v) On August 22, 2014, the Company granted 2,582,500 stock options to its management and directors. The assumptions utilized in determining the value of the 2,582,500 stock options was a share price of \$0.10, an exercise price of \$0.10, a risk free interest rate of 1.55%, volatility of 120%, expected yield of nil, and an expected life of 5 years. The estimated fair value of the 2,582,500 options issued was \$213,531, which were fully vested. These options expire on August 22, 2019.
  - (vi) On February 3, 2015, 300,000 stock options originally granted on August 22, 2014 were forfeited due to the resignation of one of the Company's directors. These options had an original expiration date of August 22, 2019.

#### d) Warrant Reserve

The following is a summary of the changes in the Company's warrants during the periods:

	I	Exercise price	Number	Amount
Balance – January 31, 2015		рисс	10,861,620	\$ 489,631
Broker's warrants expired on April 23, 2015 (i)	\$	0.10	(1,055,120)	(32,076)
Broker's warrants expired on August 21, 2015 (ii)	\$	0.10	(68,000)	(3,597)
Broker's warrants expired on August 28, 2015 (iii)	\$	0.10	(94,000)	(3,600)
Balance - January 31, 2016 &October 31, 2016			9,644,500	\$ 450,358

- (i) 1,055,120 warrants originally issued on April 23, 2014 expired on April 23, 2015.
- (ii) 68,000 warrants originally issued on August 21, 2014 expired on August 21, 2015.
- (iii) 94,000 warrants originally issued on August 28, 2014 expired on August 28, 2015.

#### 8. Commitments and Contractual Arrangements

As at October 31, 2016, the Company had the following contractual arrangements and commitments in place for the provision of certain services:

- a) As part of the letter of agreement entered into with AGEI and Matlack on July 9, 2013 and as amended on October 29, 2013, December 16, 2013, January 21, 2014, and February 21, 2014 for the acquisition of certain patented mineral claims in Nevada, comprised of the Eldorado Property, the Plumas Property (collectively, the "Phoenix Gold Properties"), the Company has the following commitment:
  - (i) As part of the lease of the Plumas Property describe in note 4, the Company is required to make annual payments of \$46,939 (US\$35,000) on each anniversary date of April 23, 2014 for a period of 20 years. Future minimum lease payments are as follows:

2016	\$ 46,939
2017	\$ 46,939
2018	\$ 46,939
2019	\$ 46,939
2020	\$ 46,939
Thereafter	\$ 657,146

The Company is currently in default of the Plumas Lease for failure to pay the 2015 and 2016 payment amounts under the terms of the lease and if the Company remains in default, Matlack may terminate the lease resulting in a loss of a 50% leasehold interest in the Plumas Property. The Company currently does not have sufficient funds to allocate for lease payments under the Plumas Lease.

b) On December 4, 2015, the Company entered into a letter agreement (the "Letter Agreement") with Blue Creek Forest Products Ltd. ("Blue Creek") and its major shareholder, Four Rivers Resources Inc. ("FRRI"), which contemplates a transaction that will result in a reverse takeover and change of business of the Company by Blue Creek (the "Transaction"). The Transaction is subject to approval of the shareholders of the Company and approval of the Exchange. The closing of the Transaction is subject to number of conditions and must be completed by no later than June 30, 2016, at which time the Letter Agreement is then terminated. The Company had agreed to extend the deadline for closing to August 31, 2016 and further extend it to October 31, 2016. On November 7, 2016, the Company announced that it agreed to further extend the deadline for closing from October 31, 2016 to December 31, 2016 (see Note 13).

#### 9. Capital Management

As at October 31, 2016, the capital structure of the Company consists of equity attributable to common shareholders and includes share capital of \$1,453,992(January 31, 2016 - \$1,453,992), share-based payment reserve of \$276,807 (January 31, 2016 - \$276,807), warrant reserve of \$450,358 (January 31, 2016 - \$450,358), and deficit of \$3,812,840 (January 31, 2016 - \$3,663,276).

The Company's objective when managing capital structure is to ensure sufficient financial resources exist to meet the Company's strategic exploration and business development objectives, and to ensure that the Company continues as a going concern.

#### 10. Segmented Information

The Company operates in one reportable segment. Segments are defined as components for which separate financial information is available and is regularly evaluated by the chief operating decision maker.

#### 11. Related Party Transactions

The Company considers its Board of Directors and certain consultants which, by virtue of the contracts in place and the functions performed, to be key management. Compensation awarded to key management is listed below:

	Nine months	Nine months
	ended	ended
	October 31, 2016	October 31, 2015
Management fees expensed	\$ 171,793	\$ 169,205
Management fees capitalized	106,098	113,522
Total	\$ 277,891	\$ 282,727

For the nine months ended October 31, 2016, the Company paid or accrued management fees of \$117,793 (October 31, 2015 - \$115,205) to Avonlea Ventures Inc., and \$54,000(October 31, 2015- \$54,000) to 2238012 Ontario Inc., and \$106,098 (October 31, 2015 - \$113,522) to America's Gold Exploration Inc., companies controlled by officers and/or directors of the Company.

These transactions are in the normal course of operations and are recorded at the exchange amount agreed to by the related parties.

#### 12. Financial Instruments

IFRS 7 establishes a fair value hierarchy that reflects significance of inputs in measuring fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. process) or indirectly (i.e. derived from process); and Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's financial assets and liabilities at fair value through profit or loss, consisting of cash, are classified as level 1.

The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks.

#### Fair value

As at October 31, 2016, the Company's financial instruments consist of cash, other receivables, accounts payable and accrued liabilities, and promissory note payable. These financial instruments are classified as loans and receivables or other financial liabilities and are carried at amortized cost. The fair values of these financial instruments approximate their carrying values due to the short-term nature of these instruments.

#### Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its financial obligations as they fall due. The Company takes steps to ensure that it has sufficient working capital and available sources of financing to meet future cash requirements for capital programs and operations.

The Company intends to issue equity to ensure the Company has sufficient access to cash to meet current and foreseeable financial requirements. The Company actively monitors its liquidity to ensure that its cash flows and working capital are adequate to support its financial obligations and the Company's capital programs.

#### Credit risk

Credit risk is the risk of loss if counterparties do not fulfill their contractual obligations. The Company has credit risk with its other receivable, but it is considered to be minimal. There is no allowance for doubtful accounts recorded as at October 31, 2016.

#### Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, commodity and equity prices.

#### (i) Interest rate risk

The Company is not exposed to the risk that the value of financial instruments will change due to movement in market interest rates.

#### 12. Financial Instruments (Cont'd)

#### (ii) Currency risk

Currency risk is the risk to the Company's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk. The Company has a portion of its cash, accounts payable and accrued liabilities, advances from related company in US Dollars and Australian Dollars.

#### (iii) Commodity price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, particularly as they relate to base metals, individual equity movements, and the stock market in general to determine the appropriate course of action to be taken by the Company.

#### 13. Subsequent Events

On November 7, 2016, the Company announced that it entered into an amending agreement with Blue Creek and FRRI to further extend the deadline for closing of the Transaction from October 31, 2016 to December 31, 2016.
