Notes to Condensed Interim Consolidated Financial Statements

For the three and six months ended March 31, 2016 and March 31, 2015 (expressed in Canadian dollars)

1. Nature of operations and going concern

Bee Vectoring Technologies International Inc. (formerly Unique Resources Corp.) (the "Company") was incorporated under the laws of the province of British Columbia, Canada on May 20, 2011. Bee Vectoring Technology Inc. ("BEE"), a wholly owned subsidiary of the Company is focused on the control of pests and enhancement of crops and ornamentals through the use of biological controls in a variety of application processes.

On June 1, 2015, the Company entered into a share exchange agreement with BEE pursuant to which the Company would acquire all of the issued and outstanding shares of BEE (the "Transaction") in exchange for 19,200,000 post—consolidated common shares of the Company. Upon completion of the Transaction, BEE became a wholly owned legal subsidiary of Unique Resources Corp. ("Unique"), and Unique changed its name to Bee Vectoring Technologies International Inc. on June 30, 2015. The acquisition was classified as a Reverse Take-over defined in Policy 5.2 by the TSX Venture Exchange Inc. (the "Exchange"). The combined entity continues to carry out the business of BEE as previously constituted.

The Company commenced trading under the symbol BEE on July 7, 2015. The address of the Company's registered office is Suite 800 - 789 West Pender St. Vancouver, BC, V6C 1H2.

These condensed interim consolidated financial statements were approved for issuance by the Board of Directors on May 26, 2016.

Going concern assumption

These condensed interim consolidated financial statements are prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its asset and discharge its liabilities in the normal course of business for the foreseeable future.

The Company's ability to continue as a going concern is dependent upon, but not limited to, its ability to raise financing necessary to discharge its liabilities as they become due and generate positive cash flows from operations. To date the Company has not obtained its patent to produce Bio Control under the PMRA, and has not generated revenue from operations. During the six months ended March 31, 2016, the Company incurred a net loss of \$1,229,830 (six months ended March 31, 2015 – \$80,818), and as of that date, the Company's deficit was \$4,833,241 (September 30, 2015 – \$3,603,411). At March 31, 2016, the Company has current assets of \$1,339,927 (September 30, 2015 - \$1,853,179) and current liabilities of \$96,292 (September 30, 2015 – \$118,342) resulting in working capital (deficit) of \$1,243,635 (September 30, 2015 – (\$1,734,837)).

These conditions have resulted in material uncertainties that may cast significant doubt about the Company's ability continue as a going concern in the foreseeable future. The consolidated financial statements do not give effect to adjustments that may be necessary, should the Company be unable to continue as a going concern. If the going concern assumption is not used then the adjustments required to report the Company's assets and liabilities at liquidation values could be material to these condensed interim consolidated financial statements.

2. Basis of presentation

a) Statement of compliance

These condensed interim consolidated financial statements are prepared and reported in Canadian dollars and have been prepared in accordance with IFRS applicable to the presentation of interim financial statements and International Accounting Standards ("IAS") 34, Interim Financial Reporting, as the accounting policies applied in these condensed interim consolidated financial statements are based on IFRS as issued, outstanding and effective on March 31, 2016.

(formerly Unique Resources Corp.)

Notes to Condensed Interim Consolidated Financial Statements

For the three and six months ended March 31, 2016 and March 31, 2015 (expressed in Canadian dollars)

2. Basis of presentation (continued)

Certain disclosures that are normally required to be included in the notes to the annual audited financial statements have been condensed or omitted. These condensed interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended September 30, 2015.

b) Basis of measurement

The condensed interim consolidated financial statements have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities. The condensed interim consolidated financial statements are presented in Canadian dollars, which is the Company's functional and presentation currency.

c) Significant accounting estimates and judgments

The preparation of these condensed interim consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed interim consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these judgments and estimates. The condensed interim consolidated financial statements include judgments and estimates which, by their nature, are uncertain. The estimates and underlying assumptions are reviewed on an ongoing basis. The impacts of such judgments and estimates are pervasive throughout the condensed interim consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and also in future periods when the revision affects both current and future periods.

Significant assumptions about the future and other sources of judgments and estimates that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Intangible assets valuation

The values associated with intangible assets involve significant estimates and assumptions, including those with respect to future cash inflows and outflows, discount rates and asset lives. These estimates and assumptions could affect the Company's future results if the current estimates of future performance and fair values change. These determinations will affect the amount of amortization expense on definite life intangible assets recognized in future periods. The Company assesses impairment by comparing the recoverable amount of an intangible asset with its carrying value. The recoverable amount is defined as the higher of value in use, or fair value less cost to sell. The determination of the recoverable amount involves management estimates.

