INDEPENDENT AUDITORS' REPORT

To the Shareholders of
Rift Valley Resources Corp.

We have audited the accompanying financial statements of Rift Valley Resources Corp. which comprise the statements of financial position as at December 31, 2013 and 2012, and the statements of comprehensive loss, changes in equity and cash flows for the years then ended, and the related notes comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained based on our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Rift Valley Resources Corp. as at December 31, 2013 and 2012, and its financial performance and cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which indicates the existence of a material uncertainty that may cast significant doubt on the ability of Rift Valley Resources Corp. to continue as a going concern.

1. NATURE AND CONTINUANCE OF OPERATIONS

Rift Valley Resources Corp. (the "Company" or "Rift Valley") was incorporated under the Laws of the Province of British Columbia on December 14, 2009. On March 20, 2013, Rift Valley amalgamated with Avatar Ocean Technology Inc. ("Avatar"), a reporting issuer and continues under the name Rift Valley Resources Corp. (see Note 2(b)). The address of the Company's corporate office and its principal place of business is 500-900 West Hastings Street, Vancouver, British Columbia, Canada.

The Company began operations on September 19, 2011 and its principal business activity is the acquisition, exploration and development of mineral properties in British Columbia, Canada. As of December 31, 2013 the Company was in the exploration stage.

For the year ended December 31, 2013, the Company reported a net loss of $647,026, negative cash flow from operating activities of $278,376 and an accumulated deficit of $1,099,572. This raises uncertainty about the Company's ability to continue as a going concern. The Company's ability to continue its operations as intended are dependent on its ability to obtain necessary financing and raise capital sufficient to cover its exploration and operating costs.

These financial statements ("financial statements") do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these financial statements.

2. BASIS OF PRESENTATION

a) Statement of compliance

The financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

These financial statements were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on April 28, 2014.

b) Amalgamation of Rift Valley Resources Corp. and Avatar

On March 20, 2013, Rift Valley amalgamated with Avatar, a reporting issuer in each of the provinces of British Columbia, Alberta and Ontario. Effective on that date, a total of 20,391,652 common shares were allotted to the former shareholders of Avatar and Rift Valley pursuant to the Amalgamation Agreement. 1,999,985 common shares were issued to the former shareholders of Avatar who received one (1) share of the Company for every three and one-half (3.5) shares of Avatar, and 18,391,667 common shares were issued to the shareholders of the Company. The Company continued under the name of Rift Valley Resources Corp. following the amalgamation.

This transaction is considered to be outside the scope of IFRS 3 *Business Combinations* ("IFRS 3") since Avatar does not meet the requirement of a business under IFRS 3. For accounting purposes, the transaction is accounted for in accordance with IFRS 2 *Share-based Payments* whereby Rift Valley is deemed to have issued shares in exchange for obtaining the reporting issuer status of Avatar and ultimately, a listing on a stock exchange.

2. BASIS OF PRESENTATION (continued)

b) Amalgamation of Rift Valley Resources Corp. and Avatar (continued)

The fair value of the 1,999,985 shares issued to the former shareholders of Avatar was determined to be $399,997, based on a value of $0.20 per share realized by the Company in a concurrent private placement issued on March 11, 2013. In addition, the Company also incurred other listing expenses of $74,438 for this amalgamation. As at March 20, 2013, Avatar did not have any identifiable assets or liabilities, as a result, the total amount of the consideration of $399,997 given was recorded as listing expense in the financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Measurement basis

The financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value, as explained in the accounting policies set out in paragraphs (n) and (o). In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The functional and presentation currency of the Company is the Canadian dollar.

b) Use of estimates

The preparation of these financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions which affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses for the periods reported. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Significant areas requiring the use of management estimates include the determination of amortization of capital assets, impairment of mineral properties and financial instruments, potential decommissioning liabilities and deferred income tax assets and liabilities. Actual results could differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future period.

c) Use of judgments

Critical accounting judgements are accounting policies that have been identified as being complex or involving subjective judgments or assessments with a significant risk of material adjustment in the next year. The more significant areas where management judgement has been applied are:

(i) Going concern

The assessment of the Company's ability to execute its strategy by funding future working capital requirements involves judgement. The directors monitor future cash requirements to assess the Company's ability to meet these future funding requirements. Further information regarding going concern is outlined in Note 1.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

c) Use of judgments (continued)

(ii) Exploration and evaluation expenditure

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If information becomes available after expenditure is capitalized suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the profit or loss in the period the new information becomes available.

