Bee Vectoring Announces Private Placement

Mississauga, ON – January 30, 2018 – Bee Vectoring Technologies International Inc. (the “Company” or “BVT”) (TSXV: BEE) announces its intention to undertake a non-brokered private placement (the “**Offering**”) to raise aggregate gross proceeds of up to C\$1,200,000. The Offering will consist of up to 4,800,000 Units at a price of C\$0.25 per Unit.

Each Unit will consist of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant (“Warrant”) will entitle the holder to purchase one additional common share at a price of C\$0.30 per common share for period of 12 months from the date of issue.

“As an organization, we are at an exciting time as we are quickly moving towards commercialization and have seen significant results from our strawberry, blueberry and sunflower testing,” said Ashish Malik, CEO of Bee Vectoring Technologies. “As we quickly inch closer to getting a clear answer regarding our EPA approval, we remain very optimistic and believe this capital will ensure that we are able to continue moving forward on the excellent results we saw throughout 2017.”

BVT will apply the net proceeds of the Offering to support its commercialization plans for the US, continuation of selective market expansion projects including developing opportunities in additional crops and advancing registration activities in new countries, and for general working capital purposes.

The Company may pay finders’ fees in connection with the Offering, in accordance with TSX Venture Exchange policies. All securities issued under the offering will be subject to a four-month hold period in accordance with applicable Canadian securities laws.

Final closing of this Offering is subject to final acceptance by the TSX Venture Exchange.

About [Bee Vectoring Technologies International Inc.](#)

BVT has developed and owns patent-pending bee vectoring technology that is designed to harmlessly utilize bumblebees and honeybees as natural delivery mechanisms for a variety of powdered mixtures comprised of organic compounds that inhibit or eliminate common crop diseases, while at the same time stimulating and enhancing the same crops. This unique and proprietary process enables a targeted delivery of crop controls using the simple process of bee pollination to replace traditional crop spraying, resulting in better yields, superior quality and less impact on the environment without the use of water or disruptions to labour.
