

ROB GIETL JOINS PASCAL BIOSCIENCES AS NEW CHIEF EXECUTIVE OFFICER

VANCOUVER, BRITISH COLUMBIA, September 7, 2021- Pascal Biosciences Inc. ("**Pascal**") (TSXV:PAS) (OTC:PSCBF) (FSE: 6PB-FE), announced today the appointment of Rob Gietl as Chief Executive Officer and President, and he will also have a position on the Board of Directors. Mr. Gietl has extensive experience leading several public companies in Canada, with an excellent record of effectively executing business plans, creating successful partnerships, and leveraging financial resources. As CEO of MYM Neutraceuticals, he oversaw the financing of \$123M in the public markets.

Mr. Gietl takes over from Dr. Patrick Gray who now becomes Chairman of the Board of Directors. "Rob is a great addition to Pascal, and we look forward to his direction of the company", said Dr. Gray. "His past operational experience will greatly help guide Pascal, and his financial expertise will create significant value for our shareholders." In industries as diverse as green technology, early-stage mining development, and cannabis neutraceuticals, he has been instrumental in numerous corporate start-up successes in Canada, the U.S, Mexico, and Australia.

Mr. Gietl commented, "Pascal is a dynamic company on the verge of attaining fantastic milestones in the biotechnology industry, and I'm excited to provide the direction to reach these goals." Pascal has several promising therapeutic programs, and Mr. Gietl will be tasked with prioritizing their direction and funding through corporate partnerships, non-dilutive funding, and public/private funding. "Pascal already has a corporate partnership with SoRSE Technology for their PAS-393 program, and an NIH grant for their leukemia program. We will grow Pascal in a manner most valuable to shareholders, and we expect to be a premier force in the biotechnology industry."

Pascal's leadership team is dedicated to treating difficult diseases such as cancer. As Dr. Gray makes clear, "Rob's exceptional background in operations and raising capital perfectly complements Pascal's super research and development capabilities." Accordingly, the team enthusiastically welcomes Mr. Gietl to the company.

ABOUT PASCAL BIOSCIENCES INC.

Pascal is a biotechnology company advancing innovative therapies for serious diseases. In addition to a targeted therapy for acute lymphoblastic leukemia, Pascal is developing cannabinoid-based treatments for cancer. These compounds include PAS-403, which is advancing into clinical trials for the treatment of glioblastoma, and PAS-393, an immunostimulatory cannabinoid to be used in combination with checkpoint inhibitor therapy to

treat multiple cancers. The PAS-393 program is being developed collaboratively with SoRSE Technology. PAS-393 also shows promise for treating COVID-19.

Forward-Looking Statements

DISCLAIMER

Certain statements in this press release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 or forward-looking information under applicable Canadian securities legislation that may not be based on historical fact, including without limitation statements containing the words “believe”, “may”, “plan”, “will”, “estimate”, “continue”, “anticipate”, “intend”, “expect” and similar expressions. Such forward-looking statements or information involve known and unknown risks, uncertainties and other factors that may cause our actual results, events or developments, or industry results, to be materially different from any future results, events or developments expressed or implied by such forward-looking statements or information. Such factors include, among others, our stage of development, lack of any product revenues, additional capital requirements, risk associated with the completion of clinical trials and obtaining regulatory approval to market our products, the ability to protect our intellectual property, dependence on collaborative partners and the prospects for negotiating additional corporate collaborations or licensing arrangements and their timing. Specifically, certain risks and uncertainties that could cause such actual events or results expressed or implied by such forward-looking statements and information to differ materially from any future events or results expressed or implied by such statements and information include, but are not limited to, the risks and uncertainties that: products that we develop may not succeed in preclinical or clinical trials, or future products in our targeted corporate objectives; our future operating results are uncertain and likely to fluctuate; we may not be able to raise additional capital; we may not be successful in establishing additional corporate collaborations or licensing arrangements; we may not be able to establish marketing and the costs of launching our products may be greater than anticipated; we have no experience in commercial manufacturing; we may face unknown risks related to intellectual property matters; we face increased competition from pharmaceutical and biotechnology companies; and other factors as described in detail in our filings with the Canadian securities regulatory authorities at www.sedar.com. Given

these risks and uncertainties, you are cautioned not to place undue reliance on such forward-looking statements and information, which are qualified in their entirety by this cautionary statement. All forward-looking statements and information made herein are based on our current expectations and we undertake no obligation to revise or update such forward- looking statements and information to reflect subsequent events or circumstances, except as required by law.