(iii) Amalgamation date

The determination of the date on which the Company amalgamated with Avatar involves judgement about the date at which management obtained control of the amalgamated company and requires management to consider various factors determining control. Management has determined that the amalgamation date was on March 20, 2013 (See Note 2(b)).

(iv) Determination of the treatment and allocation of value of shares issued on amalgamation

The determination of the value of shares issued to the former shareholders of Avatar requires both management judgement and estimation. In addition, in management judgement, Avatar was not considered as a business and did not meet the conditions for a business combination. The fair value of the shares issued to the former shareholders of Avatar and the related costs has been disclosed as listing expenses.

d) Cash and cash equivalents

Cash and cash equivalents in the statements of financial position comprise cash at banks and on hand, and short term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash. The Company's cash and cash equivalents are invested with major financial institutions in business accounts and held in trust by the lawyers and are available on demand by the Company for its programs, and are not invested in any asset backed deposits/investments.

e) Deferred finance costs

Professional, consulting and regulatory fees as well as other costs directly attributable to financing transactions are reported as deferred financing costs until the transactions are completed, if the completion of the transaction is considered to be more likely than not. Share issue costs are charged to share capital when the related shares are issued. Costs relating to financing transactions that are not completed, or for which successful completion is considered unlikely, are charged to operations.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

f) Amortization

Equipment is recorded at cost less accumulated amortization and impairment. Amortization is calculated at the following annual rates:

Office equipment	50% straight line

Useful lives are reviewed and adjusted, if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than the estimated recoverable amount. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized in the statement of loss.

Where an item of equipment comprises significant components with different useful lives, the components are accounted for as separate items of equipment. Subsequent costs to replace parts of an item of equipment are recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and the cost of the item can be measured reliably.

g) Mineral properties

All expenditures related to the cost of exploration and evaluation of mineral resources including acquisition costs for interests in mineral claims are capitalized as mineral property interests and are classified as intangible assets. General exploration costs not related to specific mineral properties are expensed as incurred. When shares are issued as part of mineral property exploration costs, they are valued at the closing share price on the date of issuance unless the fair value of goods or services received is determinable.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, capitalized costs of the related property are reclassified as mining assets and upon commencement of commercial production, are amortized using the units of production method over estimated recoverable reserves. Impairment is assessed at the level of cash-generating units. Management regularly assesses carrying values of non-producing properties and properties for which events and circumstances may indicate possible impairment. Impairment of a property is generally considered to have occurred if one of the following factors are present; the rights to explore have expired or are near to expiry with no expectation of renewal, no further substantive expenditures are planned or budgeted, exploration and evaluation work is discontinued in an area for which commercially viable quantities have not been discovered, indications that in an area with development likely to proceed the carrying amount is unlikely to be recovered in full be development or sale.

The recoverability of mineral property interests and capitalized exploration and development costs is dependent on the existence of economically recoverable reserves, the ability to obtain the necessary financing to complete the development of the reserves, and the profitability of future operations. The Company has not yet determined whether or not any of its mineral properties contain economically recoverable reserves. Amounts capitalized to mineral properties as exploration and development costs do not necessarily reflect present or future values.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

g) Mineral properties (continued)

Mineral properties are regularly reviewed for impairment or whenever events or changes in circumstances indicate that the carrying amounts of properties may exceed its recoverable amount. When an impairment review is undertaken, the recoverable amount is assessed by reference to the higher of a value in use (being the present value of expected future cash flows of the relevant cash-generating unit) and fair value less costs to sell. If the carrying amount of an asset exceeds the recoverable amount an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset.

Exploration costs renounced due to flow-through share subscription agreements remain capitalized, however, for corporate income tax purposes; the Company has no right to claim these costs as tax deductible expenses.

Recorded costs of mineral properties and deferred exploration costs are not intended to reflect present or future values of resource properties. The recorded costs are subject to measurement uncertainty and it is reasonably possible, based on existing knowledge, that change in future conditions could require a material change in the recognized amount.

Payments on mineral property option agreements are made at the discretion of the Company and, accordingly, are recorded on a cash basis.

h) Provisions

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probably that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. As at December 31, 2013, the Company has not incurred any decommissioning costs related to the exploration and evaluation of its mineral properties and accordingly no provision has been recorded for such site reclamation or abandonment.

i) Government assistance

B.C. mining exploration tax credits for exploration expenditures incurred in B.C. are treated as a reduction of the exploration and development costs of the respective mineral property. Until such time that there is significant uncertainty with regard to collections and assessments, the Company will record any recovered tax credits at the time of receipt. No gain or loss is realized during the exploration stage until all carrying costs of the specific interest have been offset.

j) Share-based payments

The stock option plan allows Company employees and consultants to acquire shares of the Company. The fair value of options granted is recognized as an employee or consultant expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee.

