4. CAPITAL STOCK, WARRANTS AND STOCK OPTIONS (Cont'd)

Stock Options (Cont'd)

On December 28, 2012, the Company granted stock options to acquire an aggregate of 708,440 common shares at an exercise price of \$0.20 per option to directors and officers of the Company, which expire 10 years from the date of grant. These stock options vested upon grant and were estimated to have a fair value of \$126,939.

The fair value of all the Company's stock options was estimated using the Black-Scholes option pricing model using the following assumptions:

Stock price	\$0.20
Strike price	\$0.20
Volatility*	100.0%
Risk-free interest rate	1.77%

5. LOSS PER SHARE

The calculation of basic and diluted loss per share for the six month period ended June 30, 2013 was calculated by dividing the loss attributable to common shareholders of \$33,607 by the weighted average number of common shares outstanding during the period of 2,074,400, excluding contingently returnable shares.

The calculation of basic and diluted loss per share for the three month period ended June 30, 2013 was calculated by dividing the loss attributable to common shareholder of \$9,676 by the weighted average number of common shares outstanding during the period of 2,074,400, excluding contingently returnable shares.

The diluted loss per share did not include the effect of 708,440 stock options and 208,440 warrants as the effect of the diluted loss per share calculation would be anti-dilutive as there was a loss for the period.

Basic and diluted loss per share for the period ended June 30, 2012 is not presented as all shares outstanding were contingently returnable and therefore not considered to be outstanding for loss per share calculations.
