Management Discussion and Analysis
For the three months ended March 31, 2016

DISCLAIMER FOR FORWARD-LOOKING INFORMATION

Certain statements in this report are forward-looking statements, which reflect our management's expectations regarding our future growth, results of operations, performance and business prospects and opportunities. Forward-looking statements consist of statements that are not purely historical, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits we will obtain from them. These forward-looking statements reflect management's current views and are based on certain assumptions and speak only as of March 31, 2016. These assumptions, which include, management's current expectations, estimates and assumptions about the global economic environment may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions, (2) inability to locate and identify potential business acquisitions, (3) potential negative financial impact from regulatory investigations, claims, lawsuits and other legal proceedings and challenges, and (4) other factors beyond our control. There is a significant risk that such forward-looking statements will not prove to be accurate. Investors are cautioned not to place undue reliance on these forward-looking statements. No forward-looking statement is a guarantee of future results. We disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Additional information about these and other assumptions, risks and uncertainties are set out in the section entitled "Risk Factors" below.

1.1 – Date and Basis of Discussion is dated as of May 30, 2016 and should be read in conjunction with the unaudited financial statements of Rift Valley Resources Corp. for the three month period ended March 31, 2016 ("March 31, 2016 Financial Statements"). The March 31, 2016 Financial Statements are prepared in compliance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34"). Accordingly, certain information and footnote disclosure normally included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"), have been omitted or condensed. Unless expressly stated otherwise, all financial information is presented in Canadian dollars.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

1.2 – Overall Performance

Nature of Business

Rift Valley Resources Corp. was incorporated under the Laws of the Province of British Columbia on December 14, 2009. On March 20, 2013, Rift Valley amalgamated with Avatar Ocean Technology Inc. (“Avatar”), a reporting issuer and continues under the name Rift Valley Resources Corp. (the “Company” or “Rift Valley”). The address of the Company’s corporate office and its principal place of business is 6511 Housman Place, Richmond, British Columbia, Canada. The Company’s registered and records office address is 2800-666 Burrard Street, Vancouver, British Columbia, Canada. As of March 31, 2016 the Company was in the exploration stage.

At March 31, 2016, the Company had not yet achieved profitable operations, had accumulated a deficit of \$1,654,981 had working capital deficiency of \$8,598, which may not be sufficient to sustain operations over the next twelve months, and the Company expects to incur further losses in the development of its business, all of which casts substantial doubt about the Company’s ability to continue as a going concern. However, it is expected that these funds are sufficient to complete its business as discussed in “Financing” below. The Company’s ability to continue as a going concern is dependent upon its ability to generate future profitable operations and to identify, evaluate and negotiate potential business acquisitions or participation agreements.

Financing

The Company is in the process of raising additional capital. Management expects to maintain operating expenses from the existing shareholders.

1.3 – Selected Annual Information – N/A

1.4 – Results of Operations

Operations during the three months ended March 31, 2016 were primarily related to obtaining the necessary financing, as well as continuing the identification and evaluation of future potential projects.

There were no investor relations arrangements entered into during the three months ended March 31, 2016. There were no legal proceedings, contingent liabilities, and defaults under debt or other contractual obligations, breach of any laws or special resolutions during the three months ended March 31, 2016.

During the three months ended March 31, 2016, the Company incurred operating expenses of \$10,282 (2015 \$17,410), consisting of professional fees of \$7,000 (2015 \$10,000), rent and occupancy of \$nil (2015 \$4,013), exchange fees of \$1,650 (2015 \$1,500), transfer agent of \$1,617 (2015 \$1,701) and office and miscellaneous fees of \$17 (2015 \$196). The costs were generally consistent with the prior period.

Operating Expenses	10,282	6,664	7,052	12,343	17,410	11,195	18,823	29,459
Write off Project Costs	-	435,901	-	-	-	-	-	-
Loss and Comprehensive Loss for Period	10,282	442,565	7,052	12,343	17,410	11,195	18,823	29,459
Basic and diluted loss per share	(0.00)	(0.02)	(0.00)	(0.00)	(0.00)	(0.00)	(0.00)	(0.00)
Weighted average number of common shares outstanding	24,591,652	23,424,985	22,813,874	21,924,985	20,591,652	20,591,652	20,591,652	20,491,652

The operating expenses were generally consistent except for the listing expenses incurred related to the amalgamation and the travel to conferences related to capital raising activities described above.