The fair value is measured at grant date and each tranche is recognized on a graded basis over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

k) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

l) Income tax

Income tax expense comprises current and deferred income tax. Tax is recognized in the income statement except to the extent that it relates to items recognized directly into equity, in which case the related tax effect is recognized in equity.

Current tax expense is based on the results for the period as adjusted for items that are not taxable or not deductible. Current tax expense is calculated using tax rates, laws and government policies that were enacted or substantively enacted at the balance sheet date.

Deferred tax is accounted for using a temporary difference approach and is the tax expected to be payable or recoverable on temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and the corresponding tax bases used in the computation of taxable income. Deferred tax is calculated based on the expected manner in which temporary differences related to the carrying amounts of assets and liabilities and are expected to reverse using tax rates and laws enacted or substantively enacted at the balance sheet date which are expected to apply in the period of reversal.

Deferred tax assets and liabilities are not recognized in respect of temporary differences that arise on initial recognition of assets and liabilities acquired other than in a business combination and which do not affect accounting or taxable profit or loss at the time of the transaction.

m) Flow-through shares

Resource expenditures for income tax purposes related to exploration and development activities funded by flow-through share arrangements are renounced to investors in accordance with income tax legislation. At the time flow-through shares are issued, there may be a potential premium paid on the flow-through shares calculated based on the share issuance price and the market price at the time of closing. A liability is recognized for the premium on the flow-through shares and is subsequently reversed and recorded as other income or deferred tax expense as the Company incurs qualifying Canadian exploration expenses.

In instances where the Company has issued flow-through shares by way of a unit offering, the proceeds are allocated first to capital stock based on the fair value of the common shares at the time the units are priced and any residual value is allocated to the warrants reserve first based on the fair value of the warrant component on grant date using the Black-Scholes option pricing model. Any remaining residual value is then recognized as a liability for the premium on the flow-through shares.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

n) Financial assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through earnings. The Company's cash is classified as FVTPL.

Financial assets classified as loans and receivables and held to maturity assets are measured at amortized cost. Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income and loss except for losses in value that are considered other than temporary which are recognized in earnings. At December 31, 2013 and December 31, 2012, the Company has not classified any financial assets as loans and receivables or available for sale.

Transactions costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

o) Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized costs using the effective interest rate method. The effective interest rate method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Company's accounts payable is classified as other financial liabilities.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value with changes in fair value recognized in earnings unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized in earnings.

p) Change in accounting policies

The Company adopted the following accounting policies effective January 1, 2013:

IFRS 7, Financial Instruments: Disclosures - requires entities to provide additional information about offsetting of financial assets and financial liabilities that will enable users of financial statements to evaluate the effect or potential effect of netting arrangements, including rights of set-off associated with an entity's recognized financial assets and recognized financial liabilities, on the entity's financial position. The adoption of this IFRS did not impact the Company's financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

p) Change in accounting policies (continued)

IFRS 10, Consolidated Financial Statements, requires an entity to consolidate an investee when it has power over the investee, is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. IFRS 10 replaced SIC-12, Consolidation-Special Purpose Entities, and parts of IAS 27, Consolidated and Separate Financial Statements. The adoption of this IFRS did not impact the Company's financial statements.

IFRS 12, Disclosure of Interests in Other Entities, establishes disclosure requirements for interests in other entities, such as subsidiaries, joint arrangements, associates, and unconsolidated structured entities. The standard carries forward existing disclosures and also introduces significant additional disclosure that address the nature of, and risks associated with, an entity's interests in other entities. The adoption of this IFRS did not impact the Company's financial statements.

IFRS 13, Fair Value Measurement, is a comprehensive standard for fair value measurement and disclosure for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. The adoption of this IFRS did not require any adjustments to the valuation techniques used by the Company to measure fair value and did not result in any measurement adjustments as at January 1, 2013.

IAS 1, Presentation of Financial Statements, has been amended to require entities to separate items presented in other comprehensive income ("OCI") into two groups, based on whether or not items may be recycled to net income in the future. Entities that choose to present OCI items before tax will be required to show the amount of tax related to the two groups separately including prior year comparatives. The adoption of this IFRS did not impact the Company's financial statements.

q) New accounting standards issued but not yet effective

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB that are mandatory for future accounting periods. Some updates that are not applicable or are not consequential to the Company may have been excluded from the list below.

