LIQUIDITY AND CAPITAL RESOURCES

Capital management

The Company considers its capital to be the main component of shareholders' equity. The Company's objective when managing capital is to maintain adequate levels of funding to support the development of its business and maintain the necessary corporate and administrative functions to facilitate these activities. This is done primarily through equity financing. Future financings are dependent on market conditions and there can be no assurance the Company will be able to raise funds in the future. The Company invests all capital that is surplus to its immediate operational needs in short-term, high liquid, high-grade financial instruments. There were no changes to the Company's approach to capital management during the period. The Company is not subject to externally imposed capital requirements.

Liquidity and capital resources

The Company's working capital and deficit positions at August 31, 2017 and May 31, 2017 were as follows:

| | August 31, 2017 | May 31, 2017 | | |
|---------------------------|-----------------|----------------|--|--|
| Working capital (deficit) | \$ (365,630) | \$ (554,170) | | |
| Deficit | \$ (4,884,586) | \$ (4,804,895) | | |

The balance of cash available at August 31, 2017 was \$46,904, with a working capital deficiency of \$365,630.

Net cash used in operating activities for the current three month period was \$38,604 (2016 - \$370). The net cash used in operating activities for the period consists primarily of an operating loss and a decrease in accounts payable offset by an increase in amounts due to related parties (which excludes those amounts settled through the issuance of special warrants).

Net cash used in investing activity during the current three month period was \$Nil (2016 - \$Nil).

Net cash received from financing activity during the current three month period was \$83,184 (2016 - \$1,475), which included the \$75,000 proceeds received from the private placement closed in July 2017 as well as cash received from related parties.

There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. If adequate financing is not available when required, the Company may be unable to continue operating. The Company may seek such additional financing through debt or equity offerings, but there can be no assurance that such financing will be available on terms acceptable to the Company or at all. Any equity offering will result in dilution to the ownership interests of the Company's shareholders and may result in dilution to the value of such interests.

The Company does not have sufficient funds to cover anticipated administration expenses throughout the current fiscal year. The Company is seeking new investment opportunities that will provide value to its shareholders.

RELATED PARTY TRANSACTIONS

The Company entered into the following transactions with related parties during the three month period ended August 31, 2017:

a) \$15,000 (2016 - \$15,000) in management fees were accrued in administration expenses to a company controlled by the CEO. In July 2017, the Company issued 703,204 special warrants to settle debts of \$52,740. As at August 31, 2017, \$15,000 (May 31, 2017 - \$52,740) was payable to the company.

b) GOM, a publicly traded company with common directors and officers with the Company, provides office space and administration services to the Company. During the three months ended August 31, 2017, the Company incurred \$37,938 (2016 - \$32,505) payable to GOM for its services provided. GOM also advanced cash, net of repayments, during the period on behalf of the Company totaling \$8,184 (2016 - \$2,230). In July 2017, the Company issued 1,674,301 special warrants to settle debts of \$125,573. As at August 31, 2017, a total of \$55,764 (May 31, 2017 - \$125,389) remained outstanding as due to GOM.

c) As of August 31, 2017, the Company has an \$18,000 (2016 - \$17,000) unsecured loan from a relative of an officer and director, which is payable on demand with a fixed rate of \$1,000 in interest accruing annually.

d) Except where noted above, accounts payable to related parties do not bear interest, are unsecured and are repayable on demand.

Key management compensation

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly. Key management personnel include the Company's executive officers and Board of Director.

There was no compensation paid to key management during the three months ended August 31, 2017 other than the accrued management fee to a company controlled by the CEO as disclosed above.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Certain new accounting standards and interpretations have been published that are not mandatory for the August 31, 2017 reporting period. Those new standards have been assessed, but are not expected to have any impact on the Company's financial statements.

All of the Company's significant accounting policies and estimates are included in Notes 2 and 3 of

its audited financial statements for the year ended May 31, 2017.

FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities, short term loans and amounts due to related parties. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

<u>Credit risk</u>

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and receivables. The Company limits its exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions. Receivables consist of Goods and Services Tax ("GST") receivable from the Canadian government and are considered low risk.

Currency risk

The Company operates primarily in Canadian dollars. There is foreign exchange risk to the Company as some of its exploration and evaluation property interests and resulting commitments are located in the United States. Management monitors its foreign currency balances and makes adjustments based on anticipated need for currencies. The Company does not engage in any hedging activities to reduce its foreign currency risk.

<u>Liquidity risk</u>

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The Company has historically relied upon equity financings to satisfy its capital requirements and will continue to depend heavily upon equity capital to finance its activities. There can be no assurance the Company will be able to obtain required financing in the future on acceptable terms. The Company anticipated it will need additional capital in the future to finance ongoing exploration of its properties, such capital to be derived from the exercise of outstanding stock options, warrants and/or the completion of other equity financings. The Company has limited financial resources, has no source of operating income and has no assurance that additional funding will be available to it for future exploration and development of its projects, although the Company has been successful in the past in financing its activities through the sale of equity securities. The ability of the Company to arrange additional financing in the future will depend, in part, on the prevailing capital market conditions and exploration success. In recent years, the securities markets in Canada have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur. Any quoted market for the common shares may be subject to market trends generally, notwithstanding any potential success of the Company in creating revenue, cash flows or earnings.

Interest rate risk

The Company normally invests in short-term interest bearing financial instruments. There is a minimal risk that the Company would recognize any loss as a result of a decrease in the fair value of any guaranteed bank investment certificate included in cash as they are currently held in large financial institutions.

Fair value measurements of financial assets and liabilities

Disclosure about significance of inputs used in making fair value measurements is as follows:

- Level 1 quoted prices in active markets for identical assets or liabilities;
- Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 inputs for the asset or liability that are not based on observable market data.

The fair value of cash is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. The Company believes that the recorded values of receivables, due to related parties, short term loan, and accounts payable and accrued liabilities, approximate their current fair values because of their nature and relatively short maturity dates or durations.

OTHER RISKS AND UNCERTAINTIES

The Company currently has no business operations and intends to seek new ventures or other opportunities which could include acquiring a business or assets, which in itself could require additional debt or equity financing. There can be no assurances that the Company will continue to be able to obtain adequate financing in the future or that the terms of such financing will be favourable.

The Company currently has no business operations and intends to seek new ventures or other opportunities which could include acquiring a business or assets, which in itself could require additional debt or equity financing. There can be no assurances that the Company will continue to be able to obtain adequate financing in the future or that the terms of such financing will be favourable.

The Company currently has no source of recurring income and has no significant assets other that cash. The Company's success depends to a certain degree upon retaining key members of management. It is expected that these individuals will be a significant factor in our growth and success.
