The GLN Story

GLN's technology is the engine that sits between advertisers and publishers. The GLN Platform is built for cross device video advertising: Mobile, In-App, Desktop and CTV (Connected Television). The Programmatic Video Marketing Platform is powered by GLN's Patent Pending proprietary machine learning technology that targets and connects digital advertisers with consumers three times faster than industry standards, with among the lowest fraud rates among vendors without collecting PII (Personal Identifiable Information).

The Programmatic Video Technology Platform features integrations at the server level with both Publishers and Advertisers. Our technology quickly finds the most valuable advertisement for every consumer. Publishers make more money through improved CPM (advertising fill rate) combined with a more engaged consumer experience. Advertisers make more money by reaching their target audience more effectively. GLN makes money by retaining a percentage of the advertiser's fee.

GLN is headquartered in Vancouver, Canada with offices in the US and UK and trades on the TSX Venture Exchange under the stock symbol "GOOD" and The Frankfurt Stock Exchange under the stock symbol 4G5.

Addressable Market: The total media ad spend worldwide will rise 7.4% to \$628.63 billion by this year, according to "Global Ad Spending: The eMarketer Forecast for 2018." By 2020, digital's share of total advertising will near 50%.
