

**FORM 51-102F3
MATERIAL CHANGE REPORT**

ITEM 1. NAME AND ADDRESS OF COMPANY

Gorilla Minerals Corp. (the “**Issuer**”)
789 West Pender Street, Suite 810
Vancouver, BC V6Z 2R9

ITEM 2. DATE OF MATERIAL CHANGE

January 2, 2018

ITEM 3. NEWS RELEASE

Issued January 2, 2018 and disseminated through the facilities of Market News and Stockwatch.

ITEM 4. SUMMARY OF MATERIAL CHANGE

The Issuer announced the acquisition of a resource exploration property located in the Yukon and concurrent private placements.

ITEM 5. FULL DESCRIPTION OF MATERIAL CHANGE

See attached news release.

ITEM 6. RELIANCE ON SUBSECTION 7.1(2) OR (3) OF NATIONAL INSTRUMENT 51-102

Not Applicable.

ITEM 7. OMITTED INFORMATION

There are no significant facts required to be disclosed herein which have been omitted.

ITEM 8. EXECUTIVE OFFICER

Contact: Scott Sheldon, President
Telephone: (604) 725.1857

ITEM 9. DATE OF REPORT

January 2, 2018

810 – 789 West Pender Street
Vancouver BC, V6C 2V6
T: 604-725-1857
CSE Symbol: GOCO

GORILLA MINERALS CORP. ACQUIRES COPPER COBALT MONSTER PROPERTY

Vancouver, BC, January 2, 2018 – Gorilla Minerals Corp. (“Gorilla” or the “Company”)

has entered into a Purchase & Sale Agreement to acquire a 100% interest in a cobalt indicated resource exploration property located in the Yukon (the “**Monster Property**”). The terms of the Agreement call for a onetime payment of \$45,000 and the issuance of 800,000 shares, subject to escrow.

The Monster Property consists of one block of 212 mineral claims totaling a surface area of 43.3 km². The property is west of the Peel Watershed Planning Region in the Dawson Mining District within the traditional territory of the Tr’ondëk Hwëch’in First Nation.

The Yukon Territory

The Yukon has targets with the potential for significant cobalt endowment. The Yukon hosts the 1.6 Ga Wernecke Breccia, a breccia belt that has been correlated to the Olympic Dam deposit and may be related to other IOCG deposits in Australia such as Ernest Henry, Mt. Isa and CuDECO-Rocklands. The Monster Property encompasses part of the Wernecke Breccia. The breccias on the Monster Property are endowed with copper, cobalt, gold and sporadic silver, lead and zinc (Jones, 1999).

The Monster Property

The property includes several previous claim blocks that have been intermittently explored since the 1970s. Zones of elevated copper and cobalt concentrations occur across the entire 17 km length of the property and have been identified by historical soil sampling, surface mapping, and geophysical surveys (Baknes, 1995; Falls and Baknes, 1995; Williams, 1997; Jones, 1999).

Mineralization

The Monster Property mineralization is hosted within and directly adjacent to the Wernecke Breccia. Cobalt occurs on the property as cobaltite and erythrite, in veins and disseminations. Copper occurs on the property as chalcopyrite and bornite, in veins, veinlets, blebs and disseminations.

Fourteen mineralized zones have been described from the Monster Property during historical work. Two of these zones are the South Co Zone (Baknes, 1995), and the Goblin Showing (Jones, 1999). The South Co Zone is a 50 x 70 m poorly exposed zone of carbonate altered and silicified dolostone, mineralized with cobaltite and chalcopyrite. One grab sample reported in Baknes (1995) contained 2.80% Co and 1.70% Cu. The Goblin Showing is a zone of concretionary shale and dolomite with abundant quartz-carbonate veins, that hosts chalcopyrite, bornite, and minor cobaltite. Seven contiguous representative grab samples reported in Jones (1999) contained 0.56% Cu over 35 metres. None of the historical data has been verified by the company.

Private Placements

Gorilla announces a non-brokered Private Placement of up to 5 million (5,000,000) Units at \$0.20 per Unit for proceeds of up to \$1,000,000. Each Unit consists of a common share and a half share purchase Warrant, each Warrant entitling the holder to purchase an additional share at \$0.30 per common share. The proceeds from the Private Placement will be used to fund an initial exploration program on the Monster Property and be added to working capital.

In addition, Gorilla is pleased to announce a non-brokered flow-through private placement consisting of 5 million flow-through units (“**FT Units**”) for gross proceeds of \$1,250,000. Each FT Unit consists of a flow-through common share at \$0.25 per share and a half non-flow-through share purchase Warrant, each Warrant entitling the holder to purchase an additional share at \$0.30 per common share. There are no finder's fees payable. The gross proceeds from the sale of flow-through shares will be spent on exploration that will qualify as Canadian exploration expenses (CEE) and flow-through mining expenditures for purposes of the Income Tax Act (Canada).

Qualified Person

Adrian Smith, P.Geo., B.Sc., Director, has acted as the Qualified Person, as defined in NI 43-101, with respect to the disclosure of the scientific and technical information relating to exploration results contained in this press release.

Forward-Looking Information:

This press release may include “forward-looking information” (as that term is defined by Canadian securities legislation), concerning the Company’s business. Forward-looking information is based on certain key expectations and assumptions made by the Company’s management, including future plans for the exploration and development of its mineral properties. Although the Company believes that such expectations and assumptions are reasonable, investors should not rely unduly on such forward-looking information as the Company can give no assurance they will prove to be correct. Forward-looking statements in this press release are made as of the date of this press release. The Company disclaims any intent or obligation to publicly update any forward-looking information (whether as a result of new information, future events or results, or otherwise) other than as required by applicable securities laws.
