TORONTO, Oct. 3, 2018 /CNW/ - High Hampton Holdings Corp. (CSE: HC)(FSE: OHCN) ("**High Hampton**" or the "**Company**") is pleased to announce that it has received a Will Serve Letter from the Imperial Irrigation District ("IID") with a confirmation to accommodate the CoachellaGro cultivation facilities, strategically located within the Coachella cultivation zone in Coachella California, with 7 Megawatts of power through an existing transmission line along Harrison Street where the CoachellaGro operations are located. On [May 3, 2018](#), CoachellaGro received a Conditional Use Permit for cannabis farming on the 10.8 acre property which was an important prerequisite for securing power.

High Hampton plans to construct and provide a new substation on the Coachella property and install, operate and maintain the necessary substation equipment including new transmission lines and step-down transformer to bring electrical service to its cultivation facilities. The Company is working closely with IID to ensure all specifications for the substation are followed, and the power feed from the Harrison Street transmission line will be available in time for the completion of the project construction.

David E. Argudo, CEO/Director of High Hampton, commented:

"I am pleased that we received a Will Serve Letter for 7 Megawatts of Power. We are the first in the City of Coachella to receive power through transmission lines in where we will be having our own mini substation. This means that we are not necessarily reliant to the challenges of the area such as approvals, financing and build outs; our project is moving forward regardless when the area gets its permanent power. I would like to thank Infrastructure Engineers for their relentless effort and teamwork. It has been a long journey; however, the foundation for success has been laid out and completed for CoachellaGro."
