NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

NINE MONTHS ENDED MAY 31, 2020

(Unaudited – Prepared by Management)

1. NATURE OF BUSINESS

Mojave Jane Brands Inc., formerly High Hampton Holdings Corp., (the “Company”) was incorporated in British Columbia on November 12, 2010. The registered office address of the Company is 1500 – 1055 West Georgia Street, P.O. Box 11117, Vancouver, BC, V6E 4N7. The principal place of business address is 2050 – 1055 West Georgia Street, P.O. Box 11121, Royal Centre, Vancouver, BC, V6E 3P3. The Company is a reporting issuer in British Columbia, Ontario and Alberta, and its common shares are traded on the Canadian Securities Exchange under the symbol “JANE”, on the Frankfurt Exchange under symbol “FSE: 0HCN” and on the USA: OTC under the symbol “HHPHF”.

The Company’s principal business has been the manufacturing, processing and sale of cannabis extracts. Currently the Company is not generating revenues as it vacated its leased premises in Coachella, CA, and plans to seek out other potential strategic alliances, joint venture, acquisition, or merger opportunities.

These consolidated financial statements have been prepared based on accounting principles applicable to a going concern, which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since inception with an accumulated deficit to May 31, 2020 of \$62,421,827. The Company will be dependent on additional financing to meet its operating requirements over the next twelve months. Several alternatives including, but not limited to completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining additional working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due. These material uncertainties cast significant doubt on the entity’s ability to continue as a going concern. These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

The condensed interim consolidated financial statements were authorized for issue on July 29, 2020 by the directors of the Company.

2. BASIS OF PREPARATION**Statement of compliance**

These condensed unaudited interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”), applicable to the preparation of interim financial statements, including International Accounting Standard (“IAS”) 34 *Interim Financial Reporting*.

The condensed interim consolidated financial statements do not include all of the disclosures required for a complete set of annual financial statements and should be read in conjunction with the audited annual financial statements for the year ended August 31, 2019, which have been prepared in accordance with IFRS as issued by the IASB.

Basis of measurement

These consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments that are measured at revalued amounts or fair values. In addition these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

New accounting policy

IFRS 16 – Leases

This standard replaces IAS 17, Leases. IFRS 16 eliminates the classification as an operating lease and requires lessees to recognize a right-of-use asset and a lease liability in the statement of financial position for all leases, with exemptions permitted for short-term leases and leases of low value assets. In addition, IFRS 16 changes the definition of a lease; sets requirements on how to account for the asset and liability, including complexities such as non-lease elements, variable lease payments and option periods; changes the accounting for sale and leaseback arrangements; and introduces new disclosure requirements. Under IFRS 16, a lessee recognizes a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. Right-of-use assets will be initially measured at cost, which includes the initial measurement of the lease liabilities and other costs, less lease incentives. Lease liabilities will initially be measured at the present value of future lease payments and subsequently measured at amortized cost using the effective interest method. IFRS 16 is effective for annual reporting periods beginning on or after January 1, 2019 with early application permitted in certain circumstances and may be applied retrospectively to each prior period presented (full retrospective approach) or with the cumulative effect of adoption recognized at initial application (modified retrospective approach). The modified retrospective approach offers the option, on a lease by lease basis, to either measure the right-of-use asset retrospectively using the discount rate as at the date of initial application or to measure the right-of-use asset at an amount equal to the lease liability.

The Company adopted IFRS 16 on September 1, 2019. On initial adoption, the Company has elected to record right-of-use assets based on the corresponding lease obligation. Right-of-use asset and lease obligation of \$53,345 were recorded as of September 1, 2019, with no impact on deficits. When measuring the present value of lease obligations, the Company discounted remaining lease payments using its incremental borrowing rate at September 1, 2019, which was a weighted-average rate of 12%.

4. CAPITAL MANAGEMENT

The Company manages its capital structure and adjusts it, based on the funds available to the Company to support the growth and development of its subsidiaries and additional acquisition opportunities. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital to include all components of its shareholders' equity.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period. The Company is not subject to externally imposed capital requirements.

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Company's consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from those estimates and judgments. The impacts of such estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised.

Areas requiring a significant degree of estimation and judgment by the Company's management relate to but are not limited to:

- whether an indication of impairment loss or a reversal of an impairment loss exists for property, plant and equipment and finite lived intangible assets;
- determining the fair values of identifiable assets acquired, liabilities assumed, contingent consideration for business combinations and asset acquisitions;
- judgments used in determining if an acquisition constitutes a business combination or asset acquisition;
- judgments used in determining whether the Company has acquired significant influence over an entity;
- discount rates and cash flows used to calculate the recoverable amounts for cash generating units for the purposes of determining whether an impairment of goodwill and indefinite lived intangible assets exists;
- estimates and judgments used in determination of the fair value less cost to sell of assets held for sale and finite lived intangible assets;
- amortization methods and periods used for property, plant and equipment and finite lived intangible assets;
- estimates and judgments used in determination of the manufacturing costs, selling costs, wastage and expected yield for inventory;
- the collectability of accounts or loans receivable;
- the fair value measurements for financial instruments;
- the recoverability and measurement of deferred tax assets and liabilities;
- the fair value estimation of share-based payments and awards;
- whether the Company has sufficient financing to operate as a going concern; and
- determining the classification of contingent consideration as a financial liability or equity.

Actual results may differ from those estimates and judgments.

20. FINANCIAL INSTRUMENTS**Financial risk management**

The Company's financial risks arising from its financial instruments are credit risk, liquidity risk, interest rate risk and foreign currency exchange risk. Risk management is carried out by the Company's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

Credit risk

Credit risk is the risk of potential loss to the Company if the counter party to a financial instrument fails to meet its contractual obligations. The credit risk of the Company is associated with cash, trade and other receivables, and amount due from related party. The credit risk with respect to its cash is minimal as they are held with high-credit quality financial institutions. The Company does not anticipate any default of its trade receivables, as it transacts with creditworthy customers and management does not expect any losses from non-performance by these customers.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have enough liquidity to meet liabilities when due, as they fall due. As at May 31, 2020, the Company has current assets of \$1,118,654 and current liabilities of \$747,628. The Company's financial liabilities include accrued expenses and trade and other payables which have contractual maturities of 30 days or are due on demand. The Company's accounts payable, loan payable and due to related parties have contractual maturities of less than 30 days and are subject to normal trade terms.

20. FINANCIAL INSTRUMENTS (cont'd...)*Interest rate risk*

The Company is exposed to interest rate risk arising from cash held in Canadian financial institutions. The interest rate risk on cash is not considered significant due to its short-term nature and maturity. The exposure to interest rates for the Company is considered minimal. The Company has not used any financial instrument to hedge potential fluctuations in interest rates.

Foreign currency exchange risk

Foreign currency exchange risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's functional currency is the Canadian dollar and administrative expenditures are transacted in Canadian dollars. The Company funds its operations in the United States by using USD converted from its Canadian bank accounts. At May 31, 2020, the Company had financial assets of \$138,243 and financial liabilities of \$221,768 denominated in United States dollars. A 10% strengthening of the US dollar would affect net loss by approximately \$8,000. The Company does not hedge its foreign exchange risk.

21. FAIR VALUE MEASUREMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

As at May 31, 2020, the Company has no financial assets or financial liabilities measured at fair value. There have been no changes in these levels and no changes in classifications during the nine months ended May 31, 2020.