Useful life of moulds and dies

Significant estimates are made as to the useful lives of moulds and dies, which have been estimated to be five years. Refer to the significant accounting policy in Note 3, of the financial statements for the year ended September 30, 2015, for details.

Useful life of property, plant and equipment

Significant estimates are made as to the useful lives of property, plant and equipment. Refer to the significant accounting policy in Note 3, of the financial statements for the year ended September 30, 2015, for details.

Share-based payments

The Company uses the Black-Scholes Option Pricing Model to calculate the fair value of stock options and of common share purchase warrants issued. The model requires the input of subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options and common share purchase warrants.

(formerly Unique Resources Corp.)

Notes to Condensed Interim Consolidated Financial Statements

For the three and six months ended March 31, 2016 and March 31, 2015 (expressed in Canadian dollars)

2. Basis of presentation (continued)

d) Basis of consolidation

These condensed interim consolidated financial statements include the accounts of the Company and those of its wholly-owned legal subsidiary BEE. The Company has accounted for the Transaction as a reverse takeover (note 4), therefore, for accounting purposes, BEE, the legal subsidiary, has been treated as the accounting parent company, and Unique, the legal parent has been treated as the accounting subsidiary in these condensed interim consolidated financial statements.

The financial statements of the accounting subsidiary are included in the condensed interim consolidated financial statements from the date that control commences until the date control ceases.

The functional currency of the Company and BEE is the Canadian Dollar, which is the presentation currency of the condensed interim consolidated financial statements.

All intercompany transactions and balances have been eliminated in preparing the condensed interim consolidated financial statements.

3. Significant accounting policies

The same accounting policies and methods of computation were followed in the preparation of these condensed interim consolidated financial statements as were followed in the preparation and described in Note 3 of the annual financial statements as at and for the year ended September 30, 2015, with the exception of new and revised standards along with any consequential amendments, effective October 1, 2015. Accordingly, these interim financial statements for the three and six month periods ended March 31, 2016 and 2015 should be read together with the annual financial statements as at and for the year ended September 30, 2015.

Accounting Standards Issued But Not Yet Applied

The Company has reviewed changes to accounting standards that become effective in future periods. Standards issued but not yet effective up to the date of issuance of the Company's condensed interim consolidated financial statements are listed below:

IFRS 9, Financial Instruments ("IFRS 9") was updated and re-issued by the IASB on July 24, 2014 and will replace IAS 39, "Financial Instruments: Recognition and Measurement" ("IAS 39"). IFRS 9 replaces the multiple rules in IAS 39 with a single approach to determine whether a financial asset is measured at amortized cost or fair value and a new mixed measurement model for debt instruments having only two categories: amortized cost and fair value. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018.

IFRS 15 Revenue from Contracts with Customers specifies how and when an IFRS reporter will recognize revenue as well as requiring such entities to provide users of consolidated financial statements with more informative, relevant disclosures. The standard provides a single, principles based five-step model to be applied to all contracts with customers. The standard is effective for period's beginning on or after January 1, 2018.

IAS 1 "Presentation of Financial Statements Amendments" was amended by the IASB in December 2014. The amendments are designed to further encourage companies to apply professional judgment in determining what information to disclose in their financial statements. For example, the amendments make clear that materiality applies to the whole of financial statements and that the inclusion of immaterial information can inhibit the usefulness of financial disclosures. Furthermore, the amendments clarify that companies should use professional judgment in determining where and in what order information is presented in the financial disclosures. The effective date is for annual periods beginning January 1, 2016. Entities may still choose to apply IAS 1 immediately, but are not required to do so.

(formerly Unique Resources Corp.)

Notes to Condensed Interim Consolidated Financial Statements

For the three and six months ended March 31, 2016 and March 31, 2015 (expressed in Canadian dollars)

3. Significant accounting policies (continued)

IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets were amended by the IASB in May 2014. Amendments clarify that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic benefits embodied in the asset. The IASB also clarified that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. This presumption, however, can be rebutted in certain limited circumstances. The effective date is for annual periods beginning January 1, 2016. Earlier application is permitted, but not required.

4. Reverse Takeover

Effective June 30, 2015, Unique acquired 100% of the issued and outstanding common shares of BEE in exchange for 19,200,000 post-consolidated common shares of the Company. The resulting post-reverse takeover and post-concurrent financing issued outstanding common shares amounted to 40,800,350; (i) Unique shareholders 6,022,560 common shares; (ii) BEE shareholders 22,031,590 common shares; and (iii) other shareholders 12,746,200 common shares. As a result of this share issuance, the shareholders of BEE obtained 54% of the post-consolidation common shares of Unique and, consequently, control of Unique.

