

Bee Vectoring Technologies to Explore Partnership Opportunities at ABIM 2023, the Top Conference for the Ag Biologicals Industry

Mississauga, Ontario and Sacramento, California--(Newsfile Corp. - October 24, 2023) - **Bee Vectoring Technologies International Inc. (CSE: BEE) (OTCQB: BEVVF) (CVE:BEE) (the "Company" or "BVT")** is pleased to announce that it will be exploring various partnership opportunities through nine confirmed meetings with industry players and potential partners at [ABIM 2023](#) (Annual Biocontrol Industry Meeting), an internationally-recognized global meeting place to do business and network within the industry. The conference runs October 23 to 25 in Basil, Switzerland and is co-organized by the Research Institute of Organic Agriculture ([FiBL](#)) and the International Biocontrol Manufacturers Association ([IBMA](#)).

At this year's ABIM, an estimated 1,700 participants from more than 50 nations will network face-to-face, listen to inspiring panel discussions, and see exciting presentations on the latest innovations. SMEs and large enterprises are well-represented, with delegates and the 100+ exhibitors meeting throughout the event.

"The ABIM is an incredible chance for innovators like BVT to connect with the industry's biggest and most important players and I'm pleased to be back at this premiere annual event," said Ashish Malik, CEO of BVT. "There are so many opportunities here with existing and potential partners to progress BVT's ongoing expansion strategy. In addition to our confirmed meetings, there are always several unplanned meetings that develop from informal conversations, so this is a great way to update the industry at-large on our progress."

"ABIM is an event that's helping us all work together to facilitate the transformation to sustainable agriculture," said Christoph Lehnen, BVT Business Manager for Europe, Africa and Middle East. "At the event, we plan to identify and further develop new markets, channels and product applications for BVT's proprietary natural precision agriculture system."

About [Bee Vectoring Technologies International Inc.](#)

BVT, an agriculture technology company, is a market disruptor with a significant global market opportunity in the \$240 billion crop protection and fertilizer market. BVT has pioneered a natural precision agriculture system that replaces chemical pesticides and wasteful plant protection product spray applications by delivering biological pesticide alternatives to crops using commercially grown bees. BVT's award-winning technology, precision vectoring, is completely harmless to bees and allows minute amounts of naturally-derived pesticides (called biologicals) to be delivered directly to blooms, providing improved crop protection and yield results than traditional chemical pesticides - and improving the health of the soil, the microbiome and the environment. Currently, BVT has over 55 granted patents, many more patents pending in all major agricultural countries worldwide and has US EPA registration of its Vectorite™ with CR-7 (EPA Registration No. 90641-2) for sale as a registered biological fungicide for use on the labeled crops.
