GREENBANK SUBSIDIARY GREENCOINX COMPLETES ONLINE WALLET AND MOBILE WALLET

Toronto, Ontario, August 31, 2015 – GreenBank Capital Inc (CSE:GBC) ("GreenBank" or "the Company") announces that its 80% owned subsidiary GreenCoinX Inc, the developer of the world's first identifiable crypto currency which has XGC as its digital currency identifier, has completed an online free wallet for sending and receiving XGC. The XGC wallet is available at www.xgcwallet.org

Also completed and available for free is the XGC Mobile Wallet for Android devices. The mobile wallet has the same features as the online wallet and can be downloaded from

<https://play.google.com/store/apps/details?id=org.xgcwallet.mobile>

The Apple version of the XGC Mobile Wallet is currently under review. A further press release will be made when the XGC Mobile Wallet is available for Apple devices.

Both the XGC Online Wallet and the XGC Mobile Wallet can send and receive XGC using an email address or mobile phone number, and do not require the user to remember a complicated public key.

Access to each wallet is by the use of a personal passphrase rather than by a complicated series of numerals and digits. The passphrase can be as long as the user likes, and can be in any language. This enables the user to more easily remember the passphrase for wallet access. The passphrase is converted into digits and then encrypted by the software in the background.

The XGC online and mobile wallets are secure wallets, and all XGC private key generating algorithms are calculated on the browsers. XGC private keys enable access to the XGC which are recorded on the GreenCoinX Blockchain. The GreenCoinX Blockchain contains only the transaction ledger thereby making hacking the wallets virtually impossible. Unlike most crypto currency wallets, when opening the XGC Wallet there is no need to sync the wallet with the blockchain. This means that the wallet is available for immediate use. Signing into a wallet requires a wallet ID and the user passphrase together

with two factor authorization.

“The XGC Wallet is a very user friendly online and mobile wallet with some unique features, and is available for free to facilitate the widespread use of XGC transactions by consumers.” said Danny Wettreich, CEO of GreenCoinX.
