CANADIAN METALS SIGNS WITH BIOFILIA FOR OBTAINING BOTH THE EXPLOITATION PERMITS AND A CERTIFICATE OF ENVIRONMENTAL AUTHORIZATION

May 19, 2015- Montréal, Québec – Canadian Metals Inc. (The “Corporation”) (CSE : CME) is pleased to announce that it has mandated the company BIOFILIA . Biofilia will be responsible for the implementation of the certificate of authorization required under section 22 of the Environment Quality Act (LQE) of Quebec near the MDDELCC. Also, Biofilia produces the exclusive lease application for the exploitation of mineral surfaces substances according to the standards of the Ministry of Energy and Natural Resources.

About Biofilia

Biofilia is an environmental consulting firm that has been working in the community since 1996 to ensure the appropriate management of natural resources and ecosystems. The company has offices in the Laurentides region (1999) and Montreal region (2005). The qualified biologists and other professionals at Biofilia stand behind their scientific work, and can judiciously advise all types of clientele on strategic planning and execution for various projects to optimize environmental performance.

Stephane Leblanc, Canadian Metals President and C.E.O., stated, " this is an important step toward completing the permitting process for l'exploitation of our the project Langis”.

In the last few months we have added exceptional consultants, board members and have a strong development plan, all is there for the success of our Langis Flagship project.

For almost a decade, the quartz in Langis quarry was exported in Europe to produce Ferrosilicon. Canadian Metals has built rapidly an international management team with local talent to establish and transform in Quebec the resource from Langis quarry in St-Vianey in high grade Ferrosilicon. With this project; Canadian metals wants to establish new standards in connection of Quebec government economic policy and development of Quebec Plan Nord. With the goal to create around a hundred highly qualified direct jobs and approximately 300 indirect jobs, Canadian Metals strongly believe that Province of Quebec has all the infrastructure including skill labor, rail, port and affordable green electricity to realize this industrial mineral project.

About Canadian Metals

Canadian Metals Inc. is focused exclusively on the exploration and development of its Langis Project, a high-purity silica deposit located in the province of Quebec. The Company is rapidly positioning itself to become a future producer of ferrosilicon in North America