Upon closing of the Transaction, among other things the Company:

- Issued 12,426,200 common shares in a \$3,106,550 private placement
- Issued 320,000 common shares as a finance fee for the private placement
- Issued 1,075,000 common shares to settle \$245,000 non-interest bearing convertible debentures.
- Issued 532,360 common shares to settle \$99,300 interest bearing convertible debentures plus accrued interest of \$5.903:
- Issued 1,224,230 common shares to settle a \$244,846 note payable.

The substance of the transaction is a reverse takeover of the non-operating company (Unique) and no goodwill or intangible asset representing the stock exchange listing has been recorded. The transaction does not constitute a business combination as the Company does not meet the definition of a business under IFRS 3. As a result, the Transaction was recorded by the Company as a listing expense which reflects the difference between the fair value of the BEE common shares to the Unique shareholders less the net fair value of the Unique assets acquired. BEE has been identified as the accounting acquirer, and Unique, the legal parent, has been treated as the accounting subsidiary in these condensed interim consolidated financial statements. As BEE was deemed to be the acquirer for accounting purposes, its assets, liabilities, and operations since incorporation are included in these condensed interim consolidated financial statements at their historical carrying value. Unique's results of operations have been included from June 30, 2015, the date of the completion of the Transaction.

The amount assigned to listing expense of \$1,756,658, is the difference between the fair value of the consideration and the net identifiable assets of the Company deemed acquired by BEE and included in the consolidated statement of operations and comprehensive loss.

The fair value of the consideration of the Transaction includes the fair value of 6,022,560 common shares deemed issued to the Company's shareholders, and was estimated to be \$1,505,641 based on the value per share in the Private Placement, that closed concurrently with the closing of the Transaction, the fair value of 2,708,333 warrants issued to the Company's pre-Transaction warrant holders, and the fair value of 375,000 options issued to the Company's pre-Transaction option holders. The fair value of the warrants were estimated to be \$294,666 and was determined using the Black-Scholes option pricing model with the following assumptions: a risk-free rate of 0.49%, an expected volatility of 107%, an expected yield rate of nil and an expected life of one and a half years. The fair value of the options was estimated to be \$8,588 and was determined using the Black-Scholes option pricing model with the following assumptions: a risk-free rate of 0.58%, an expected volatility of 107%, an expected yield rate of nil and an expected life of 90 days.

(formerly Unique Resources Corp.)

Notes to Condensed Interim Consolidated Financial Statements

For the three and six months ended March 31, 2016 and March 31, 2015 (expressed in Canadian dollars)

4. Reverse Takeover (continued)

The allocation of the fair value transferred is as follows:

Consideration

Value of common shares issued	\$ 1,505,641
Value of warrants deemed issued to former warrant holders of Unique	294,666
Value of options deemed issued to former option holders of Unique	8,588
Total fair value of the consideration given up	1,808,895
Net assets acquired	52,237
Reverse takeover listing expense	\$ 1,756,658

The consideration and allocation reflects the best estimates and assumptions of the management of the Company after taking into account all available information.

As a result, the total reverse takeover listing expense amounts to \$1,756,658.

CT is a Capital Pool Company as defined by Policy 2.4 Capital Pool Companies of the TSX Venture Exchange and pursuant to Section 8.5 of the Policy and in connection with the Qualifying Transaction. CT advanced funds in the amounts of \$150,000 and \$100,000 for an aggregate amount of \$250,000 to the Company. The advances are evidenced by two promissory notes, non-interest bearing and whereby the Company has agreed to repay CT at the earlier of: (1) following completion of the Qualifying Transaction and (ii) within 30 days following termination of the Qualifying Transaction. The note was repaid in cash on June 30, 2015, following the close of the Transaction.

On October 1, 2013 a promissory note was issued in favour of Chelsian Sales and Marketing Inc. ("Chelsian") for advances made to the Company in the amount of \$236,600, non-interest bearing and due on demand. The Company is related to Chelsian Sales and Marketing Inc. ("Chelsian") by virtue of common control. The note was amended on March 1, 2014 to include additional advances in the amount of \$8,246 for a total of \$244,846 and with terms that should the Company seek listing on the TSX Venture Exchange or the Toronto Stock Exchange or any other stock exchange, the full amount owing is to convert into common shares of the acquiring party at a price per common share equal to a 20% discount of the price of the common shares at the time of such listing by the Company, or the common shares of an affiliated company by way of reverse take-over, amalgamation or other corporate change. These amounts were converted into 1,224,230 common shares of the Company on June 30, 2015, following the close of the Transaction (note 4).

