Cannabix Technologies Granted *Cannabis Drug Detection Device* Canadian Patent, Delivers THCBA to US Clinic

Cannabix is developing Marijuana Breathalyzer devices to give law enforcement and employers a tool to enhance public safety

Vancouver, British Columbia, July 6, 2021 -- Cannabix Technologies Inc. (CSE: BLO) (OTC PINK: BLOZF) (the “Company” or “Cannabix”) developer of the Cannabix Marijuana Breathalyzer devices for law enforcement and the workplace, announces that the Canadian Intellectual Property Office (CIPO) has granted patent No. 2887841 entitled, “*Cannabis Drug Detection Device*”. The Company has been pursuing this original patent application since its filing on April 16, 2015. Cannabix Technologies is on the forefront in research and development to create point-of-care breath testing technologies for the detection of $\Delta 9$ -tetrahydrocannabinol (“THC”) - the psychoactive component of marijuana that causes impairment.

“Similar to our USPTO patent, the intellectual property protection this THC detection patent covers, gives Cannabix a broad foundation to build upon in view of the formidable insights and technical advancements made in the field of molecular gas analysis at atmospheric pressure that we have developed since this patent was initially filed in 2015. This patent is a useful plank in our IP protection strategy” said Dr. Raj Attariwala.

The Company also reports that in June it delivered its THC Breath Analyzer (“THCBA”) to a clinic in the Northwestern, U.S. for beta testing. The collaborating clinic has a robust drug testing operation and is one of the top drug testing providers to employers within its respective state. Beta-testing of the THCBA prototype is focused on improving user and administrator experience, identifying cross-reactivity of other substances within a semi-controlled study population and to further train the device’s machine learning database and sensitivity profile. The THCBA is a drug screening device for employers and other markets who are seeking a way to quickly, easily and non-invasively test for recent use of THC.

“In the last several months we have seen the states of Oregon, New Jersey, New York and Arizona legalize recreational use of marijuana and several other states like Virginia, New Mexico, Montana and Connecticut have taken steps to either legalize or decriminalize cannabis possession in some way. This has led to recent reports from AAA and IIHS outlining the impact of driving performance under the influence of cannabis. Furthermore, employers are re-examining their drug testing policies, procedures and tools. There is a massive sea-change happening in the U.S. related to cannabis use and Cannabix Technologies is at the forefront of developing the tools to aid public safety and create more relevant and fairer cannabis testing technology”, stated CEO, Rav Mlait.

About Cannabix Technologies Inc.

Cannabix Technologies Inc. is a developer of marijuana breathalyzer technologies for law enforcement and the workplace. Cannabix is working to develop drug-screening devices that will detect THC - the psychoactive component of marijuana that causes impairment using breath samples. Breath testing for THC would allow employers and law enforcement to identify recent marijuana use that better aligns with impairment.

We seek Safe Harbor.

On behalf of the Board of Directors

“Rav Mlait”

CEO
Cannabix Technologies Inc.

Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking information that involves various risks and uncertainties regarding future events. Such forward-looking information can include without limitation statements based on current expectations involving a number of risks and uncertainties and are not guarantees of future performance of the Company, such as final development of a commercial or prototype product(s), successful trial or pilot of company technologies, no assurance that commercial sales of any kind actually materialize; no assurance the Company will have sufficient funds to complete product development. There are numerous risks and uncertainties that could cause actual results and the Company's plans and objectives to differ materially from those expressed in the forward-looking information, including: (i) adverse market conditions; (ii) risks regarding protection of proprietary technology; (iii) the ability of the Company to complete financings; (iv) the ability of the Company to develop and market its future product; and (v) risks regarding government regulation, managing and maintaining growth, the effect of adverse publicity, litigation, competition and other factors which may be identified from time to time in the Company's public announcements and filings. There is no assurance that the marijuana breathalyzer business will provide any benefit to the Company, and no assurance that any proposed new products will be built or proceed. There is no assurance that existing “patent pending” technologies licensed by the Company will receive patent status by regulatory authorities. The Company is not currently selling commercial breathalyzers. Actual results and future events could differ materially from those anticipated in such information. These and all subsequent written and oral forward-looking information are based on estimates and opinions of management on the dates they are made and are expressly qualified in their entirety by this notice. Except as required by law, the Company does not intend to update these forward-looking statements.
