There is no assurance that the Corporation will identify a business or asset that warrants acquisition or participation within the time limitations permissible under the policies of the Exchange, at which time the Exchange may suspend or de-list the Corporation's shares from trading.

2. Basis of preparation

Statement of compliance

These condensed interim financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34 – Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards ("IFRS"). These condensed interim financial statements do not include all of the information required for full annual financial statements. The condensed interim financial statements should be read in conjunction with the Corporation's audited annual financial statements for the year ended December 31, 2014.

Basis of preparation

These condensed interim financial statements have been prepared using historical costs and fair values of certain items, as detailed in the accounting policies set out in Note 3 below. These policies have been applied consistently to all periods presented in these condensed interim financial statements.

Use of estimates and judgments

The preparation of condensed interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the interim condensed financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates. Areas where estimates are significant to the condensed interim financial statements are disclosed in note 5 of the December 31, 2014 audited annual financial statements.

The disclosures provided below are incremental to those included with the annual financial statements and certain disclosures, which are normally required to be included in the notes to the annual financial statements, have been condensed or omitted.

Future Accounting Pronouncements

There were no new or amended standards issued during the three months ended March 31, 2015 that are applicable to the Company in future periods. A description of standards and interpretations that will be adopted by the Company in future periods can be found in the notes to the audited annual financial statements for the year ended December 31, 2014.

4. Cash and cash equivalents

The proceeds raised from the issue of share capital may only be used to identify and evaluate assets or businesses for future investment, with the exception that the lessor of up to 30% of the gross proceeds or \$210,000 may be used to cover prescribed costs of issuing common shares or administrative and general expenses of the Corporation. These restrictions apply until the completion of a Qualifying Transaction by the Corporation as defined under the policies of the Exchange.

5. Share capital

The Corporation has authorized an unlimited number of voting common shares and an unlimited number of preferred shares.

Issued and outstanding common shares

	Number of Shares	Amount \$

9. Financial instruments and risk management

Fair value of financial instruments:

As at March 31, 2015, the Corporation's financial instruments consist of cash and cash equivalents, accounts receivable and accounts payable and accrued liabilities. The carrying values of these financial instruments

approximate their fair values due to their short-term nature.

IFRS requires disclosures about the inputs to fair value measurements for financial assets and liabilities recorded at fair value, including their classification based on the degree to which the fair value is observable.

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in the active market for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Corporation has no financial instruments recorded at fair value through profit and loss.

Risk management

The Corporation is exposed in varying degrees to a variety of financial instrument related risk.

- Credit risk - Credit risk is the risk that one party to a financial instrument will fail to fulfill an obligation and cause the other party to incur a financial loss. Credit risk primarily arises from the Corporation's cash and receivables. The risk exposure is limited to their carrying amounts at the statement of financial position date.
- Liquidity risk - Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations and commitments as they become due. The Corporation manages liquidity through the management of its capital structure, as outlined in note 12 of the audited annual financial statements for the year ended December 31, 2014. The Corporation's liquidity risk arises as a result of its accounts payable and accrued liabilities.
- Interest rate risk - Interest rate risk is the risk that the fair value of future cash flow of a financial instrument will fluctuate because of changes in market interest rates. The effect of interest rates increasing by 1% would have a minimal impact on the Corporation's results.
- Currency risk - The Corporation does not have any material exposures to financial instruments denominated in currencies other than the Canadian dollar.

10. Related party transactions