In December, 2015, the Company allowed the CAT Mountain option to lapse and impaired all prior costs at the 2015 year end.

1.6 – Liquidity and Capital Resources

The Company is in the exploration stage and therefore has incurred losses and negative cash flows from operations. The Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placement. The Company's ability to raise cash depends on capital market conditions, commodities price, and the results of ongoing exploration programs. There is no assurance that the Company will be able to obtain any additional financing on terms acceptable to the Company. The quantity of funds to be raised and the terms of any equity financing that may be undertaken will be negotiated by management as opportunities to raise funds arise. Actual funding requirements may vary from those planned due to a number of factors, including the progress of exploration and development activity.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

1.6 – Liquidity and Capital Resources (continued)

The mining industry is capital intensive and there can be no certainty that the Company's existing cash balances or that the proceeds from the issuance of its common shares will provide sufficient funds for all of the Company's cash requirements. Should the need arise, the Company may pursue other financing options or rely on joint venture partners to supply some of funds required to explore and develop any acquisitions. There is no assurance that the Company will be successful in obtaining the funds it may require for its program or that the terms of any financing obtained will be acceptable.

The Company is operating from 6511 Housman Place, Richmond. Phone, and equipment usage is provided at no cost by a company controlled by a former officer of the Company. Accordingly, the Company has no commitments for operations or capital expenditures as at March 31, 2016. As at March 31, 2016, the Company had cash and cash equivalents on hand of \$11,091 (December 31, 2015 - \$13,442). The decrease of cash and cash on hand was primarily due to operating activities.

During the three months ended March 31, 2016, cash used in operating activities was \$2,879 (2015 - \$12,228), cash provided by (used) in investing activities was \$nil (2015 – used \$3,500), cash increased by financing activities was \$nil (2015 - \$nil).

Shareholder's equity as at March 31, 2016 was \$(8,598) (December 31, 2015 - \$1,684). The Company will need to raise additional sources of funding to maintain operations at the currently level. Although the Company has been successful in the past in rising the necessary funding to continue operations, there can be no certainty it will be able to do so in the future.

1.7 – Capital Resources

The capital resources of the Company as at March 31, 2016 are primarily its cash and cash equivalents of \$11,091. The Company will require additional financing to fund any anticipated exploration expenditures, operating expenses or future acquisitions. The Company anticipates funding future expenditures through additional equity subscriptions, such as private placements or through the exercise of warrants and options. In light of the continually changing financial markets, there is no assurance that funding by equity subscriptions will be possible at the times required or for the amounts desired or that it can be obtained on terms acceptable to the Company and its shareholders. Accordingly, the Company is investigating various business opportunities that ideally will increase the Company's positive cash flow.

If additional funds are raised through the issuance of equity securities, the percentage ownership of current shareholders will be reduced and such equity securities may have rights, preferences, or privileges senior to those of the holders of the Company's common stock.

1.8 – Off Balance Sheet Arrangements

As at March 31, 2016, there was no off-balance sheet arrangements to which the Company is committed.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

1.9 – Transactions with Related Parties

The Company had the following balances and transactions with executive officers or companies controlled by these officers for the three months ended March 31, 2016:

	March 31, 2016	December 31, 2015
Transactions:		
Accounts Payable:		
Chief Executive Officer	\$ Nil	\$ 57
Vice President - Exploration	\$ 2,625	\$ 2,625

There were no other transactions with related parties except as noted in 1.2 above and 1.15 below.

1.10 – Fourth Quarter – N/A

1.11 – Proposed Transactions

The Company has no pending or proposed transactions at March 31, 2016.

1.12 – Critical Accounting Estimates

The Company has outlined the basis of its critical accounting estimates in Note 3 of the December 31, 2015 Financial Statements.

1.13 – Changes in Accounting Policies – International Financial Reporting Standards (“IFRS”)

The Company does not foresee any material changes due to IFRS changes which are not yet effective. See Note 3 (q) of the December 31, 2014 Financial Statements.

