## Risk Factors

Exploration-stage mineral exploration companies face a variety of risks and, while unable to eliminate all of them, Bethpage aims at managing and reducing such risks as much as possible. Few exploration projects successfully achieve development stage, due to factors that cannot be predicted or anticipated, and even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed. Bethpage closely monitors its activities and those factors that could impact them, and employs experienced consultants to assist in its risk management and to make timely adequate decisions.

Environmental laws and regulations could also impact the viability of a project. Bethpage has ensured that it has complied with these regulations, but there can be changes in legislation outside Bethpage's control that could also add a risk factor to a project.

## Approval

The Board of Directors of the Company approved the disclosure contained in this MD&A on April 17, 2019.