The following standard will be effective for annual periods beginning on or after January 1, 2014:

IFRIC 21 *Levies* - In May 2013, the IASB issued IFRIC 21, an interpretation of IAS 37 - *Provisions, Contingent Liabilities and Contingent Assets* ("IAS 37"), on the accounting for levies imposed by governments. IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past activity or event ("obligating event") described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods commencing on or after January 1, 2014.

IAS 36 *Impairment of Assets* - In May 2013, the IASB issued amendments to IAS 36 which restricts the requirement to disclose the recoverable amount of an asset or CGU to periods in which an impairment loss has been recognized or reversed. The amendments also expand and clarify the disclosure requirements applicable when an asset or CGU's recoverable amount has been determined on the basis of fair value less cost of disposal. The amendments are effective for annual periods beginning on or after January 1, 2014 and should be applied retrospectively.

The extent of the impact of adoption of these standards and interpretations on the financial statements of the Company has not been determined.

(Expressed in Canadian Dollars)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

q) New accounting standards issued but not yet effective

The following standard will be effective for annual periods beginning on or after January 1, 2018:

IFRS 9 *Financial Instruments* - In November 2009, as part of the IASB project to replace IAS 39 *Financial Instruments: Recognition and Measurement*, the IASB issued the first phase of IFRS 9 *Financial Instruments*, that introduces new requirements for the classification and measurement of financial assets. The standard was revised in October 2010 to include requirements regarding classification and measurement of financial liabilities.

4. DEPOSITS

	2013	2012
	$	$
Mineral property security deposits	20,000	20,000
Rental deposit (long-term)	6,667	10,000
Rental deposit (current)	3,333	-
	30,000	30,000

5. MINERAL PROPERTY INTERESTS

Expenditures on interests in mineral properties are considered exploration and evaluation (E&E) assets.

MINERAL PROPERTIES OR RIGHTS

	2013	2012

The impairment assessment of exploration and evaluation assets did not result in any impairment provisions on Company's properties.

(Expressed in Canadian Dollars)

5. MINERAL PROPERTY INTERESTS (continued)

Cat Mountain Claims, British Columbia

In September 2011, the Company entered into a memorandum of understanding to acquire an option to acquire an undivided 75% right, title and interest to twenty contiguous mineral claims located in west central British Columbia, except for a 2% net smelter royalty (the “NSR”), comprised of approximately 5,984 hectares. The memorandum of understanding was extended into an Option Agreement (the “Agreement”) on November 30, 2011. The agreement was amended on January 9, 2013 (with a correction on April 30, 2013 and an additional extension November 25, 2013), for the purpose of deferral of the terms of cash payments and share issuances. The consideration for this amended agreement was a cash payment of $10,000 to be made by January 31, 2013 and the issuance of 100,000 common shares to the optionors on the date that the shares of the Company initially begin trading to be made on the stock exchange. On January 24, 2013, the Company made the $10,000 cash payment. On May 14, 2013, the 100,000 common shares were issued (see Note 14).

Pursuant to the agreement, the Company may purchase 1% of the two percent 2% NSR at any time for $2,000,000. The Company can maintain its option to acquire the interest in the claims by issuing an aggregate of 1,000,000 common shares of Rift Valley, paying $500,000 in cash and incurring $1,500,000 in expenditures on the property within five years.

The payments are due as follows:

	Share Issuance	Cash Payment	Exploration Expenditures
		$	$
On signing memorandum of understanding (paid)		50,000	-
On first day of execution of Agreement (issued)	500,000	-	-
On or before March 30, 2013 (issued on May 14, 2013)	100,000	-	-
On or before March 30, 2014	100,000	-	-
On or before October 31, 2014	-	50,000	350,000
On or before March 30, 2015	100,000	-	-
On or before October 31, 2015	-	100,000	400,000
On or before March 30, 2016	100,000	-	-
On or before October 31, 2016	-	100,000	-
On or before March 30, 2017	100,000	-	-
On or before October 31, 2017	-	100,000	750,000
On or before October 31, 2018	-	100,000	-
	1,000,000	500,000	1,500,000

Upon acquiring the 75% interest, the Company can acquire an additional 15% undivided interest upon completing an additional $3,500,000 in expenditures on the property within three years. The Company can acquire an additional 10% undivided interest upon funding the property until commercial production has begun.