1.14 – Financial Instruments and Other Instruments

The Company's financial instruments consist of cash and cash equivalents and accounts payable and accrued liabilities. The Company's financial instruments are exposed to the following risks:

Credit Risk

The Company's primary exposure to credit risk is the risk of illiquidity of cash and cash equivalents amounting to \$11,091 at March 31, 2016. As the Company's policy is to limit cash holdings to instruments issued by major Canadian banks, or investments of equivalent or better quality, the credit risk is considered by management to be negligible. Amounts recoverable as at March 31, 2016 include GST receivable of \$528 due from the Canadian government.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to pay financial instrument liabilities as they come due. The Company's only liquidity risk from financial instruments is its need to meet operating accounts payable requirements. The Company has maintained sufficient cash balances to meet these needs at March 31, 2016.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

1.14 – Financial Instruments and Other Instruments (continued)

Foreign Exchange Risk

The Company has virtually no foreign exchange risk as all its activities are carried out in Canada and all its financial assets and liabilities are denominated in Canadian dollars.

Price Risk

The Company is not exposed to price risk. The carrying value of cash and cash equivalents and accounts payable and accrued liabilities approximate their fair values due to the short maturity of those instruments. There are no incomes, expenses, gains or losses associated with the financial instruments.

Interest Rate Risk

The Company has been exposed to interest rate risk on its cash and cash equivalents. The majority of these deposits have been in discounted instruments with pre-determined fixed yields. Interest rate movements will affect the fair value of these instruments so the Company manages maturity dates of these instruments to match cash flow needs, enabling realization at no loss in almost all cases. Unrealized gains and losses are reported in other comprehensive income. At March 31, 2016, the Company maintained all of its cash balance either on deposit in a chequing account or in a GIC permitting early redemption with a major Canadian bank.

1.15 – Other MD&A Requirements

Share Capital

The total number of common shares issued and outstanding as at March 31, 2016 was 24,591,652.

Disclosure of Outstanding Share Data

As at the date of this report there were no stock options or warrants outstanding.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

RISK FACTORS AND UNCERTAINTIES

The Company is in the business of acquiring, exploring and, if warranted, developing and exploiting natural resource properties, currently in British Columbia, Canada. Due to the nature of the Company's business and the present stage of exploration of its mineral properties (which are primarily early stage exploration properties with no known resources or reserves), many risk factors will apply. The risks described below are not the only ones facing the Company. Additional risks not presently known to the Company may also impair the business operations.

Going Concern and Financing Risks

The Company has limited financial resources, has no source of operating cash flow and has no assurance that additional funding will be available to it for further exploration and development of its projects or to fulfill its obligations under any applicable agreements. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that it will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with the possible loss of such properties.

Insufficient Financial Resources

The Company does not presently have sufficient financial resources to meet obligations when they become due, undertake by itself the acquisition, exploration and development of all of its planned acquisition, exploration and development programs. Future property acquisitions and the development of the Company's properties will therefore depend upon the Company's ability to obtain financing through the joint venturing of projects, private placement financing, public financing, short or long term borrowings or other means. There is no assurance that the Company will be successful in obtaining the required financing. Failure to raise the required funds could result in the Company losing, or being required to dispose of, its interest in its properties.

General Economic Conditions

The recent events in global financial markets have had a profound impact on the global economy. A continued or worsened slowdown in the financial markets or other economic conditions, including but not limited to, consumer spending, employment rates, business conditions, inflation, fuel and energy costs, consumer debt levels, lack of available credit, the state of the financial markets, interest rates, and tax rates may adversely affect the Company's growth and profitability. These factors could have a material adverse effect on the Company's financial condition and results of operations.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

RISK FACTORS AND UNCERTAINTIES (continued)

Dependence on Others and Key Personnel

The success of the Company's operations will depend upon numerous factors, many of which are beyond the Company's control, including (i) the ability to design and carry out appropriate exploration programs on its mineral properties; (ii) the ability to produce minerals from any mineral deposits that may be located; (iii) the ability to attract and retain additional key personnel in exploration, marketing, mine development and finance; and (iv) the ability and the operating resources to develop and maintain the properties held by the Company. There can be no assurance of success with any or all of these factors on which the Company's operations will depend, or that the Company will be successful in finding and retaining the necessary employees, personnel and/or consultants in order to be able to successfully carry out such activities.