10. Convertible debentures

On November 1, 2013 and March 1, 2014 the Company issued unsecured, convertible debentures in the aggregate principal amounts of \$95,000 and \$50,000 respectively. Both of these debentures were non-interest bearing and had maturity dates of two years from the date of issue. The \$50,000 debenture was issued to legal counsel in lieu of legal fees outstanding.

On September 2, 2014 the Company issued a convertible debenture in the aggregate principal amount of \$50,000, maturity date of two years from the date of issue, bearing interest at 8% per annum compounded semi-annually and secured by a general security agreement over the assets of the Company. Both the principal and outstanding interest were convertible into common shares.

(i) In conjunction with the Transaction and prior to the completion of the Transaction, the Company completed a private placement (the "Private Placement") of 12,426,200 subscription receipts (the "Subscription Receipts") with Canaccord Genuity Corp. acting as agent (the "Agent") for gross proceeds of \$3,106,550. On completion of the escrow release conditions set out in the subscription receipt agreement entered into among the Company, BEE, the Agent, and Equity Financial Services Inc. dated June 30, 2015, each Subscription Receipt was automatically exchanged for one post-consolidation common share of the Company resulting in the issuance of 12,426,200 post consolidated common shares.

In connection with the Private Placement, the Company paid the Agent cash commissions and fees of \$374,717, issued the Agent and its selling group 708,160 Agent's warrants ("Agent's Warrants"), and issued the Agent 320,000 common shares with a value of \$80,000 in respect of corporate finance fees. Each Agent's Warrant entitles the holder to purchase one (1) common share at a price of \$0.25 for a period of three years from the date of issuance. Additionally, the Company paid cash commissions to finders of \$57,800 and issued finders 231,200 finder's warrants with each finders warrant having the same terms as the Agent's Warrants. The Agent Warrants were valued at \$114,934 using the Black-Scholes option pricing model using the following assumptions: Term -3 years; Volatility -107%; Interest rate -0.59%. The Finder's Warrants were valued at \$37,524 using the Black-Scholes option pricing model with the same assumptions as the Agent Warrants.

Immediately prior to the completion of the Transaction, the Company consolidated its common shares, options and warrants on the basis one (1) post-consolidation common share, option or warrant for each 2.4 pre-consolidation common shares, options or warrants.

14. Loss per share

The warrants and options outstanding were excluded from the computation of diluted loss per share for the three and six months ended March 31, 2016 and 2015 because their impact was anti-dilutive.

15. Financial instruments

Fair Value

Financial instruments of the Company consist of cash, accounts payable and accrued liabilities, due to related parties, promissory notes and convertible debentures. There are no significant differences between the carrying amounts of the items reported on the condensed interim statements of financial position and their estimated fair values because of the short-term maturities of these items.

The Company's risk exposures and their impact on the Company's financial instruments are summarized below.

(formerly Unique Resources Corp.)

Notes to Condensed Interim Consolidated Financial Statements

For the three and six months ended March 31, 2016 and March 31, 2015 (expressed in Canadian dollars)

15. Financial instruments (continued)

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise four types of risk: interest rate risk, foreign exchange risk, commodity price risk and other price risk, such as equity risk. Financial instruments affected by market risk include deposits.

Interest rate risk

The Company is exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Fluctuations in market interest rates do not have a significant impact on the Company's results of operations due to the short-term nature of interest bearing cash.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its obligations. The Company's maximum exposure to credit risk at the end of the reporting period is the carrying value of its financial assets. Cash is held with a large financial institution in Canada, and management believes that exposure to credit risk is not significant.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs. See note 1 for further disclosure on the going concern assumption.

The Company's accounts payable and accrued liabilities are subject to normal trade terms and have contractual maturities payable within 30 days for 2016 and 2015. At March 31, 2016, the Company has current assets of \$1,339,927 (September 30, 2015 - \$1,853,179) and current liabilities of \$96,292 (September 30, 2015 - \$118,342) resulting in working capital of \$1,243,635 (September 30, 2015 - \$1,734,837).

16. Capital management

The Company's objectives when managing capital are: to safeguard the Company's ability to continue as a going concern; to maintain an optimal capital structure, while ensuring the Company's strategic objectives are met and to provide an appropriate return to shareholders relative to the risk of the Company's underlying assets. The capital structure of the Company consists of equity attributable to common shareholders, comprised of issued capital, stock options, warrants, contributed surplus and deficit. The Company maintains and adjusts its capital structure based on changes in economic conditions and the Company's planned requirements. The Company may adjust its capital structure by issuing new equity, selling and/or acquiring assets, and controlling its capital expenditures program.

The Company is operating at a loss. As such, the Company is dependent on external financing to fund its activities. In order to pay for its operating expenses, the Company will spend its existing working capital and raise additional amounts as needed and if available. Management reviews its capital management approach on an ongoing basis.