(Expressed in Canadian Dollars)

6. OFFICE EQUIPMENT

	Cost	Accumulated Amortization	Net Book Value 2013	Net Book Value 2012
	$	$	$	$
Office Equipment	2,007	2,007	-	1,004
Total	2,007	2,007	-	1,004

7. RELATED PARTY TRANSACTIONS AND BALANCES

During the year December 31, 2013, the Company incurred the following related party transactions:

(a) $26,950 (2012 - $28,708) in rent expense to a company controlled by the Chief Financial Officer.

(b) $5,000 (2012 - $16,000) in exploration expenses to a company controlled by the same group of management.

(c) The Company has identified its directors and senior officers as its key management personnel. No post-employment benefits, other long-terms benefits and termination benefits were made during the year ended December 31, 2013. Key management compensation paid to directors and senior officers or companies controlled by them consisted of consulting fees in the amount of $84,950 (2012 - $88,750).

(d) As at December 31, 2013, included in accounts payable is $27 (2012 - $21,149) to the companies controlled by the officers and a company controlled by the same group of management.

(e) One of the optionors in the Cat Mountain Option Agreement (the “Agreement”) dated November 30, 2011 (note 5) is also a Director of the Company.

8. SHARE CAPITAL

(a) Authorized Share Capital

The Company is authorized to issue unlimited number of common shares without par value

(Expressed in Canadian Dollars)

8. SHARE CAPITAL (continued)

(b) Issued and Outstanding Common Shares

	Number of Common Shares	Amount
		$
Balance, December 31, 2011	9,625,000	237,500
Issued for cash at $0.075 per share	6,396,667	479,750
Issued for cash at $0.15 per share	1,603,333	240,500
Share issue costs	-	(4,595)
Balance, December 31, 2012	17,625,000	953,155
Issued for cash at $0.15 per share	666,667	100,000
Issued for cash at $0.20 per share	100,000	20,000
Share issuance costs	-	(2,270)
Shares cancelled on amalgamation	(18,391,667)	-
New shares issued on amalgamation	18,391,667	-
Issued on amalgamation to former Avatar shareholders	1,999,985	399,997
Shares issued for Cat Mountain Claims	100,000	20,000
Balance, December 31, 2013	20,491,652	1,490,882

On July 24, 2012, the Company issued 6,396,667 common seed shares at $0.075 per share for a total of $479,750, of which $52,500 was received prior to December 31, 2011.

On August 9, 2012, the Company issued 1,603,333 common seed shares at $0.15 per share for a total of $240,500.

On March 4, 2013, the Company issued 666,667 common seed shares at $0.15 per share for a total of $100,000.

On March 11, 2013, the Company issued 100,000 common seed shares at $0.20 per share for a total cash of $20,000.

On March 20, 2013, the Company issued 1,999,985 common shares valued at $0.20 per share for a total of $399,997 upon amalgamation with Avatar. In addition, the Company exchanged the original 18,391,667 common shares outstanding under the predecessor, Rift Valley for 18,391,667 common shares of Rift Valley, the amalgamated Company.

On May 14, 2013, pursuant to the Cat Mountain property purchase Option Agreement (Note 5), the Company issued 100,000 common shares at $0.20 each for the $20,000 option obligation.

During the year ended December 31, 2013, the Company incurred share issue costs of $2,270 (2012 - $4,595).

(c) Stock Options

As at December 31, 2013 and 2012, the Company had not granted any stock options.

(d) Shares held in escrow

As at December 31, 2013, the company has 10,754,643 common shares held in escrow (2012 - nil). These escrow shares are subject to escrow trading restrictions pursuant to the Escrow agreement and are released on a straight basis, with one quarter released on the date the Company's securities are listed on a Canadian exchange (listing date), 1/3 of remaining escrow securities released 6 months after the listing date, one half of remaining escrow securities released 12 months after the listing date and remainder released 18 months after the listing date.

(Expressed in Canadian Dollars)

9. CONTRIBUTED SURPLUS

On March 13, 2013, the founders contributed an additional $37,000 to increase the effective amount of cash paid for 2,466,667 of the 7,500,000 common seed shares issued on September 20, 2011 from $0.005 to $0.02 per share. The contribution has been recorded as contributed surplus as no additional shares were issued.

