IWS Completes Metro Vancouver Installation

VANCOUVER, B.C., April 12, 2017 – **International Wastewater Systems Inc. (“IWS” or the “Company”)** (CSE: IWS) (FRANKFURT: IWI) (OTC: INTWF) is pleased to announce that it has completed the installation of a SHARC thermal energy exchange system at The False Creek Neighborhood Energy Utility in Vancouver (“**False Creek SHARC**”).

The False Creek SHARC was announced in August 2016 following the successful collaboration between IWS and Metro Vancouver (“**Metro Vancouver**”). Metro Vancouver is a partnership of 21 municipalities, one Electoral Area and one Treaty First Nation that collaboratively plans for and delivers regional-scale services across the lower mainland of British Columbia.

The False Creek Neighborhood Energy Utility is a large-scale district heating network that began operations in 2010 and currently provides space heating and hot water for 4,300,000 square feet (395,000 m²) of residential, commercial, and institutional space.

IWS installed its newest and largest capacity system at False Creek, the model 880 (“**SHARC 880**”). The SHARC 880 offers the highest capacity of any SHARC system to date, with flow rates of up to 1500 gallons per minute, a capacity increase of three-times when compared to existing SHARC models. The False Creek SHARC installation will include two SHARC 880 systems working in tandem and will initially operate over 12-month period to demonstrate the economic and energy efficiencies of the system.

This is the second time that a SHARC system has been integrated into a district heating network following IWS’s installation at Borders College (Scotland) in 2015. Large-scale energy networks are a growing trend as municipalities look to increase energy efficiency and reliability, decarbonize energy grids and reduce life-cycle costs.

Lynn Mueller, CEO of IWS commented: “We are pleased to be working with Metro Vancouver on their district heating network. This SHARC installation showcases the capability of IWS technology when applied to large scale, low-carbon thermal networks.”

ON BEHALF OF THE BOARD

“Lynn Mueller”

Lynn Mueller

Chairman and Chief Executive Officer

About International Wastewater Systems Inc.

International Wastewater Systems Inc. is a world leader in thermal heat recovery. IWS systems recycle thermal energy from wastewater, generating the most energy efficient and economical systems for heating, cooling & hot water for commercial, residential and industrial buildings. IWS is publicly traded in Canada (CSE: IWS), the United States (OTC:INTWF) and Germany (Frankfurt: IWI).
