

APPOINTMENT OF CHIEF SCIENTIFIC OFFICER

Vancouver, British Columbia, November 19, 2015 - BioMmune Technologies Inc. ("Biomune" or the "Company") (TSX.V:IMU), a company focused on harnessing the body's immune system to fight cancer and autoimmune diseases, is pleased to announce that it has appointed Patrick W. Gray, Ph.D. as Chief Scientific Officer, effective December 2, 2015.

In his role of Chief Scientific Officer, Dr. Gray will oversee the scientific operations of the Company.

Dr. Gray has spent 35 years in the biotechnology industry, focusing on drug discovery for critical diseases. He has a passion for working in small companies with aggressive timelines---Genentech, ICOS, MacroGenics, Nura and Accelerator were all less than 60 employees when he joined. Dr. Gray's career accomplishments include the first cloning and characterization of Hepatitis B surface antigen, Interferon-gamma, multiple Interferon-alpha genes, Lymphotoxin (TNF-beta), Bactericidal Permeability Increasing Protein, LPS-Binding Protein, Platelet Activating Factor Acetylhydrolase, CCR5 (subsequently shown to be the HIV co-receptor), Macrophage Derived Chemokine, and PI3K p110-delta. These discoveries led to numerous clinical trials, several approved human pharmaceuticals, and characterization of targets for therapeutic monoclonal antibodies and small molecules. In addition to his scientific accomplishments, Dr. Gray previously held senior scientific management positions, including Vice President, Chief Scientific Officer, and CEO. Dr. Gray received his Ph.D. in chemistry from the University of Colorado and his B.S. in biology from the University of Oregon. He is currently an affiliate professor at the University of Washington.

CEO, Reinhard Gabathuler comments: *"Patrick Gray brings great experience in drug development from discovery to the clinic. We delighted to have him onboard leading our scientific team."*

ABOUT BIOMMUNE TECHNOLOGIES INC.

BioMmune Technologies Inc. is a biopharmaceutical company that is advancing technologies focused on cancer, infectious and autoimmune diseases. Three significant technologies are:

1. Utilizing proprietary screening systems for identifying novel compounds that are able to restore immune recognition and killing of cancer cells.

2. Exploiting the regulation of calcium channel activity which is very important for controlling cells involved in the immune system. By regulating these calcium channels, immune activity can be controlled in ways to improve their ability to combat cancers, infections and autoimmune diseases.
3. Modulating CD74, a protein involved in the immune system and its ability to fight foreign antigens. Finding molecules that regulate CD74 activity will aid the immune system to combat infections and cancers and to control autoimmune diseases.

Forward Looking Statements

Certain statements in this press release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 or forward-looking information under applicable Canadian securities legislation that may not be based on historical fact, including without limitation statements containing the words “believe”, “may”, “plan”, “will”, “estimate”, “continue”, “anticipate”, “intend”, “expect” and similar expressions. Such forward-looking statements or information involve known and unknown risks, uncertainties and other factors that may cause our actual results, events or developments, or industry results, to be materially different from any future results, events or developments express or implied by such forward-looking statements or information. Such factors include, among others, our stage of development, lack of any product revenues, additional capital requirements, risk associated with the completion of clinical trials and obtaining regulatory approval to market our products, the ability to protect our intellectual property, dependence on collaborative partners and the prospects for negotiating additional corporate collaborations or licensing arrangements and their timing. Specifically, certain risks and uncertainties that could cause such actual events or results expressed or implied by such forward-looking statements and information to differ materially from any future events or results expressed or implied by such statements and information include, but are not limited to, the risks and uncertainties that: or future products in our targeted corporate objectives; our future operating results are uncertain and likely to fluctuate; we may we may not be successful in either preclinical or clinical trials and not be able to raise additional capital; we may not be successful in establishing additional corporate collaborations or licensing arrangements; we may not be able to establish marketing and the costs of launching our products may be greater than anticipated; we have no experience in commercial manufacturing; we may face unknown risks related to intellectual property matters; we face increased competition from pharmaceutical and biotechnology companies; and other factors as described in detail in our filings with the Canadian securities regulatory authorities at www.sedar.com. Given these risks and uncertainties, you are cautioned not to place undue reliance on such forward-looking statements and information, which are qualified in their entirety by this cautionary statement. All forward-looking statements and information made herein are based on our current expectations and we undertake no obligation to revise or update such forward- looking statements and information to reflect subsequent events or circumstances, except as required by law.

On Behalf of the Board of Directors