10. INCOME TAXES

The following table reconciles the amount of income tax recoverable on application of the combined statutory Canadian federal and provincial income tax rates:

	2013	2012
	$	$
Combined statutory rate	25.75%	25.5%
Expected income tax recovery	(166,609)	(77,358)
Net adjustment for deductible and non-deductible amounts	(758)	(700)
Change of income tax rates	(5,331)	-
Deferred tax asset not recognized	172,698	78,058
	-	-

Significant components of the Company's deferred income tax assets are as follows:

	2013	2012
	$	$
Future income tax rates	26%	25%
Future income tax assets:		
Non-capital loss	264,175	84,792
Share issue costs	1,189	919
Deferred tax assets not recognized	265,364	85,711

As at December 31, 2013, the Company has available non-capital losses of approximately $1,016,000 (2012 - $339,000 for Rift Valley and $28,000 for Avatar) for deduction against future taxable income, and resource-related expenditures of approximately $341,000 (2012 - $383,000) available for deduction against future Canadian taxable income. Non-capital losses, if not utilized will expire as follows:

2031	31,000
2032	336,000
2033	649,000
	$ 1,016,000

No deferred income tax asset has been recognized because the amount of future taxable profit that will be available to realize such assets is unpredictable. The ultimate realization of deferred income tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred income tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. The amount of deferred income tax asset considered realizable could change materially in the near term based on future taxable income during the carry forward period.

(Expressed in Canadian Dollars)

11. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern (see Note 1). The Company does not have any externally imposed capital requirements to which it is subject.

As at December 31, 2013, the Company had capital resources consisting of all components of shareholders' equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue common shares.

12. FINANCIAL INSTRUMENTS

Fair values

The Company's financial instruments include cash and accounts payable. The carrying amounts of these financial instruments are a reasonable estimate of their fair values because of their current nature. The fair value of these financial instruments approximates their carrying value because of the current nature.

The following table summarizes the carrying values of the Company's financial instruments:

	2013	2012
	$	$
FVTPL (i)	93,532	155,317
Loans and receivables (ii)	-	16,456
Other financial liabilities (iii)	36,984	105,388

(i) Cash
(ii) Amounts receivable
(iii) Accounts payable

The Company classifies its fair value measurements in accordance with the three level fair value hierarchy as follows:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities
Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices), and
Level 3 – Inputs that are not based on observable market data

The following table sets forth the Company's financial assets measured at fair value on a recurring basis by level within the fair value hierarchy as follows:

	Level 1	Level 2	Level 3	Total
	$	$	$	$
As at December 31, 2013:				
Cash	93,532	-	-	93,532
As at December 31, 2012:				
Cash	155,317	-	-	155,317

12. FINANCIAL INSTRUMENTS (continued)

Financial risk management objectives and policies

The Company's financial instruments include cash and accounts payable. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

(i) *Currency risk*

The Company's expenses are denominated in Canadian dollars. The Company's corporate office is based in Canada and current exposure to exchange rate fluctuations is minimal.

(ii) *Interest rate risk*

The Company is exposed to interest rate risk on the variable rate of interest earned on bank deposits. The fair value interest rate risk on bank deposits is insignificant as the deposits are short-term. The Company has not entered into any derivative instruments to manage interest rate fluctuations.

(iii) *Credit risk*

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subject the Company to concentrations of credit risks consist principally of cash. To minimize the credit risk on cash the Company places the instrument with financial institution.

(iv) *Liquidity risk*

In the management of liquidity risk of the Company, the Company maintains a balance between continuity of funding and exploration activity. Management closely monitors the liquidity position and expects to have adequate sources of funding to finance the Company's projects and operations.

13. COMMITMENTS

a) Pursuant to the option agreement entered on November 30, 2011 and amended on January 9, 2013, (with a correction on April 30, 2013 and an additional extension November 25, 2013), the Company is committed to the payments, share issuance and exploration expenditure required to maintain the option to acquire the 75% undivided interest on the Cat Mountain properties as described in Note 5.

b) On March 21, 2012, the Company entered into a consulting agreement with DAG Consulting Corp. ('DAG") under which DAG will act as corporate finance advisor and listing project manager in overseeing execution of a Reverse Takeover transaction between the Company and a listed CNSX company. The Company is committed to pay $25,000 plus HST in the following installments:
   i. $5,000 on acceptance of agreement (paid)
   ii. $7,500 on final agreement with a reporting issuer (paid)
   iii. $12,500 on conditional acceptance of a listing application by the CNSX
   iv. Finders' fees to be negotiated for funds introduced by DAG

14. SUBSEQUENT EVENT

Subsequent to year end, 1,792,441 shares were released from escrow.