Government Regulation

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to prospecting, development, production, environmental protection, mining taxes, labor standards, property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company.

Competition

The Company's business of the acquisition, exploration and development of mineral properties is intensely competitive. The Company may be at a competitive disadvantage in acquiring additional mining properties because it must compete with other individuals and companies, many of which have greater financial resources, operational experience and technical capabilities than the Company. Increased competition could adversely affect the Company's ability to attract necessary capital funding or acquire suitable producing properties or prospects for mineral exploration in the future.

Fluctuation of Metal Prices

Even if commercial quantities of mineral deposits are discovered by the Company, there is no guarantee that a profitable market will exist for the sale of the metals produced. There can be no assurance that the price of any commodities will be such that any of the properties in which the Company has, or has the right to acquire, an interest may be mined at a profit.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

RISK FACTORS AND UNCERTAINTIES (continued)

Share Price Volatility

There can be no assurance that an active trading market in our securities will be established and sustained. The market price for our securities could be subject to wide fluctuations. Factors such as commodity prices, government regulation, interest rates, share price movements of our peer companies and competitors, as well as overall market movements, may have a significant impact on the market price of the securities of our Company. The stock market has from time to time experienced extreme price and volume fluctuations, particularly in the mining sector, which have often been unrelated to the operating performance of particular companies.

Permits and Licenses

The operations of the Company will require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects, on reasonable terms or at all. Delays, or a failure to obtain such licenses and permits, or a failure to comply with the terms of any such licenses and permits that the Company does obtain, could have a material adverse effect on the Company.

Mineral Interests

In December, 2015, the Company allowed the CAT Mountain option to lapse and impaired all prior costs at 2015 year end. The Company has certain decommissioning responsibilities, the amount of which is not determined. The Company estimates that the reclamation bond of \$20,301 is sufficient to perform the reclamation work requested by the Ministry of Energy and Mines, however, these amounts are not determined and the completion of the work is subject to Ministry of Energy and Mines inspection.

Title Matters

Although the Company has taken steps to verify the title to the mineral properties in which it has or has a right to acquire an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee title (whether of the Company or of any underlying vendor(s) from whom the Company may be acquiring its interest). Title to mineral properties may be subject to unregistered prior agreements or transfers, and may also be affected by undetected defects or the rights of indigenous peoples. Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties for which titles have been issued are in good standing.

Uncertainty of Resource Estimates/Reserve

Unless otherwise indicated, mineralization figures presented in the Company's filings with securities regulatory authorities, press releases and other public statements that may be made from time to time are based upon estimates made by Company personnel and independent geologists. These estimates are imprecise and depend upon geological interpretation and statistical inferences drawn from drilling and sampling analysis, which may prove to be unreliable.

RIFT VALLEY RESOURCES CORP.
Management Discussion and Analysis
For the three months ended March 31, 2016

RISK FACTORS AND UNCERTAINTIES (continued)

Limited Experience

The Company has very limited experience in placing mineral resource properties into production, and its ability to do so will be dependent upon using the services of appropriately experienced personnel or entering into agreements with other major resource companies that can provide such expertise. There can be no assurance that the Company will have available to it the necessary expertise when and if it places its resource properties into production.

Dilution to the Company's Existing Shareholders

The Company will require additional equity financing to be raised in the future. The Company may issue securities at less than favorable terms to raise sufficient capital to fund its business plan. Any transaction involving the issuance of equity securities or securities convertible into common shares would result in dilution, possibly substantial, to present and prospective holders of common shares.

Speculative Business

Resource exploration and development is a speculative business and involves a high degree of risk, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in size to return a profit from production. The marketability of natural resources that may be acquired or discovered by the Company will be affected by numerous factors beyond the control of the Company. These factors include market fluctuations, the proximity and capacity of natural resource markets, government regulations, including regulations relating to prices, taxes, royalties, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital. There is no known resource, and there are no known reserves, on any of the Company's properties.

APPROVAL

The Board of Directors of the Company has approved the disclosure contained in this MD&A on May 30, 2016.
