Notes to Condensed Interim Financial Statements (unaudited, in Canadian dollars) For the six-month period ended March 31, 2013

#### 1. INCORPORATION, NATURE OF OPERATIONS AND GOING CONCERN

Gimus Resources Inc. (la «Company») is an exploration Company with activities in Canada.

These financial statements were prepared on a going concern basis, using the historical cost, except for the financial assets accounted for at fair value through profit and loss.

The Company's ability to continue as a going concern depends on its ability to realize its assets and to obtain additional financing. While it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. As at March 31, 2013, the Company has a deficit of \$299,546. The application of IFRS on a going concern basis may be inappropriate, since there is a doubt as to the appropriateness of the going concern assumption.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities, the reported amounts of revenues and expenses and the classification of statement of financial position items if the going concern assumption was deemed inappropriate, and these adjustments could be material. Management did not take these adjustments into account as it believes in the validity of the going concern assumption.

The Company's financial year ends on September 30.

#### 2. GENERAL INFORMATION AND STATEMENT OF COMPLIANCE WITH IFRS

The Company's condensed interim financial statements have been prepared based on International Financial Reporting Standards (IFRS) in accordance with IAS 34 standard, Interim Financial Reporting. #### 5. SHARE-BASED PAYMENTS

The Company has established a stock option plan pursuant to which options to purchase common shares may be granted to certain officers, directors and employees of the Company as well as persons providing services to the Company. Under this plan, options to purchase the common shares from time-to-time may be granted for a variable number whereby the number should never represent more than 10% of the issued and outstanding capital stock of the Company. Exercise price of options equals the market price of the Company's stock on the date of grant. Stock options are exercisable on the day of grant and are for a maximum term of ten years except for broker options which have a term of 2 years. Among the options outstanding, none is subject to an escrow agreement.

The Company is partially financed through the issuance of flow-through shares and, according to tax rules regarding this type of financing, the Company is engaged in realizing mining exploration work.

These tax rules also set deadlines for carrying out the exploration work, which must be performed no later than the earlier of the following dates:

- Two years following the flow-through placements; and
- One year after the Company has renounced the tax deductions relating to the exploration work.

However, there is no guarantee that the Company's exploration expenses will qualify as Canadian exploration expenses, even if the Company is committed to taking all the necessary measures in this regard. Refusal of certain expenses by the tax authorities would have a negative tax impact for investors.
